1 Introduction: Cyanotoxins – Research for Environmental Safety and Human Health 1

2 Cyanotoxin Occurrence in Freshwaters 5

2.1 Cyanotoxin Occurrence in Germany* 5

2.1.1 The Waterbodies Surveyed for Cyanotoxins in Germany* 6
Claudia Wiedner, Ingrid Chorus and Jutta Fastner with support from Hans Güde (LAU-BW), Lutz Hoehne (LUA-BB), Antje Köhler (ITOX), Swantje Koch (Tm-UP), Rainer Koschel and Lothar Krienitz (IGB-N), Bernd Melzer (TmFZ), Barbara Meyer (MPI-PI), Brigitte Nixdorf (BTU-C), Ernst Nusch (Ruhr-V), Martina Oehms and Liane Portugal, (LWW-RP), Hartmut Rönicke (UFZ-M), Hans-Heinrich Schuster (TH-H), Sonja Stottmeister (TmZmW), EkkehardVareschi (Uni-O), Norbert Walz (IGB-B), Rosemarie Wanka (StAU-H), Heidrun Wege and Ute Kruspe (Tm-GW), Hartmut Willmitzer (Thü-TV), (legend for abbreviations see Table 2.1)

2.1.2 Microcystins and Hepatocyte Toxicity* 22
Jutta Fastner, Birgit Wirsing, Claudia Wiedner, Rita Heinze, Uwe Neumann and Ingrid Chorus

2.1.3 Cyanobacterial Neurotoxins* 37
Ingrid Chorus, Christiane Burnke-Vogt, Karl-Erich Lindenschmidt and Elke Jaime

2.2 Comparison of Cyanotoxin Occurrence in Different Countries 46

2.2.1 Toxic Cyanobacterial Blooms of Inland Waters in Southern Norway 1978-1998 46
Hans Utkilen, Olav M. Skulberg, Randi Skulberg, Nina Gjølme and Bjarne Underdal

2.2.2 Toxic Freshwater Cyanobacteria in Denmark 49
Peter Henriksen

2.2.3 Microcystin-LR and Total Microcystins in Cyanobacterial Blooms in the Czech Republic 1993-1998 56
Blahoslav Maršálek, Ludek Bláha, Jaroslav Turánek and Jirí Neca

2.2.4 Freshwater Cyanobacteria and their Toxins in Portugal 62
Vitor Vasconcelos

2.2.5 Cyanotoxins and Cyanobacterial Blooms in South Korean Lakes 68
Ho-Dong Park

2.2.6 Cyanotoxin Occurrence in Freshwaters – a Summary of Survey Results from Different Countries 75
Ingrid Chorus

2.3 Release and Persistence of Microcystins in Natural Waters 83
Martin Welker, Christian Steinberg and Gary Jones

3 Factors Controlling Cellular Microcystin Content 102

3.1 Effects of Light and Nutrient Supply on Growth and Microcystin Content of Different Strains of *Microcystis aeruginosa** 104
Karina Hesse and Johannes-Günter Kohl

3.2 Light-Limited Growth and Microcystin Content of *Planktothrix agardhii* and *Microcystis aeruginosa* in Turbidostats* 115
Gabriele Böttcher, Ingrid Chorus, Silvia Ewald, Thomas Hintze and Norbert Walz

3.3 Importance of Energy Charge for Microcystin Production* 133
Heike Bickel and Susanne Lyck

3.4 Characterization of Microcystin Synthetase Genes in *Microcystis aeruginosa* 142
Elke Dittmann, Marcel Erhard, Daniel Tillett, Brett A Neilan, Hans von Döhren and Thomas Börner

4 Factors Affecting Cyanotoxin Concentrations in Natural Populations 148

4.1 Microcystin Variants in *Microcystis* and *Planktothrix* Dominated Field Samples* 148
Jutta Fastner, Marcel Erhard and Uwe Neumann

4.2 Isolation and Characterization of Colony-Forming *Microcystis aeruginosa* Strains* 152
Thomas Rohrlack, Manfred Henning and Johannes-Günter Kohl

4.3 Environmental Factors an Microcystin Levels in Waterbodies* 159
Ingrid Chorus, Verena Niesel, Jutta Fastner, Claudia Wiedner, Brigitte Nixdorf and Karl-Erich Lindenschmidt

5 Cyanobacterial Toxicity and Human Exposure 178

5.1 Cyanotoxins and Human Health – Overview 179
D. James Fitzgerald

5.2 Recreational Exposure to Cyanotoxins* 190
Ingrid Chorus and Jutta Fastner

5.3 Cyanotoxins in Drinking-Water Supplies 199

5.3.1 An Extensive Outbreak of Gastroenteritis Associated with the Toxic Cyanobacterium *Planktothrix agardhii* (Oscillatoriales, Cyanophyceae) in Scania, South Sweden 200
Helene Annadotter, Gertrud Cronberg, Linda Lawton, Hans-Bertil Hansson, Ulf Göthe and Olav Skulberg

5.3.2 Cyanobacterial Toxins in Drinking Water: a Canadian Perspective 208
Shalini Gupta, Michele Giddings and Marla Sheffer

5.3.3 Dissolved Microcystins in Raw and Treated Drinking Water in the Czech Republic 212
Ludek Bláha and Blahoslav Maršálek

5.3.4 Microcystin Analysis in Selected Drinking-Water Supplies in Germany 216

5.3.4.1 Elimination of Microcystins in the Rostock Drinking-Water Treatment Plant 217
Christine Kruschwitz, Ingrid Chorus, Rita Heinze, Gertrud Schlag and Kerstin Gröbe

5.3.4.2 Elimination of Microcystins at Dörtendorf: Conventional Treatment and a Pilot Experimental Treatment System 221
Ingrid Chorus, Rita Heinze, Conrad Hübner, Wido Schmidt and Jörg Pietsch

5.3.4.3 Elimination of Microcystins Through Bank Filtration at the Radeburg Reservoir 226
Ingrid Chorus, Gertrud Schlag, Rita Heinze, Klaus Pütz and Ute Kruspe

5.3.4.4 Reducing Intake of Microcystins at the Deesbach Reservoir Drinking-Water Abstraction System 229
Jutta Fastner, Ingrid Chorus, Hartmut Willmitzer and Carol Rabe

6 Effects of *Microcystis* spp. and Selected Cyanotoxins on Freshwater Organisms 239

6.1 Effects of Cyanotoxins on Early Life Stages of Fish and Amphibians* 240
Axel Oberemm

6.2 Uptake, Enzyme Effects and Metabolism of Microcystin-LR in Aquatic Organisms 249

6.2.1 Uptake of Microcystin-LR in Aquatic Organisms 249
Claudia Wiegand and Stephan Pflugmacher

6.2.2 Effects of Microcystin-LR on Detoxication Enzymes 253
Claudia Wiegand and Stephan Pflugmacher

6.2.3 Metabolism of Microcystin-LR in Aquatic Organisms 257
Stephan Pflugmacher and Claudia Wiegand

6.3 Changes of Fish Behaviour Affected by Microcystin-LR 261
Daniela Baganz, Georg Staaks and Christian Steinberg

6.4 Responses of *Daphnia galeata* fed with *Microcystis* strains with and without Microcystins* 266
Manfred Henning, Thomas Rohrlack and Johannes-Günter Kohl

7 Toxic Effects and Substances in Cyanobacteria other than Microcystins, Anatoxin-a and Saxitoxins 281

7.1 Peptides and Depsipeptides Produced by Cyanobacteria 281
Heike Bickel, Uwe Neumann and Jürgen Weckesser

7.2 Significance of Unidentified Toxic Compounds and Approaches to their Identification* 286
Axel Oberemm, Rita Heinze, Olaf Papendorf and Jutta Fastner

7.3 New Cyanobacterial Substances with Bioactive Properties 295
Ayako Forchert, Uwe Neumann and Olaf Papendorf

8 Contributions to Toxicity Testing and Toxin Analysis 316

8.1 Testing Cyanobacterial Toxicity with Primary Rat Hepatocyte and Cell-Line Assays* 317
Rita Heinze, Jutta Fastner, Uwe Neumann and Ingrid Chorus

8.2 Can the Primary Rat Hepatocyte Assay Replace the Mouse Assay for Microcystin Testing? Validation with "Historic" Samples from the First Survey on Cyanobacterial Toxicity in Germany 324
Peter Woitke, Rita Heinze, Marion Dewender, Manfred Henning and Johannes-Günter Kohl

8.3 Comparative Evaluation of Methods for Assessing Microcystin Concentrations with a Variety of Field Samples* 330
Thomas Flury, Rita Heinze, Birgit Wirsing, Jutta Fastner, Uwe Neumann and Jürgen Weckesser

8.4 A Fish-Embryo Bioassay for the Assessment of Cyanobacterial Toxicity* 339
Axel Oberemm

8.5 Rapid Typing and Structure Determination of Cyanobacterial Peptides Using MALDI-TOF Mass Spectrometry 344
Marcel Erhard, Hans von Döhren and Peter Jungblut

9 Routine Analytical Methods Applied in the German Cyanotox Project* 354

9.1 Microcystin Analysis 354

9.2 Cell Counting, Determination of Biovolume and Chlorophyll-a 356
