<i>Editor contact details</i>	xiii
<i>Preface</i>	xv
<b>1 Introduction to clothing biosensory engineering</b>	<b>1</b>
Yi Li, Institute of Textiles and Clothing, The Hong Kong Polytechnic University, Hong Kong and ANTHONY S.W. WONG, School of Nursing, The Hong Kong Polytechnic University, Hong Kong	
1.1 Consumer trends	1
1.2 Definition of sensory comfort	3
1.3 Human-clothing-environment system	4
1.4 Clothing biosensory engineering	6
1.5 Acknowledgements	7
1.6 References	7
<b>2 Psychology and sensory comfort</b>	<b>9</b>
Yi LI, Institute of Textiles and Clothing, The Hong Kong Polytechnic University, Hong Kong and ANTHONY S.W. WONG, School of Nursing, The Hong Kong Polytechnic University, Hong Kong	
2.1 Perception of comfort	9
2.2 Psychological research techniques	9
2.3 Comfort sensory descriptors	11
2.4 Psychophysics	13
2.5 Scales of measurement	15
2.6 Scales to measure direct responses	16
2.7 Wear trial techniques	22
2.8 Conclusion	24
2.9 Acknowledgements	24
2.10 References	24

vi	Contents	
3	<b>Neurophysiology of sensory perceptions</b>	28
	Yi LI, Institute of Textiles and Clothing, The Hong Kong Polytechnic University, Hong Kong and ANTHONY S.W. WONG, School of Nursing, The Hong Kong Polytechnic University, Hong Kong	
3.1	Senses and comfort	28
3.2	Neurophysiological basis of sensory perceptions	29
3.3	Perception of sensations related to mechanical stimuli	32
3.4	Perception of thermal and moisture sensations	42
3.5	Perception of texture	48
3.6	Perception of fabric hand	50
3.7	Acknowledgements	54
3.8	References	54
4	<b>Physiology of thermal comfort</b>	60
	Yi LI, Institute of Textiles and Clothing, The Hong Kong Polytechnic University, Hong Kong and ANTHONY S.W. WONG, School of Nursing, The Hong Kong Polytechnic University	
4.1	Introduction	60
4.2	Thermal comfort	61
4.3	Thermophysiology of the human body	64
4.4	Thermoregulation of the human body	66
4.5	Dynamic thermal interaction between the body and clothing	68
4.6	Nomenclature	70
4.7	Acknowledgements	71
4.8	References	71
5	<b>Physics of thermal comfort</b>	74
	Yi LI, Institute of Textiles and Clothing, The Hong Kong Polytechnic University, Hong Kong and ANTHONY S.W. WONG, School of Nursing, The Hong Kong Polytechnic University, Hong Kong	
5.1	Introduction	74
5.2	Heat and moisture transfer	74
5.3	Dynamic heat and moisture transfer in fabric	76
5.4	Moisture exchange between fiber and air	79
5.5	Boundary conditions	83
5.6	Physical properties of fibers and fabrics	84
5.7	Method of solution	84
5.8	Moisture sorption of wool fabrics	86
5.9	Behavior of fabrics made from different fibers	86
5.10	Acknowledgements	90
5.11	References	90

<b>6</b>	<b>Thermal and moisture sensations</b>	<b>93</b>
	Yi LI, Institute of Textiles and Clothing, The Hong Kong Polytechnic University, Hong Kong and ANTHONY S.W. WONG, School of Nursing, The Hong Kong Polytechnic University, Hong Kong	
6.1	Introduction	93
6.2	Coolness to the touch	93
6.3	Warmth to the touch	99
6.4	Dampness sensation	104
6.5	Clamminess and moisture buffering during exercise	107
6.6	Environmental buffering	110
6.7	Acknowledgements	112
6.8	References	112
<b>7</b>	<b>Tactile sensations</b>	<b>116</b>
	Yi LI, Institute of Textiles and Clothing, The Hong Kong Polytechnic University, Hong Kong and ANTHONY S.W. WONG, School of Nursing, The Hong Kong Polytechnic University, Hong Kong	
7.1	Introduction	116
7.2	Fabric prickliness	116
7.3	Fabric itchiness	120
7.4	Fabric stiffness	121
7.5	Fabric softness	127
7.6	Fabric smoothness, roughness and scratchiness	131
7.7	Garment fit and pressure comfort	141
7.8	Acknowledgements	147
7.9	References	147
<b>8</b>	<b>Dimensions of sensory comfort perceptions</b>	<b>151</b>
	Yi LI, Institute of Textiles and Clothing, The Hong Kong Polytechnic University, Hong Kong and ANTHONY S.W. WONG, School of Nursing, The Hong Kong Polytechnic University, Hong Kong	
8.1	Individual sensations involved in the perception of sensory comfort	151
8.2	Identification of sensory factors	152
8.3	Thermal-wet comfort	159
8.4	Tactile comfort	160
8.5	Clothing pressure comfort	161
8.6	Acknowledgements	164
8.7	References	164

<b>9</b>	<b>Overall comfort perception and preferences</b>	<b>167</b>
	ANTHONY S.W. WONG, School of Nursing, The Hong Kong Polytechnic University, Hong Kong and Yi Li, Institute of Textiles and Clothing, The Hong Kong Polytechnic University, Hong Kong	
9.1	Introduction	167
9.2	Influences of different factors toward overall comfort perception	168
9.3	Calculation of subjective preference on clothing	169
9.4	Relationship between overall comfort perception and preference	171
9.5	Acknowledgements	175
9.6	References	175
<b>10</b>	<b>Prediction of clothing sensory comfort</b>	<b>178</b>
	ANTHONY S.W. WONG, School of Nursing, The Hong Kong Polytechnic University, Hong Kong and Yi Li, Institute of Textiles and Clothing, The Hong Kong Polytechnic University, Hong Kong	
10.1	Introduction	178
10.2	Prediction of fabric hand	178
10.3	Predictability of sensory comfort	180
10.4	Predictability of subjective preferences	181
10.5	Prediction of sensory factors	183
10.6	Prediction of clothing sensory comfort on the basis of subjective measurements	183
10.7	Prediction of clothing sensory comfort on the basis of fabric physical properties	184
10.8	Application of hybrid models in the prediction of clothing sensory comfort	185
10.9	Acknowledgements	187
10.10	References	187
<b>11</b>	<b>Thermal properties</b>	<b>189</b>
	J. Y. Hu, Yi LI and K.W. YEUNG, Institute of Textiles and Clothing, The Hong Kong Polytechnic University, Hong Kong	
11.1	Introduction	189
11.2	Heat production and heat loss	189
11.3	Thermal comfort	191
11.4	Thermal insulation	192
11.5	Thermal conductivity	194
11.6	Cool/warm feeling	194
11.7	Thermal manikin	198

11.8	Other apparatus for fabric thermal functional evaluation	201
11.9	Acknowledgements	203
11.10	References	203
<b>12</b>	<b>Water vapor transfer</b> J.Y. Hu, Yi LI and K.W. YEUNG, Institute of Textiles and Clothing, The Hong Polytechnic University, Hong Kong	<b>206</b>
12.1	Introduction	206
12.2	Moisture phase changes	206
12.3	Water vapor transfer	208
12.4	Water vapor transfer with temperature gradient	213
12.5	Comparison of water vapor transfer with and without temperature gradient	214
12.6	Conclusion	215
12.7	Acknowledgements	215
12.8	References	215
<b>13</b>	<b>Liquid moisture transfer</b> J.Y. Hu, Yi LI and K.W. YEUNG, Institute of Textiles and Clothing, The Hong Polytechnic University, Hong Kong	<b>218</b>
13.1	Introduction	218
13.2	Absorbency	218
13.3	Wettability	220
13.4	Waterproof	221
13.5	Contact angle	223
13.6	Moisture management	223
13.7	Experimental	229
13.8	Acknowledgements	233
13.9	References	233
<b>14</b>	<b>Coupled heat and moisture transfer</b> S.X. WANG and Yi Li, Institute of Textiles and Clothing, The Hong Kong Polytechnic University, Hong Kong	<b>235</b>
14.1	Introduction	235
14.2	Simulation of coupled heat and moisture transfer	235
14.3	Moisture transfer with temperature gradient	238
14.4	The role of phase change material (PCM) fabrics	238
14.5	Effect of PCM fabrics	245
14.6	Measuring the thermal and moisture buffering effects of fabrics	248
14.7	Acknowledgements	250
14.8	References	250

x	Contents	
15	Air permeability	252
	J.Y. Hu, Yi LI and K.W. YEUNG, Institute of Textiles and Clothing, The Hong Polytechnic University, Hong Kong	
15.1	Introduction	252
15.2	Measurement of air permeability	254
15.3	Humidity-dependent air permeability	258
15.4	Acknowledgements	259
15.5	References	259
16	Mechanical tactile properties	261
	J.Y. Hu, Yi LI and K.W. YEUNG, Institute of Textiles and Clothing, The Hong Polytechnic University, Hong Kong	
16.1	Introduction	261
16.2	Objective measurement of fabric tactile properties	264
16.3	Measurement of subjective tactile sensations	267
16.4	Results of FSTT and KES testing systems	267
16.5	Relationships between subjective sensations and objective measurements	277
16.6	Conclusion	282
16.7	Acknowledgements	282
16.8	References	282
17	<i>In vivo</i> physiological measurements	285
	J.Y. Hu, Yi LI and K.W. YEUNG, Institute of Textiles and Clothing, The Hong Polytechnic University, Hong Kong	
17.1	Introduction	285
17.2	Temperature measurements	286
17.3	Humidity measurements	292
17.4	Pressure measurements	293
17.5	Sweating rate and skin wetness measurements	294
17.6	Skin blood flow measurements	294
17.7	Oxygen consumption measurements	296
17.8	Heart rate measurements	297
17.9	Conclusion	298
17.10	Acknowledgements	299
17.11	References	299
18	Application of clothing biosensory engineering	301
	Yi LI, Institute of Textiles and Clothing, The Hong Kong Polytechnic University, Hong Kong and ANTHONY S.W. WONG, School of Nursing, The Hong Kong Polytechnic University, Hong Kong	

18.1	Introduction	301
18.2	Area of application	301
18.3	Consumer research	302
18.4	New product development	304
18.5	Consumer subjective evaluation	307
18.6	Test methods and instruments	307
18.7	Acknowledgements	309
18.8	References	309
19	<b>Mechanical and thermal sensory engineering design</b>	<b>311</b>
	Yi LI and ZHANG WANG, Institute of Textiles and Clothing, The Hong Kong Polytechnic University, Hong Kong and XIN ZHANG, Xian University of Engineering Science & Technology, Xian, China	
19.1	Introduction	311
19.2	Functional requirements of a mechanical sensory engineering design system	313
19.3	Fundamental work in the development of mechanical engineering design system (MEDS)	316
19.4	Structural organization of the system	325
19.5	Example	327
19.6	Thermal sensory engineering design	330
19.7	Thermal sensory engineering design process and system	330
19.8	Application of TSEDS	331
19.9	Conclusion	332
19.10	Acknowledgements	332
19.11	References	332
20	<b>Sensory comfort of denim product</b>	<b>335</b>
	Yi L. KWOK, Institute of Textiles and Clothing, The Hong Kong Polytechnic University, Hong Kong, ANTHONY S.W. WONG, School of Nursing, The Hong Kong Polytechnic University, Hong Kong, Yi LI, Institute of Textiles and Clothing, The Hong Kong Polytechnic University, Hong Kong and XIN ZHANG, Fashion College, Xian University of Engineering Science and Technology, Xian, China	
20.1	Introduction	335
20.2	Human subjective perception on denim products	336
20.3	Study of sensory comfort in denim jeans	337
20.4	Conclusion	348
20.5	Acknowledgements	348
20.6	References	348
