Introduction: Britain and the economic problem of the cold war: Themes and questions

Part I: The political economy of British defence expenditure

1 Securing the People's Peace: Reflections on the anachronistic nature of the British warfare state in the early cold war, 1945-55 19

2 An antagonistic partnership: Britain and American economic assistance, 1945-50 61

3 'Tied to the tail of a Kilkenny cat'?: The Anglo-American relationship, British rearmament and the political crisis of 1951 87

Part II: British defence production policy

4 'The next war is bound to come': Defence production policy, supply departments and defence contractors in Britain, 1945-57 121

5 The wasting of high technological potential?: The British warfare state, the aircraft industry and technological nationalism, 1950-58 145

6 Maintaining the war potential: Rearmament and productivity in the British ammunition industry in the 1950s 191

Part III: The economic impact of British defence expenditure

7	The British defence effort and investment during the transition from war to peace, 1945-55	215
8	Britain and the economic impact of the Korean war	237
9	Too much defence, too little peace production?: The British capital-goods industry, regional development and the Korean war rearmament	273
Conclusion:	Britain and the economic problem of the first cold war: Reconsidering the political economy and economic impact of British defence expenditure, 1945-55	293
