Preface xi

1 Introduction 1
1.1 Market integration 1
1.2 Plan of the book 6

Part 1 Tax competition: policy and theory

2 Policy issues 13
2.1 Direct taxes 13
2.2 Indirect taxes 22

3 A first look at the literature 29
3.1 Three important fiscal externalities 31
3.2 Symmetric vs. asymmetric countries 33
3.3 The set of tax instruments 35
3.4 Firm mobility and imperfect competition 36
3.5 Political economy aspects and alternative government objectives 37
3.6 Further issues 39

Part 2 Factor taxation

4 An introduction to capital tax competition 47
4.1 Residence- vs. source-based capital taxation 48
4.2 Capital and labour taxes in a small open economy 54
4.3 Tax competition with source-based capital taxes 61
4.4 Capital tax competition: empirical evidence 67

5 Capital tax competition and country size 74
5.1 A basic model of asymmetric capital tax competition 75
5.2 Asymmetric capital tax competition with two tax instruments 80

5.3 Numerical analysis 86
5.4 Asymmetric tariff competition 92
5.5 The 'third-country problem' and the regional coordination of capital income taxes 94

6 Factor taxation and income distribution 99
6.1 Capital taxation in a median voter model 100
6.2 An alternative model of interest groups 102
6.3 Nash equilibrium 109
6.4 Capital market integration 111
6.5 Discussion and comparison of results 117
6.6 Political economy and the welfare effects of tax coordination 122
Appendix 124

7 Profit-shifting and the corporate tax structure 125
7.1 The benchmark case: cash-flow taxation 126
7.2 Corporate taxation under profit-shifting 131
7.3 Discussion and comparison of results 136
7.4 Profit-shifting and international coordination of corporate tax bases 139
Appendix 142

Part 3 Commodity taxation

8 The problem of cross-border shopping 147
8.1 Principles of international commodity taxation 148
8.2 Two benchmark analyses 152
8.3 A simple general equilibrium model with cross-hauling 154
8.4 Existence and properties of the Nash equilibrium 159
8.5 Tax coordination 165
8.6 Welfare effects of commodity tax harmonisation: a comparison with related literature 173
8.7 Summary: deficiencies of the current system 180
Appendix 182

9 Switching to the origin principle? 186
9.1 The administration of an origin-based VAT 187
9.2 A basic equivalence result with mobile capital 189
9.3 Anticipation effects in a three-period model 193
9.4 A dynamic model of investment and savings 196
9.5 Short-run effects of a switch in the tax regime 202
9.6 Discussion and comparison of results 213
9.7 Further issues of a switch to the origin principle 216
9.8 A preliminary evaluation of the arguments 222
Appendix 224
9A.1 The investment system 224
9A.2 International asset accumulation 225

Part 4 Factor and commodity taxation

10 Optimal taxation with interacting factor and commodity taxes 231
10.1 Integrating capital and commodity taxes 232
10.2 A specific-factors model with mobile capital 233
10.3 The benchmark: production efficiency 239
10.4 Constraints on tax instruments 241
10.5 Discussion and comparison of results 247
Appendix 254

11 Commodity and profit taxation with imperfect firm mobility 257
11.1 An efficient tax system with public inputs 258
11.2 Combining imperfect mobility of firms and consumers 259
11.3 The optimal tax structure 267
11.4 Discussion of results and policy implications 273
Appendix 276

12 Country size and the location of monopolists 279
12.1 Elements of the new trade theory 280
12.2 Description of household and firm behaviour 283
12.3 Tax competition with symmetric transport costs 288
12.4 Tax competition with two instruments 292
12.5 Discussion and comparison of results 299
12.6 Location rents and corporate taxation in the European Union 302
Appendix 304
12A.1 The firm's exporting option 304
12A.2 Setting up plants in both countries *A* and *B* 305

13 Summary and policy conclusions 308
