Appendix of Sources xi

## Volume I

1. Regression Fundamentals for the Social Sciences 1
*Salvatore Babones*

### 1. The Meaning of p-Values

2. The Nonutility of Significance Tests: The Significance of Tests of Significance Reconsidered 23
*Sanford Labovitz*
3. Mindless Statistics 35
*Gerd Gigerenzer*
4. Confusion over Measures of Evidence (p's) versus Errors (a's) in Classical Statistical Testing 57
*Raymond Hubbard and M.J. Bayarri*
5. Why We Don't Really Know What *Statistical Significance* Means: Implications for Educators 75
*Raymond Hubbard and J. Scott Armstrong*
6. Researchers Should Make Thoughtful Assessments Instead of Null-Hypothesis Significance Tests 87
*Andreas Schwab, Eric Abrahamson, William H. Starbuck and Fiona Fidler*

### 2. Control Variables

7. Explaining Interstate Conflict and War: What Should Be Controlled For? 117
*James Lee Ray*
8. The Phantom Menace: Omitted Variable Bias in Econometric Research 143
*Kevin A. Clarke*
9. Beyond Baron and Kenny: Statistical Mediation Analysis in the New Millennium 157
*Andrew F. Hayes*
10. Equivalence of the Mediation, Confounding and Suppression Effect 171
*David P MacKinnon, Jennifer L. Krull and Chondra M. Lockwood*
11. Statistical Usage in Sociology: Sacred Cows and Ritual 185
*Sanford Labovitz*
12. Stepwise Regression in Social and Psychological Research 203
*Douglas A. Henderson and Daniel R. Denison*

13. Return of the Phantom Menace: Omitted Variable Bias in Political Research 211
*Kevin A. Clarke*
14. Stepwise Regression: A Caution 233
*Michael S. Lewis-Beck*

# Volume II

## 3. Outliers and Influential Points

15. Teaching about Influence in Simple Regression 3
*Frederick O. Lorenz*
16. Regression Diagnostics: An Expository Treatment of Outliers and Influential Cases 11
*Kenneth A. Bollen and Robert W. Jackman*
17. A Survey of Outlier Detection Methodologies 37
*Victoria J. Hodge and Jim Austin*
18. Practitioners' Corner: Beware of 'Good' Outliers and Overoptimistic Conclusions 73
*Catherine Dehon, Marjorie Gassner and Vincenzo Verardi*
19. Some Observations on Measurement and Statistics 89
*Sanford Labovitz*

## 4. Multicolinearity and Variance Inflation

20. Issues in Multiple Regression 105
*Robert A. Gordon*
21. A Caution Regarding Rules of Thumb for Variance Inflation Factors 137
*Robert M. O'Brien*
22. What to Do (and Not Do) with Multicollinearity in State Politics Research 153
*Kevin Arceneaux and Gregory A. Huber*
23. On the Misconception of Multicollinearity in Detection of Moderating Effects: Multicollinearity Is Not Always Detrimental 171
*Gwowen Shieh*
24. Correlated Independent Variables: The Problem of Multicollinearity 193
*H.M. Blalock, Jr*

## 5. Sample Selection Biases

25. Modeling Selection Effects 203
*Thad Dunning and David A. Freedman*
26. An Introduction to Sample Selection Bias in Sociological Data 213
*Richard A. Berk*
27. Models for Sample Selection Bias 233
*Christopher Winship and Robert D. Mare*
28. Sample Selection Bias as a Specification Error 257
*James J. Heckman*

29. How the Cases You Choose Affect the Answers You Get: Selection Bias in Comparative Politics 267
*Barbara Geddes*
30. When Less Is More: Selection Problems in Large-N and Small-N Cross-National Comparisons 285
*Bernhard Ebbinghaus*

# Volume III

## 6. Imputation Techniques

31. The Treatment of Missing Data 3
*David C. Howell*
32. A Primer on Maximum Likelihood Algorithms Available for Use with Missing Data 25
*Craig K. Enders*
33. What to Do about Missing Values in Time-Series Cross-Section Data 39
*James Honaker and Gary King*
34. Multiple Imputation for Missing Data: A Cautionary Tale 73
*Paul D. Allison*
35. Multiple Imputation for Missing Data: Making the Most of What You Know 81
*Mark Fichman and Jonathon N. Cummings*
36. Imputation of Missing Item Responses: Some Simple Techniques 111
*Mark Huisman*
37. Analyzing Incomplete Political Science Data: An Alternative Algorithm for Multiple Imputation 131
*Gary King, James Honaker, Anne Joseph and Kenneth Scheve*
38. An Empirical Evaluation of the Predictive Mean Matching Method for Imputing Missing Values 171
*Lawrence R. Landerman, Kenneth C. Land and Carl F. Pieper*

## 7. Interaction Models

39. Testing for Interaction in Multiple Regression 199
*Paul D. Allison*
40. Understanding Interaction Models: Improving Empirical Analyses 209
*Thomas Brambor, William Roberts Clark and Matt Golder*
41. Product-Variable Models of Interaction Effects and Causal Mechanisms 233
*Lowell L. Hargens*
42. Limitations of Centering for Interactive Models 251
*Richard L. Tate*
43. Decreasing Multicollinearity: A Method for Models with Multiplicative Functions 267
*Kent W. Smith and M.S. Sasaki*
44. Some Common Myths about Centering Predictor Variables in Moderated Multiple Regression and Polynomial Regression 283
*Dev K. Dalai and Michael J. Zickar*

## 8. Longitudinal Models

45. A General Panel Model with Random and Fixed Effects: A Structural Equations Approach 315
*Kenneth A. Bollen and Jennie E. Brand*
46. A Lot More to Do: The Sensitivity of Time-Series Cross-Section Analyses to Simple Alternative Specifications 349
*Sven E. Wilson and Daniel M. Butler*
47. Panel Models in Sociological Research: Theory Into Practice 377
*Charles N. Halaby*
48. Dynamic Models for Dynamic Theories: The Ins and Outs of Lagged Dependent Variables 415
*Luke Keele and Nathan J. Kelly*
49. Using Panel Data to Estimate the Effects of Events 437
*Paul D. Allison*

# Volume IV

## 9. Instrumental Variable Models

50. Instrumental Variables and the Search for Identification: From Supply and Demand to Natural Experiments 3
*Joshua D. Angrist and Alan B. Krueger*
51. Improving Causal Inference: Strengths and Limitations of Natural Experiments 21
*Thad Dunning*
52. Instrumental Variables Estimation in Political Science: A Readers' Guide 41
*Allison J. Sovey and Donald P. Green*
53. Instrumental Variables in Sociology and the Social Sciences 63
*Kenneth A. Bollen*
54. Problems with Instrumental Variables Estimation When the Correlation between the Instruments and the Endogenous Explanatory Variable Is Weak 111
*John Bound, David A. Jaeger and Regina M. Baker*

## 10. Structural Models

55. Practical Issues in Structural Modeling 131
*P.M. Bentler and Chih-Ping Chou*
56. As Others See Us: A Case Study in Path Analysis 161
*D.A. Freedman*
57. Causation Issues in Structural Equation Modeling Research 189
*Heather E. Bullock, Lisa L. Harlow and Stanley A. Mulaik*
58. Structural Equation Modeling in Practice: A Review and Recommended Two-Step Approach 205
*James C. Anderson and David W. Gerbing*

59. Structural Equation Models in the Social and Behavioral Sciences: Model Building 233
*James G. Anderson*

## 11. Causality

60. Statistical Models for Causation 257
*David A Freedman*
61. Structural Equations and Causal Explanations: Some Challenges for Causal SEM 285
*Keith A. Markus*
62. The Estimation of Causal Effects from Observational Data 313
*Christopher Winship and Stephen L. Morgan*
63. Statistical Models for Causation: What Inferential Leverage Do They Provide? 359
*David A. Freedman*
64. The Foundations of Causal Inference 381
*Judea Pearl*
