Contents

Introduction 1

1. A Proposed Semantical Solution to the So-called 'Problem of Mass Nouns' 16

1.0 Metaphysics without bodies 16
1.1 Metaphysics without physical objects 21
1.2 Persistence, things, and stuff 24
1.3 Unity, identity, and the semantic turn 29
1.4 A proposed semantical solution to the so-called 'problem of mass nouns' 31
1.5 Non-singular identities and definite non-count descriptions * 39
1.6 Syntax, semantics, metaphysics: bridging the apparent gaps 42
1.7 Counting and measuring 44
1.8 Post mortem on'mass nouns' 48

2. In Thrall to the Idea of The One 54

2.0 The supposed exhaustiveness of singular reference 55
2.1 'The many'bundled as'the one' 58
2.2 Plurality and two conceptions of group-talk 63
2.3 Two kinds of motivation for collections 65
2.4 Collective reference 68
2.5 Collective predication and 'die class as many' 73
2.6 Platonism: 'the class as many' as an object 77
2.7 Nominalism: 'the class as many' as no object 78
2.8 The variable of many values 86
2.9 Collections born again 92

3. **Non-count Descriptions and Non-singularity** 97

3.0 'The much' repackaged as 'the one' 97
3.1 Conditions of uniqueness 101
3.2 The Theory of Descriptions (yet again) defended 105
3.3 The mechanics of non-count descriptions 108
3.4 Non-distributive predication 111

4. Quantification and its Discontents 115

4.0 The classical model 115
4.1 Roadblocks to non-singularity; meaning and truth-conditions 120
4.2 Non-singular quantification: the distinct semantic powers of 'all' and 'some' 122
4.3 Generality and distribution *en masse* 128
4.4 The non-count cases 133
4.5 Variables, instances, and samples 136

5. **The Ideal Language Project and the Non-discrete** 141

5.0 Ideal languages 141
5.1 Conditions for transparency 143
5.2 Power versus clarity 148
5.3 Reference and material 'non-entities' 151
5.4 The realms of multiplicity and unity * 155
5.5 Two kinds of plural sentences 159
5.6 Concrete and generic non-count sentences and their material basis 165
5.7 The reality of substances 167

Appendices

I Atomism 172
II Substances and Physical Objeas: Quine's Labyrinth 175
III Reductive Mereological Approaches to Non-singularity 178
IV The Gradual Transition from Count Nouns to Pure Non-count Nouns 186
