

APPLIED FLUID DYNAMICS HANDBOOK

ROBERT D. BLEVINS

H.

Technische Hochschule Darmstadt
Fachbereich Mechanik
Bibliothek
Inv.-Nr. BM 54189

VAN NOSTRAND REINHOLD COMPANY

New York

Contents

Preface / v

1. Definitions / 1

2. Symbols / 5

3. Units / 6

4. Dimensional Analysis / 8

- 4.1 Introduction / 8
- 4.2 Boundary Geometry / 8
- 4.3 Euler Number / 10
- 4.4 Reynolds Number / 10
- 4.5 Mach Number / 11
- 4.6 Froude Number / 11
- 4.7 Weber Number / 11
- 4.8 Cavitation Number / 12
- 4.9 Richardson Number / 12
- 4.10 Rayleigh Number / 12
- 4.11 Strouhal Number / 12
- 4.12 Kolmogoroff Scales / 13
- 4.13 Application / 13
 - 4.13.1 The Π -Theorem / 13
 - 4.13.2 Example: Model Testing a Nuclear Reactor / 14
 - 4.13.3 Example: Model Testing of a Surfboard / 15

5. Conservation Equations / 19

- 5.1 Introduction / 19
- 5.2 Conservation of Mass / 19
 - 5.2.1 Equations of Conservation of Mass / 19
 - 5.2.2 Example of Conservation of Mass / 20
- 5.3 Conservation of Energy / 23
 - 5.3.1 Forms of Fluid Energy / 23
 - 5.3.2 Equations of Conservation of Energy / 23
 - 5.3.3 Examples of Conservation of Energy / 24

5.4 The Bernoulli Equations / 29

- 5.4.1 Presentation of the Equations / 29
 - 5.4.2 Example of the Bernoulli Equations / 30
- ## 5.5 Conservation of Momentum / 32
- 5.5.1 The Momentum Equations / 32
 - 5.5.2 Examples of Conservation of Momentum / 33

6. Pipe and Duct Flow / 38

- 6.1 General Considerations / 38
 - 6.1.1 General Assumptions / 38
 - 6.1.2 Principles of Pipe Flow / 38
- 6.2 Velocity Profiles for Fully Developed Pipe Flow / 39
 - 6.2.1 Inlet Length / 39
 - 6.2.2 Fully Developed Profiles / 40
- 6.3 Straight Uniform Pipes and Ducts / 42
 - 6.3.1 General Form for Incompressible Flow / 42
 - 6.3.2 Friction Factor for Laminar Flow ($Re < 2000$) / 42
 - 6.3.3 Friction Factor for Transitional Flow ($2000 < Re < 4000$) / 48
 - 6.3.4 Friction Factor for Turbulent Flow ($Re > 4000$) / 50
- 6.4 Curved Pipes and Bends / 55
 - 6.4.1 General Form / 55
 - 6.4.2 Diametrical Pressure Difference / 65
 - 6.4.3 Curved Pipes and Gradual Bends / 66
 - 6.4.4 Sharp Bends / 67
 - 6.4.5 Vanes in Sharp Bends / 67
 - 6.4.6 Interaction Between Closely Spaced Bends and Components / 70
 - 6.4.7 Force on a Bend / 70
- 6.5 Abrupt Changes in Flow Area / 71
 - 6.5.1 Entrances and Abrupt Contractions / 71
 - 6.5.2 Exits and Abrupt Expansions / 72
 - 6.5.3 Orifice Plates / 80
 - 6.5.4 Valves / 83

- 6.6 Joining and Dividing Flow / 89
 - 6.6.1 Classification of Pipe Junctions / 89
 - 6.6.2 Pipe Junctions / 89
 - 6.6.3 Manifolds / 95
 - 6.6.4 Networks / 98
- 6.7 Compressible Flow / 99
 - 6.7.1 Compressible Flow of a Perfect Gas Through Uniform Pipes and Ducts / 99
 - 6.7.2 A Technique for Adiabatic Flow Through Pipeline Components / 101
- 6.8 Two-Phase Flow / 102
 - 6.8.1 Fundamental Concepts / 102
 - 6.8.2 Liquid-Gas Two-Phase Flow / 109
 - 6.8.3 Solid-Liquid Two-Phase Flow / 112
- 6.9 Examples of Pipe Flow / 114
 - 6.9.1 Compressible Air Flow Example / 114
 - 6.9.2 Water Flow Example / 116
 - 6.9.3 Adiabatic Pipeline Flow Example / 118
- 7. Nozzles, Diffusers, and Venturis / 124**
 - 7.1 General Assumptions / 124
 - 7.2 Theoretical Nozzle Performance / 124
 - 7.2.1 General Considerations / 124
 - 7.2.2 Incompressible Nozzle Flow / 124
 - 7.2.3 Compressible Nozzle Flow / 126
 - 7.3 Nozzle Discharge Coefficient / 136
 - 7.4 Theoretical Diffuser Performance / 144
 - 7.4.1 General Considerations in Diffuser Analysis / 144
 - 7.4.2 Theoretical Aspects of Diffuser Performance / 144
 - 7.4.3 Diffuser Stall / 145
 - 7.5 Diffuser Pressure Recovery Coefficient / 147
 - 7.5.1 General Considerations / 147
 - 7.5.2 Performance of Diffusers with Free Discharge / 149
 - 7.6 Venturi Tubes / 155
 - 7.7 Examples / 158
 - 7.7.1 Nozzle Example / 158
 - 7.7.2 Diffuser Example / 160
- 8. Open Channel Flow / 164**
 - 8.1 General Considerations / 164
 - 8.2 Uniform Flow in a Uniform Channel / 165
 - 8.2.1 Pressure and Velocity Distribution / 165
 - 8.2.2 Computation of Uniform Flow / 166
 - 8.2.3 Critical Flow / 183
 - 8.3 Varied Flow / 187
 - 8.3.1 Gradually Varied Flow / 187
 - 8.3.2 Hydraulic Jump / 192
 - 8.4 Channel Structures / 201
 - 8.4.1 Weirs / 201
 - 8.4.2 Spillways / 208
 - 8.4.3 Flumes / 210
 - 8.4.4 Sluice Gates / 212
 - 8.4.5 Transitions / 214
- 8.5 Sediment Transport / 215
 - 8.5.1 Sediment Production and Properties / 215
 - 8.5.2 Initiation of Motion / 216
 - 8.5.3 Rate of Sediment Discharge / 218
 - 8.5.4 Scour Around Piers / 221
- 8.6 Example / 222
- 9. Jets, Plumes, Wakes, and Shear Layers / 229**
 - 9.1 General Assumptions / 229
 - 9.2 Submerged Jets / 229
 - 9.2.1 General Considerations / 229
 - 9.2.2 Submerged Laminar Jets ($Re < 2000$) / 231
 - 9.2.3 Submerged Turbulent Jets ($Re > 3000$) / 232
 - 9.3 Wall Jets, Impinging Jets, Jets in Coflow, Jets in Cross Flow, Jets with Swirl / 238
 - 9.3.1 Wall Jets / 238
 - 9.3.2 Jets in Coflow / 242
 - 9.3.3 Round Jets in Cross Flow / 244
 - 9.3.4 Round Jets with Swirl / 245
 - 9.4 Plumes and Buoyant Jets / 247
 - 9.4.1 General Considerations / 247
 - 9.4.2 Plume Characteristics / 249
 - 9.4.3 Turbulent Buoyant Jets in a Uniform Reservoir / 249
 - 9.4.4 Turbulent Buoyant Jets in Stratified Reservoir with Cross Flow / 252
 - 9.5 Jet Pumps and Confined Jets / 257
 - 9.5.1 Jet Pumps / 257
 - 9.5.2 Confined Jets / 260
 - 9.6 Liquid Jets in Gases and Bubble Plumes in Liquids / 262
 - 9.6.1 Liquid Jets in Gases / 262
 - 9.6.2 Bubble Plumes / 264
 - 9.7 Far Wakes / 265
 - 9.7.1 General Considerations / 265
 - 9.7.2 Laminar Wakes / 266
 - 9.7.3 Turbulent Wakes / 266
 - 9.8 Shear Layers / 268
 - 9.9 Examples / 271
 - 9.9.1 Jet Example / 271
 - 9.9.2 Plume Example / 272
- 10. Fluid Dynamic Drag / 279**
 - 10.1 General Considerations / 279
 - 10.2 Boundary Layer Drag / 279
 - 10.2.1 General Considerations / 279

- 10.2.2 Laminar Similar Solutions / 280
- 10.2.3 Approximate Methods for
Incompressible Laminar Boundary
Layers / 286
- 10.2.4 Separation and Boundary Layer
Control / 297
- 10.2.5 Laminar-Turbulent Transition / 298
- 10.2.6 Turbulent Boundary Layer / 300
- 10.2.7 Approximate Methods for Turbulent
Boundary Layers / 304
- 10.2.8 Drag of Protuberances in Turbulent
Boundary Layers / 308
- 10.3 Screens, Grillages, and Tube Bundles / 309
 - 10.3.1 Screens, Grillages, and Perforated
Plates / 309
 - 10.3.2 Tube and Rod Arrays / 327
- 10.4 Bluff Structures / 328
 - 10.4.1 General Considerations / 328
 - 10.4.2 Three Coefficients / 341
 - 10.4.3 Principles of Drag Minimization / 342
 - 10.4.4 Application to Road Vehicles / 347
- 10.5 Streamlined Structures / 350
 - 10.5.1 General Considerations / 350
 - 10.5.2 Streamlined Struts, Bodies, and
Nonlifting Airfoils / 351
 - 10.5.3 Wings, Airfoils, and Lift / 353
- 10.6 Cavitating and Surface-Piercing
Structures / 361
 - 10.6.1 Cavitation and Drag / 361
 - 10.6.2 Ventilation and Drag / 363
- 10.7 Resistance of Ships / 366
 - 10.7.1 A Method of Computing Ship
Resistance / 366
 - 10.7.2 Aspects of Skin Friction Resistance of
Ships / 369
 - 10.7.3 Aspects of Wave-Making
Resistance / 370
- 10.8 Examples / 371
 - 10.8.1 Terminal Speed of a Falling Object / 371
 - 10.8.2 Glide Slope of a Wing / 372

11. Wind and Atmospheric Processes / 382

- 11.1 Introduction / 382
- 11.2 Atmospheric Composition, Statics, and
Stability / 382
 - 11.2.1 Atmospheric Characteristics / 382
 - 11.2.2 Atmospheric Stability / 396
- 11.3 Origin of Wind and Storms / 398
 - 11.3.1 General Considerations / 398
 - 11.3.2 Geostrophic and Local Winds / 399
- 11.4 Surface Winds / 400
 - 11.4.1 General Considerations / 400
 - 11.4.2 Boundary Layer of the Earth / 404
 - 11.4.3 Extreme Winds / 408

- 11.5 Wind Pressure, Wind Forces, and Urban
Aerodynamics / 413
 - 11.5.1 General Considerations / 413
 - 11.5.2 Wind Pressure on Structures / 413
 - 11.5.3 Wind Forces on Structures / 419
 - 11.5.4 Wind Breaks and Urban
Aerodynamics / 430
- 11.6 Examples / 433
 - 11.6.1 Altimetry / 433
 - 11.6.2 Wind Force on a Lattice Tower / 438

12. Ocean Waves and Coastal Processes / 443

- 12.1 Introduction / 443
- 12.2 Waves in Deep Water and Constant Depth
Shallow Water / 443
 - 12.2.1 General Considerations / 443
 - 12.2.2 Wave Mechanics / 443
 - 12.2.3 Wind Waves and Swell / 458
 - 12.2.4 Other Wave Generation / 466
- 12.3 Waves in Basins and Shoaling Water / 467
 - 12.3.1 Shoaling Water / 467
 - 12.3.2 Reflection and Resonance / 475
 - 12.3.3 Refraction and Diffraction / 476
- 12.4 Wave Forces on Structures / 477
 - 12.4.1 General Considerations / 477
 - 12.4.2 Wave Forces on Pilings and Piers / 477
 - 12.4.3 Wave Forces on Large Cylindrical
Structures / 479
 - 12.4.4 Wave Forces on Sea Walls / 481
 - 12.4.5 Rubble Mound Breakwater / 482
- 12.5 Examples / 486
 - 12.5.1 Diffraction and Shoaling at a Beach / 486
 - 12.5.2 Wave Force on a Piling / 487

13. Porous Media, Fluid Bearings, and Fluid Seals / 493

- 13.1 Introduction / 493
- 13.2 Porous Media / 493
 - 13.2.1 General Considerations / 493
 - 13.2.2 Darcy's Law and Its Solution / 493
 - 13.2.3 Application to Fluidized Beds / 496
- 13.3 Fluid Bearings and Seals / 499
 - 13.3.1 General Considerations / 499
 - 13.3.2 Fluid Bearings / 501
 - 13.3.3 Seals / 506
- 13.4 Example: Flow Between a Rotating and a
Stationary Cylinder / 507

14. Properties of Gases and Liquids / 510

- 14.1 Introduction / 510
- 14.2 Gases / 510
 - 14.2.1 Perfect Gas Law / 510

x CONTENTS

- 14.2.2 Compressibility of Nonideal Gases / 514
- 14.2.3 Viscosity / 516
- 14.2.4 Data for Air and Other Gases at Low Pressure / 518
- 14.3 Liquids / 524

Appendix A: Navier-Stokes and Boundary Layer Equations / 529

- A.1 Navier-Stokes Equations in Two-Dimensional Flow / 529
- A.2 Navier-Stokes Equations for Axisymmetric Flow in Cylindrical Coordinates / 530
- A.3 Boundary Layer Equations / 531

Appendix B: Reynolds Stress and Turbulence Measurements / 536

- B.1 General Considerations / 536
- B.2 Measurements in Turbulent Jets / 537
- B.3 Measurements in Turbulent Wakes / 540
- B.4 Measurements in Turbulent Plane Shear Layer / 541
- B.5 Measurements in Turbulent Boundary Layers / 541
- B.6 Measurements in Turbulent Pipe Flow / 543

Appendix C: Potential Flow / 544

- C.1 General Considerations / 544
- C.2 Potential Flow Fields / 545

Index / 555
