Kafka: The Definitive Guide

Real-Time Data and Stream Processing at Scale

Neha Narkhede, Gwert Shapira, and Todd Palino

Table of Contents

Foreword xi

Preface xv

1. Meet Kafka 1
   - Publish/Subscribe Messaging 1
     - How It Starts 2
     - Individual Queue Systems 3
   - Enter Kafka 4
     - Messages and Batches 4
     - Schemas 5
     - Topics and Partitions 5
     - Producers and Consumers 6
     - Brokers and Clusters 7
     - Multiple Clusters 8
   - Why Kafka? 10
     - Multiple Producers 10
     - Multiple Consumers 10
     - Disk-Based Retention 10
     - Scalable 10
     - High Performance 11
   - The Data Ecosystem 11
     - Use Cases 12
   - Kafka's Origin 14
     - Linkedlns Problem 14
     - The Birth of Kafka 15
     - Open Source 15
     - The Name 16

Getting Started with Kafka 16

2. Installing Kafka 17
First Things First 17
Choosing an Operating System 17
Installing Java 17
Installing Zookeeper 18
Installing a Kafka Broker 20
Broker Configuration 21
General Broker 21
Topic Defaults 24
Hardware Selection 28
Disk Throughput 29
Disk Capacity 29
Memory 29
Networking 30
CPU 30
Kafka in the Cloud 30
Kafka Clusters 31
How Many Brokers? 32
Broker Configuration 32
OS Tuning 32
Production Concerns 36
Garbage Collector Options 36
Datacenter Layout 37
Colocating Applications on Zookeeper 37
Summary 39

3. Kafka Producers: Writing Messages to Kafka 41
Producer Overview 42
Constructing a Kafka Producer 44
Sending a Message to Kafka 46
Sending a Message Synchronously 46
Sending a Message Asynchronously 47
Configuring Producers 48
Serializers 52
Custom Serializers 52
Serializing Using Apache Avro 54
Using Avro Records with Kafka 56
Partitions 59
Old Producer APIs 61
Summary 62

4. Kafka Consumers: Reading Data from Kafka 63
Kafka Consumer Concepts 63
Consumers and Consumer Groups 63
Consumer Groups and Partition Rebalance 66
Creating a Kafka Consumer 68
Subscribing to Topics 69
The Poll Loop 70
Configuring Consumers 72
Commits and Offsets 75
Automatic Commit 76
Commit Current Offset 77
Asynchronous Commit 78
Combining Synchronous and Asynchronous Commits 80
Commit Specified Offset 80
Rebalance Listeners 82
Consuming Records with Specific Offsets 84
But How Do We Exit? 86
Deserializers 88
Standalone Consumer: Why and How to Use a Consumer Without a Group 92
Older Consumer APIs 93
Summary 93

5. Kafka Internals 95
Cluster Membership 95
The Controller 96
Replication 97
Request Processing 99
Produce Requests 101
Fetch Requests 102
Other Requests 104
Physical Storage 105
Partition Allocation 106
File Management 107
File Format 108
Indexes 109
Compaction 110
How Compaction Works 110
Deleted Events 112
When Are Topics Compacted? 112
Summary 113

6. Reliable Data Delivery 115
Reliability Guarantees 116
Replication 117
Broker Configuration 118
Replication Factor 118
Unclean Leader Election 119
Minimum In-Sync Replicas 121
Using Producers in a Reliable System 121
Send Acknowledgments 122
Configuring Producer Retries 123
Additional Error Handling 124
Using Consumers in a Reliable System 125
Important Consumer Configuration Properties for Reliable Processing 126
Explicitly Committing Offsets in Consumers 127
Validating System Reliability 129
Validating Configuration 130
Validating Applications 131
Monitoring Reliability in Production 131
Summary 133

7. Building Data Pipelines 135
Considerations When Building Data Pipelines 136
Timeliness 136
Reliability 137
High and Varying Throughput 137
Data Formats 138
Transformations 139
Security 139
Failure Handling 140
Coupling and Agility 140
When to Use Kafka Connect Versus Producer and Consumer 141
Kafka Connect 142
Running Connect 142
Connector Example: File Source and File Sink 144
Connector Example: MySQL to Elasticsearch 146
A Deeper Look at Connect 151
Alternatives to Kafka Connect 154
Ingest Frameworks for Other Datastores 155
GUI-Based ETL Tools 155
Stream-Processing Frameworks 155
Summary 156

8. Cross-Cluster Data Mirroring 157
Use Cases of Cross-Cluster Mirroring 158
Multicluster Architectures 158
Some Realities of Cross-Datacenter Communication 159
Hub-and-Spokes Architecture 160
Active-Active Architecture 161
Active-Standby Architecture 163
Stretch Clusters 169
Apache Kafka's MirrorMaker 170
How to Configure 171
Deploying MirrorMaker in Production 172
Tuning MirrorMaker 175
Other Cross-Cluster Mirroring Solutions 178
Uber uReplicator 178
Confluents Replicator 179
Summary 180

9. Administering Kafka 181
Topic Operations 181
Creating a New Topic 182
Adding Partitions 183
Deleting a Topic 184
Listing All Topics in a Cluster 185
Describing Topic Details 185
Consumer Groups 186
List and Describe Groups 186
Delete Group 188
Offset Management 188
Dynamic Configuration Changes 190
Overriding Topic Configuration Defaults 190
Overriding Client Configuration Defaults 192
Describing Configuration Overrides 192
Removing Configuration Overrides 193
Partition Management 193
Preferred Replica Election 193
Changing a Partition's Replicas 195
Changing Replication Factor 198
Dumping Log Segments 199
Replica Verification 201
Consuming and Producing 202
Console Consumer 202
Console Producer 205

Client ACLs 207
Unsafe Operations 207
Moving the Cluster Controller 208
Killing a Partition Move 208
Removing Topics to Be Deleted 209
Deleting Topics Manually 209
Summary 210

10. Monitoring Kafka 211
Metric Basics 211
Where Are the Metrics? 211
Internal or External Measurements 212
Application Health Checks 213
Metric Coverage 213
Kafka Broker Metrics 213
Under-Replicated Partitions 214
Broker Metrics 220
Topic and Partition Metrics 229
JVM Monitoring 231
OS Monitoring 232
Logging 235
Client Monitoring 236
Producer Metrics 236
Consumer Metrics 239
Quotas 242
Lag Monitoring 243
End-to-End Monitoring 244
Summary 244

11. Stream Processing 247
What Is Stream Processing? 248
Stream-Processing Concepts 251
Time 251
State 252
Stream-Table Duality 253
Time Windows 255
Stream-Processing Design Patterns 256
Single-Event Processing 256
Processing with Local State 257
Multiphase Processing/Repartitioning 259
Processing with External Lookup: Stream-Table Join 260
Streaming Join 261

Out-of-Sequence Events 262
Reprocessing 264
Kafka Streams by Example 264
Word Count 265
Stock Market Statistics 268
Click Stream Enrichment 270
Kafka Streams: Architecture Overview 272
Building a Topology 272
Scaling the Topology 273
Surviving Failures 276
Stream Processing Use Cases 277
How to Choose a Stream-Processing Framework 278
Summary 280

A. Installing Kafka on Other Operating Systems 281

Index 287
