CONTENTS

Preface	ix
Acknowledgments	xi
1 Introduction	1
1.1 Groundwater systems	1
1.2 Conceptual model	5
1.3 Hydrogeological report writing	9
2 Desk Study	11
2.1 Defining the area	12
2.2 Identifying the aquifers	12
2.3 Groundwater levels	14
2.4 Surface water	16
2.5 Recharge	16
2.6 Groundwater use	18
2.7 Groundwater chemistry	18
2.8 Aerial photographs and satellite imagery	18
2.9 Planning a fieldwork programme	20
3 Field Evaluation of Aquifers	23
3.1 Grain size analysis	23
3.2 Hydraulic properties of aquifers	25
3.3 Hydraulic properties and rock types	29
3.4 Assessing hydraulic properties	36
3.5 Using hydraulic property information	38
4 Groundwater Levels	43
4.1 Water-level dippers	43
4.2 Continuous water-level recorders	50
4.3 Measuring ground levels and locations	56
4.4 Tool-box	59
4.5 Well catalogue	61
4.6 Field surveys for wells, boreholes and springs	61
4.7 Interpretation of abstraction borehole water levels	68
4.8 Groundwater level monitoring networks	76
4.9 Groundwater level fluctuations	76
4.10 Managing groundwater level data	84

14208732

4.11	Constructing groundwater contour maps and flow nets	85
4.12	Interpretation of contour maps and flow nets	89
4.13	Using other groundwater information	92
5	Rainfall, Springs and Streams	95
5.1	Precipitation	95
5.2	Evaporation	100
5.3	Springs	102
5.4	Stream-flow measurement	105
5.5	Stage-discharge relationships	115
5.6	Choosing the best method	118
5.7	Processing flow data	118
6	Pumping Tests	121
6.1	What is a pumping test?	121
6.2	Planning a pumping test	122
6.3	Pumps and pumping	122
6.4	On-site measurements	128
6.5	Pre-test monitoring	134
6.6	Test set-up	134
6.7	Step tests	136
6.8	Constant rate tests	138
6.9	Recovery tests	139
6.10	Pumping test analysis	139
6.11	Tests on single boreholes	151
6.12	Packer tests	154
7	Groundwater Chemistry	155
7.1	Analytical suites and determinands	155
7.2	Sampling equipment	161
7.3	Sampling protocols	171
7.4	Monitoring networks	181
7.5	Using chemical data	181
8	Recharge Estimation	181
8.1	Water balance	181
8.2	Rainfall recharge	181
8.3	Induced recharge	191
8.4	Other sources of recharge	191
9	Specialist Techniques	191
9.1	Borehole and piezometer installation	191
9.2	Down-hole geophysics	201

9.3	Using artificial tracers	
10	Practical Applications	
10.1	Developing a conceptual model	
10.2	Groundwater supplies	
10.3	Contamination investigations	
10.4	Groundwater lowering	
10.5	Rising water tables	
10.6	Investigating wetland hydrology	
10.7	Groundwater modelling	
	Appendix I Good working practice	
I.1	Safety codes	
I.2	Safety clothing and equipment	
I.3	Distress signals	
I.4	Exposure or hypothermia	
I.5	Heat exhaustion	
I.6	Working near wells, boreholes and monitoring piezometers	
I.7	Hygiene precautions for water supplies	
I.8	Trial pits	
I.9	Electrical equipment	
I.10	Filling fuel tanks	
I.11	Waste disposal sites	
I.12	Stream flow measurement	
	Appendix II Conversion factors	
	References
