

Screening for Biofilm Degrading Enzymes from Extremophiles

Vom Promotionsausschuss der
Technischen Universität Hamburg-Harburg
zur Erlangung des akademischen Grades
Doktor der Naturwissenschaften
genehmigte Dissertation

Linnich
2005

I	Introduction.....	1
1	The Biofilm Concept.....	1
1.1	What is a biofilm?.....	1
1.2	Biofilms as an ecosystem.....	2
1.3	Differences between planktotic and sessile life form.....	2
1.4	Quorum sensing.....	3
1.5	Interspecific interactions.....	6
2	Extracellular Polymeric Substances (EPS).....	6
2.1	Definition of EPS.....	6
2.2	Function of EPS.....	8
2.3	Industrial, clinical and environmental importance of biofilms.....	8
2.4	Biofilm treatment.....	10
2.5	Methods for the prevention and disruption of biofilms.....	10
3	Lipase/Esterases.....	12
4	Alginate Lyase.....	13
4.1	Alginate as a substrate.....	13
4.2	Alginate lyases.....	14
5	Extremophilic bacteria.....	15
5.1	Thermophiles.....	15
5.2	Psychrophiles.....	16
6	The Genus <i>Marinomonas</i>.....	18
7	Aim of this Study.....	19
II	Material and Methods.....	20
1	Chemicals.....	20
2	Media.....	20
2.1	Luria-Bertani (LB) Broth (per Litre).....	20
2.2	TBY.....	20
2.3	EMP (enrichment medium psychrophiles).....	21
2.4	NZY Broth (per Litre).....	21
2.5	TF Medium.....	22
2.6	Complex Medium 1.....	22
2.7	Medium 895.....	23
2.8	Medium 144.....	24
2.9	Trace element solution 10 x (DSMZ 141).....	24
2.10	Vitamin solution 10 x (DSMZ 141).....	25
3	Media Additives.....	26
4	Buffers.....	26
4.1	Phosphate buffer saline (PBS) pH 7.4.....	26
4.2	TE buffer.....	26
4.3	TAE buffer (50 x).....	26
5	Preparation of the Biofilm.....	27
6	Screening for Biofilm Degrading Bacterial Strains.....	28
6.1	Thermophilic bacteria.....	28
6.2	Psychrophilic Bacteria.....	29
6.3	Plate enzyme assays.....	33
6.4	Esterase/Lipase assay with para-Nitrophenyl-laurate.....	34
7	Molecular Genetic Methods.....	35
7.1	Treatment of tools and solutions for the work with nucleic acids.....	35
7.2	Precipitation of DNA with ethanol or isopropanol.....	35
7.3	Determination of DNA concentration.....	35
7.4	Vectors and host for cloning experiments.....	36

7.5	PCR: Polymerase Chain Reaction	38
7.6	Purification of PCR fragments	40
7.7	Agarose gel electrophoresis	40
7.8	Restriction analysis of plasmid DNA	41
7.9	Isolation of plasmid DNA	42
7.10	Blue/White screening	44
7.11	Isolation of total DNA from Strain 29-1.....	44
8	Lambda-Zap Gene Library	45
8.1	Digestion of DNA	46
8.2	Purification of DNA from agarose gels	46
8.3	Electro-elution with a dialysis membrane	47
8.4	Electro-elution with "N 45" DEAE anion exchanger paper	47
8.5	Construction of the library	48
9	Screening of the Gene Library	50
9.1	Screening for alginate lyase	50
9.2	Screening for esterase/lipase	51
9.3	Identification and cloning of alginate lyase genes	51
9.4	Alginate lyase assays	51
10	Protein Chemical Methods	54
10.1	Preparation of cell free crude extract	54
10.2	SDS-Polyacrylamide Gel Electrophoresis (SDS-PAGE) (Laemmli, 1970).....	54
10.3	Transfer of proteins from SDS gels onto PVDF membranes (Western Blot)	56
10.4	Detection of HIS-tagged proteins with monoclonal antibodies	57
11	Identification of Strain 29-1	58
11.1	Physiological characterization	58
11.2	16S rDNA sequencing and sequence data analysis.....	58
11.3	DNA-DNA hybridisation	58
11.4	GC content	59
11.5	Fatty acid composition	59
III	Results	61
1	Screening for Biofilm Degrading Bacteria	61
1.1	Thermophilic bacteria	61
1.2	Psychrophilic bacteria	64
2	Lambda-Zap gene library	66
2.1	Isolation of total DNA from Strain 29-1.....	66
2.2	Digestion of DNA	66
2.3	Ligation of the insert	67
3	Screening of the Gene Library	68
3.1	Alginate lyase	68
3.2	Enzymatic activity of the alginate lyase.....	71
3.3	Esterase/Lipase	73
4	Strain Identification	75
4.1	Collection of samples	75
4.2	Physiological characterization	75
4.3	16S rRNA sequence analysis	79
4.4	GC content	80
4.5	Fatty acid composition	80
4.6	Description of <i>Marinomonas arctica</i> sp. nov.	81
IV	Discussion	83
1	Screening for Biofilm Degrading Bacteria	83
2	Detection and Cloning of an Alginate Lyase from Strain 29-1	85
3	Detection of a Putative Esterase Gene	88

4	Strain Characterization.....	91
V	Summary	93
VI	References	95
