

Copper Coordination Chemistry: Biochemical & Inorganic Perspectives

*A synthesis between inorganic chemistry and biology
with emphasis on chemistry, inspired by the First
SUNYA Conversation in Copper Coordination Chemistry,
June 1-4, 1982.*

Edited by

Kenneth D. Karlin

CONTENTS

Preface	v
Copper Coordination Chemistry: Biochemical and Inorganic Perspectives	
Overview	
Bioinorganic Perspectives in Copper Coordination Chemistry <i>Edward I. Solomon</i>	1
Spectroscopy, Kinetics, Structure and Redox Behavior	
EXAFS Studies of the Binuclear Copper Site of Oxy-, Deoxy- and Met-Aquo, -Fluoro, and -Azido Hemocyanin from Arthropods and Molluscs <i>Thomas G. Spiro, Geoffrey L. Wollery, James M. Brown, Linda Powers, Marjorie E. Winkler, Edward I. Solomon</i>	23
Ligand to Metal Charge-Transfer Spectra of Cu(II) Chromophores <i>Harvey J. Schugar</i>	43
Utilization of Pseudo-Tetrahedral Cu(II) Coordination Compounds to Interpret the Stereoelectronic Properties of Type I Cu(II) Centers in Metalloproteins <i>Jay R. Dorfman, Robert D. Bereman and Myung-Hwan Whangbo</i>	75
Structural Systematics of Cu(I) and Cu(II) Derivatives of Tripodal Ligands <i>Jon Zubieta, Kenneth D. Karlin and Jon C. Hayes</i>	97
Spectroscopic and Redox Trends from Model Copper Complexes <i>Anthony W. Addison</i>	109
Redox Behavior of Cu(II) Complexes of beta-Polyketonates; Two-Electron Transfer in Binuclear 1,3,5-Triketonates and Related Ligands <i>Richard L. Lintvedt</i>	129
Copper(II)-Copper(I) Outer Sphere Electron Transfer <i>John K. Yandell</i>	157
Structural Effects on Cu(II)/Cu(I) Potentials and Electron Transfer Kinetics as well as Related Physical Properties in Polythiaether and Polyaminothiaether Complexes <i>David B. Rorabacher, Michael J. Martin, Michael J. Koenigbauer, Michael Malik, Ronald R. Schroeder, John F. Endicott, Leo A. Ochrymowycz</i>	167
A Molecular Orbital Study of Thioether Coordination to Copper Ions <i>David E. Nikles, Alfred B. Anderson, Fred L. Urbach</i>	203
Photochemical and Photophysical Studies of Copper(I) Complexes <i>David R. McMillin, Roland E. Gamache, Jr., Jon R. Kirchhoff, Alan A. Del Paggio</i> ...	223
Cu(I) and Cu(II) Complexes; Ligand binding, O₂ and CO Reactivity; Catalysis	
Cu(I), Dioxygen and Catalysis <i>Andreas D. Zuberbühler</i>	237

Copper-Mediated Oxidations of Aromatic Substrates: Synthetic Models for the Tyrosinase Activities and the Role of Molecular Oxygen	
<i>Milorad M. Rogić, Michael D. Swerdloff, Timothy R. Demmin</i>	259
Homogeneous Oxidative Coupling Catalysis. Studies of the Stoichiometries and Kinetics of Oxidation of Copper(I) Complexes by Dioxygen in Aprotic Media and their Relevance to Mechanisms of Catalysis	
<i>Geoffrey Davies, Mohamed A. El-Sayed</i>	281
Copper(I)-Carbon Monoxide Chemistry: Recent Advances and Perspectives	
<i>Marco Pasquali, Carlo Floriani</i>	311
Binuclear Copper Complexes of Some Macrocyclic and Acyclic Schiff Base Ligands	
<i>S. Martin Nelson</i>	331
Synthetic Model Compounds for Type 3 Copper Proteins	
<i>Yvette Louise Agnus</i>	371
Copper(II) Chemistry in Binucleating Macrocycles	
<i>Andrea E. Martin, Stephen J. Lippard</i>	395
Copper(I) and Copper(II) Compounds with Chelating Imidazole-Containing Ligands	
<i>Paul J.M.W.L. Birker, Jan Reedijk</i>	409
Characteristics and Reactivities of Binuclear Copper(II) Complexes	
<i>Sigeo Kida, Hisashi Okawa, Yuzo Nishida</i>	425
Substrate Binding and Activation at Binuclear Copper Sites	
<i>John E. Bulkowski, William E. Summers III</i>	445
Copper(I) and Copper(II) Complexes with Xylyl Binucleating Ligands: Structures and Reactions with Dioxygen	
<i>Kenneth D. Karlin, Jon C. Hayes, Jon Zubieta</i>	457
The Chemistry of Copper(I) Complexes in Solution	
<i>Megumu Munakata, Susumu Kitagawa</i>	473
Subject Index	497
