

Dang Hai Hoang

**Quality of Service Control
in the Mobile Wireless
Environment**

PETER LANG

Frankfurt am Main · Berlin · Bern · Bruxelles · New York · Oxford · Wien

Table of Contents

1 Introduction

1.1 Problem Specification and Objectives	2
1.2 Contributions	5
1.3 The Road Map	6

2 Networks, Services and QoS Issues

2.1 Introduction	9
2.2 Applications and Services	10
2.3 Network Heterogeneity	12
2.3.1 Heterogeneity of the Wired Networks	12
2.3.2 Heterogeneity of the Wireless Networks	13
2.3.3 Vision of an “ALL-IP” Approach	15
2.4 QoS Guarantees	16
2.4.1 QoS Definitions	16
2.4.2 Special Requirements of Multimedia	18
2.4.3 Specification of QoS	19
2.4.4 Principles for Providing QoS Guarantees	20
2.4.5 QoS and Resource Management	21
2.5 Networking Technologies for QoS	24
2.5.1 IP QoS Technologies	24
2.5.2 Asynchronous Transfer Mode (ATM)	27
2.5.3 Subnet Bandwidth Manager (SBM)	27
2.5.4 Multi-Protocol Label Switching (MPLS)	28
2.5.5 Technologies for Wireless LANs	28
2.5.6 UMTS QoS Architectural Model	29
2.6 QoS Issues in Heterogeneous Network Environments	32
2.6.1 Wireless Bit Errors	32
2.6.2 Fluctuation of Wireless Links	33
2.6.3 Mobility	33
2.6.4 Connectivity to Wired Networks	34
2.6.5 Low Channel Bandwidth	34
2.6.6 Other Considerations	35
2.7 Conclusion	36

3 Architectures and Mechanisms for QoS Supports

3.1 Introduction	37
3.2 Typical Architectures for QoS Support	37

3.2.1 QoS Architectures for Multimedia Communication -----	38
3.2.2 Recent proposed QoS Architectures for the Internet -----	39
3.2.3 QoS Supports for End-systems and Applications -----	41
3.2.4 Proposed QoS Models for Mobile Wireless Networks -----	43
3.3 Key Control Mechanisms for QoS Support -----	45
3.3.1 Traffic Specification -----	45
3.3.2 Traffic Shaping -----	46
3.3.3 Traffic Scheduling -----	46
3.3.4 Buffer Management -----	49
3.3.5 QoS Signaling -----	51
3.3.6 Flow and Congestion Control -----	53
3.3.7 Discussion -----	55
3.4 QoS Enhanced Techniques and Mechanisms for Mobile Wireless Networks -----	55
3.4.1 Link Layer Enhanced Mechanisms -----	56
3.4.2 Medium Access Control Protocols for Wireless Networks -----	56
3.4.3 Fair Queuing Adaptation -----	59
3.4.4 Improvements for Transport Protocols over Wireless Links -----	61
3.4.5 Proxy-based Approaches -----	63
3.4.6 Other considerable Approaches -----	65
3.5 Conclusion and Discussion -----	66

4 A Proactive Model for QoS Control

4.1 Introduction -----	69
4.2 The Design Goals -----	70
4.3 The Proactive Model for QoS Control -----	72
4.3.1 Fundamental Properties of the QoS Control Mechanisms -----	72
4.3.2 Formal Presentation of the Proactive Model -----	74
4.3.2.1 Heterogeneous Network Environment -----	74
4.3.2.2 Adaptive QoS Guarantees -----	75
4.3.2.3 Description of the Proactive Model -----	76
4.3.2.4 Elements of the Proactive Model -----	77
4.3.2.5 Comparison to the Classical Control Systems -----	80
4.3.3 Performance Criteria -----	81
4.3.3.1 Protection -----	82
4.3.3.2 Fairness -----	82
4.3.3.3 Efficiency -----	84
4.3.3.4 Stability -----	84
4.3.3.5 Convergence -----	85
4.4 Estimation Techniques -----	85
4.4.1 Review of several existing Estimation Methods -----	85
4.4.2 A Novel Method for Wireless Bandwidth and Channel Estimation -----	90
4.4.2.1 Estimation of the Flow's Rate -----	90
4.4.2.2 Estimation of the Wireless Bandwidth -----	94
4.4.2.3 Estimation of the Wireless Channel States -----	95

4.4.2.4 Simulation	96
4.5 Conclusion	98
5 Applications of the Proactive Model for QoS Control Mechanisms	
5.1 Introduction	99
5.2 Case-Study: Traffic Shaping	99
5.3 Case-Study: Traffic Scheduling Mechanisms	101
5.3.1 Preliminary	101
5.3.2 Applying the Proactive Model for Scheduling Schemes	102
5.3.2.1 Estimator	104
5.3.2.2 Controller	107
5.3.2.3 Actuator	111
5.4 Enhanced Adaptive Scheduling Scheme for the Heterogeneous Environment	111
5.4.1 The Fluid Model	113
5.4.1.1 Normalized Service and Guaranteed Service Rate	113
5.4.1.2 Virtual Service Function	114
5.4.1.3 The Fluid Wireless Scheduler	115
5.4.1.4 Definition of the Fluid Wireless Scheduler	118
5.4.1.5 Properties of the Fluid Wireless Scheduler	119
5.4.2 Packetized Model	121
5.4.3 Description of the Packetized Wireless Scheduler	124
5.4.3.1 Wireless Channel and Bandwidth Estimation	124
5.4.3.2 Control Function	125
5.4.3.3 Scheduling Algorithm	126
5.4.4 Performance Analysis	127
5.4.5 Simulation	130
5.5 Case-Study: Buffer Management Mechanisms	135
5.5.1 Applying the Proactive Model	135
5.5.1.1 Estimator	136
5.5.1.2 Controller	137
5.5.1.3 Actuator	140
5.5.2 Relationship between Buffer Management, Scheduling and Flow Control	141
5.6 Case-Study: Admission Control and QoS-based Routing	143
5.7 Conclusion	144
6 Case-Study: Flow and Congestion Control	
6.1 Introduction	145
6.2 Principle of Flow and Congestion Control	146
6.3 Applying the Proactive Model for Flow and Congestion Control	147
6.3.1 Open-loop and Closed-loop Control	147
6.3.2 Estimator	150

6.3.3 Control Procedures-----	153
6.3.4 Actuator -----	156
6.4 A Generalized Version for Increase/Decrease Algorithm -----	157
6.4.1 Issues of the AIMD Algorithm-----	157
6.4.2 Exponential Increase Multiplicative Decrease Scheme (EIMD): A General Approach-----	158
6.4.3 Analysis of the EIMD Scheme -----	160
6.4.4 Discussion-----	164
6.5 TCP-friendly Rate-based Adaptive Schemes-----	165
6.5.1 TCP-friendliness -----	165
6.5.2 Existing Works on TCP-friendly Protocols -----	166
6.5.3 Rate Control Proactive Protocol (RCAP) with EIMD -----	168
6.5.3.1 Estimation Functions-----	168
6.5.3.2 Control Algorithm -----	170
6.5.3.3 Decision Function -----	172
6.5.4 Performance Simulation -----	173
6.6 Conclusion -----	178

7 Co-operative Architecture for QoS Supports

7.1 Introduction -----	179
7.2 Overview of the Co-operative Architecture -----	179
7.3 Description of the Co-operative Architecture -----	182
7.3.1 The QoS Proxy -----	182
7.3.2 The QoS Watchdog-----	183
7.3.3 Combination with the Packetized Wireless Scheduler -----	186
7.3.4 Combination with Buffer Management, User-Profile and User-Feedback -----	187
7.3.5 End-to-end QoS -----	188
7.4 Enhanced RCAP Scheme -----	189
7.4.1 Protocol Description-----	189
7.4.2 RCAP Behavior -----	191
7.4.3 Performance Metrics-----	193
7.4.4 Simulation Results -----	194
7.5 A Video Application with Scheduling, User-Profile and User-Feedback-----	195
7.5.1 Model for Experiments-----	195
7.5.2 Description of the Prototype-----	196
7.5.3 User Interface -----	197
7.5.4 User-Profile -----	198
7.5.5 User-Feedback-----	199
7.5.6 Proxy Server (QoS Server) -----	200
7.6 Conclusion -----	202

8 Summary and Outlook

8.1 Summary -----	203
-------------------	-----

8.2 Suggestion for Further Works ----- 206

Appendix

List of Tables ----- 207

List of Figures ----- 207

Abbreviations ----- 211

Notations ----- 215

References ----- 219

Index ----- 243
