List of Figures	xii
List of Tables	xiv
Acknowledgments	xvii
Foreword	xix
Introduction	xxiii

Part 1: Static Monetary Macroeconomics

1. Classical Macroeconomic Theory	3
1.1 The Complete Classical Model	4
1.2 The Classical Dichotomy . . . i	6
1.3 The Classical AD-AS Model	7
1.4 The Neutrality of Money	9
1.5 Conclusion	10
2. Keynesian Macroeconomic Theory	13
2.1 The Keynesian Consumption Function	14
2.2 The Complete Keynesian Model	14
2.3 The Keynesian-Cross Model	16
2.4 The IS-LM Model	17
2.5 The Keynesian AD-AS Model	20
2.6 Conclusion	23

Part 2: Dynamic Monetary Macroeconomics

3. Neoclassical Growth Theory	27
3.1 The Solow Model	27
3.2 The Optimal Growth Model	31
3.3 The Overlapping Generations Model	35
3.4 Conclusion	39
4. Monetary Growth Theory	41
4.1 The Tobin Model	42
4.2 The Sidrauski Model	46
4.3 A Variation of the Sidrauski Model	48
4.4 The New Empirics of Monetary Growth	50
4.5 Conclusion	51

Part 3: Theoretical Approaches to the Demand for Money

5. The Classics, Keynes, and Friedman	55
5.1 The Equation of Exchange	56
5.2 The Quantity Theory of Money	56
5.3 The Quantity Theory Demand for Money	57
5.4 The Cambridge Cash Balance Equation	58
5.5 The Keynesian Approach	59
5.6 Friedman's Modern Quantity Theory •	62
5.7 Conclusion	65
6. Transactions Theories of Money Demand	67
6.1 The Baumol-Tobin Model	67
6.2 The Shopping-Time Model	70
6.3 Cash-in-Advance Models	73
6.4 Conclusion	78

Portfolio Theories of Money Demand	79
7.1 Tobin's Theory of Liquidity Preference	79
7.2 Money and Overlapping Generations	82
7.3 Conclusion	87

Part 4: Empirical Approaches to the Demand for Money

8. Conventional Money Demand Functions	91
8.1 The Basic Specification	92
Definition of Money	92
Scale Variables	94
Opportunity Costs	97
8.2 The Long-Run Function	98
8.3 Money Demand Dynamics	100
8.4 First-Difference Specifications	107
8.5 Conclusion-	108
9. Modeling Trends	113
9.1 Deterministic and Stochastic Trends	113
9.2 Testing for Unit Roots	116
Dickey-Fuller (DF) Tests	116
Augmented Dickey-Fuller (ADF) Tests	117
Breaking Trend Functions	118
9.3 Testing for Stationarity	120
9.4 Testing for Nonlinearity and' Chaos	121
9.5 Conclusion	125
10. Cointegration and the Demand for Money	127
10.1 Cointegration and Common Trends	128
10.2 Error Correction Models	128
10.3 Cointegration and Money Demand	130
10.4 Testing for Cointegration	131
The Engle-Granger Approach	132
The Johansen ML Approach	133
10.5 A Bounds Testing Approach	136
10.6 Conclusion	139

11. Balanced Growth and the Demand for Money	141
11.1 Theoretical Background	142
11.2 Univariate Tests for Unit Roots	143
11.3 Testing the c, i, y System	145
11.4 Testing the $m - p, y, R$ System	146
11.5 Testing the $c, i, m - p, y, R$ System	148
11.6 Conclusion	155

Part 5: Microfoundations and Monetary Aggregation

12. Microeconomic Foundations	159
12.1 The Simple-Sum Index ' '	159
12.2 The User Cost of Money	161
12.3 Microeconomic Foundations	162
12.4 Aggregation Theory	164
12.5 Index Number Theory	167
12.6 Diewert's Link	168
12.7 Conclusion	171
13. The New Monetary Aggregates	173
13.1 The Neoclassical Monetary Problem	173
13.2 Understanding the Divisia Aggregates	175
13.3 Divisia Second Moments	176
13.4 Measurement Matters •	178
13.5 The MQ and CE Indexes	179
13.6 Empirical Comparisons	180
13.7 Conclusion	181
14. Nominal Stylized Facts	
14.1 The Hodrick and Prescott Filter	
14.2 The Cyclical Behavior of Money	
14.3 Prices, Interest Rates, and Velocity	
14.4 Robustness	
14.5 Conclusion	

Part 6: Microfoundations and the Demand for Money

15. The Nonparametric Approach to Demand Analysis	201
15.1 The Idea of Revealed Preference	202
15.2 The Maximization Hypothesis	202
15.3 Homotheticity	203
15.4 Direct Separability	204
15.5 Indirect Separability	206
15.6 Homothetic Separability	208
15.7 NONPAR Tests of Consumer Behavior	209
15.8 Conclusion	211
16. The Parametric Approach to Demand Analysis	213
16.1 The Direct Utility Approach	213
16.2 The Indirect Utility Approach	215
16.3 The HTL Demand System	216
16.4 Dimension Reduction	218
16.5 Duality and Functional Structure	220
16.6 Conclusion	221
17. Flexible Functional Forms and Demand Systems	223
17.1 Locally Flexible Forms	224
The Generalized Leontief	224
The Translog	224
The Almost Ideal Demand System	226
17.2 Effectively Globally Regular Forms	227
The Minflex Laurent Generalized Leontief	227
The Minflex Laurent Translog	229
17.3 Globally Flexible Forms	229
The Fourier Model	230
The Asymptotically Ideal Model	231
17.4 Conclusion	232

Part 7: Microeconometrics and the Demand for Money

18. The Econometrics of Demand Systems	237
18.1 Stochastic Specification	238
18.2 Autoregressive Disturbances	239
18.3 Expenditure and Price Elasticities	240
18.4 Elasticities of Substitution	241
18.5 The Slutsky Conditions	242
Homogeneity (of Degree Zero)	243
Adding-Up (Summability)	244
Symmetry of the Slutsky Matrix	245
Negativity of the Own Substitution Effect	247
18.6 Conclusion	248
19. Applied Monetary Demand Analysis	249
19.1 The Revealed Preference Approach	249
19.2 The Divisia Aggregator	253
19.3 The Demand Systems Approach	254
The Basic Translog	255
The Regularity Tests	258
The Elasticities	259
19.4 Conclusion	262
20. Future Research Agenda	
20.1 Outstanding Credit	
20.2 Monetary Policy	
20.3 Dynamics	
20.4 Risk Matters	
20.5 Conclusion
