Hybridization Techniques for Electron Microscopy

Edited by

Gérard Morel, Ph.D., D. es Sc.

Research Director
National Scientific Research Center
Claude Bernard University
School of Medicine Lyon-Sud
Lyon, France

CRC Press
Boca Raton Ann Arbor London Tokyo

TABLE OF CONTENTS

Introduction 1
G. Morel

Chapter 1
The Molecular Principles of *in situ* Hybridization 13
C. Perrett

Chapter 2
Principles of Probe Preparation for *in situ* Hybridization 45
P. Couble

Chapter 3
DNA *in situ* Hybridization and Confocal Microscopy 65
H. van Dekken, G. J. Brakenhoff, and J. G. J. Bauman

Chapter 4
In situ Hybridization on Semithin Sections 99
C. Pechoux and G. Morel

Chapter 5
Pre-Embedding *in situ* Hybridization 139
A. Trembleau

Chapter 6
In situ Hybridization on Ultrathin Frozen Sections 163
G. Morel

Chapter 7
Ultrastructural *in situ* Hybridization of mRNA on Lowicryl Sections Using Quick-Freezing, Freeze-Substitution and Low Temperature Embedding 221
L. Frappart and D. Le Guellec

Chapter 8
Electron Microscopic of rRNA *in situ* Hybridization on Lowicryl Sections 243
J.G. Fournier and F. Escaig-Haye

Chapter 9
Procedures of *in situ* Nucleic Acid Hybridization to Detect Viral DNA and RNA in Cells by Electron Microscopy 269
F. Puvion-Dutilleul

Chapter 10
Electron Microscopic *in situ* Hybridization to RNA or DNA in Plant Cells 301
J. Brangeon and L. Sossountzov

Index 349
