

# **Sustainable Transformations of Water Supply Regimes**

## **The Cuvelai-Etосha Basin in Central Northern Namibia**

**Dem Fachbereich Bauingenieurwesen und Geodäsie  
der Technischen Universität Darmstadt  
vorgelegte**

**Dissertation**

**zur Erlangung des akademischen Grades des  
Doktors der Ingenieurwissenschaften (Dr.-Ing.)**

**von  
Martin Song-il Zimmermann  
Diplom-Wirtschaftsingenieur  
geboren in Duisburg**

**München im August 2013  
D17**

|  |           |
|--|-----------|
| PREFACE.....   | III       |
| ABSTRACT .....   | V         |
| ZUSAMMENFASSUNG.....   | VII       |
| TABLE OF CONTENTS.....   | IX        |
| LIST OF FIGURES.....   | XII       |
| LIST OF TABLES.....  | XVII      |
| LIST OF ABBREVIATIONS AND SYMBOLS.....   | XIX       |
| <b>1 INTRODUCTION.....</b>   | <b>1</b>  |
| 1.1 THE CUVELAI-ETOSHA BASIN IN CENTRAL NORTHERN NAMIBIA.....                  | 3         |
| 1.2 RESEARCH DESIGN.....   | 10        |
| <b>2 THEORETICAL FRAMEWORK.....</b>  | <b>14</b> |
| 2.1 SYSTEMS, CYBERNETICS, AND BEYOND.....                                      | 14        |
| 2.2 SOCIO-TECHNICAL REGIMES AND REGIME TRANSFORMATIONS .....                   | 19        |
| <b>3 MODEL BUILDING.....</b>   | <b>24</b> |
| 3.1 GROUNDED THEORY .....  | 24        |
| 3.2 IDENTIFICATION OF SYSTEM VARIABLES .....                                   | 28        |
| 3.3 SYSTEM VARIABLES OF THE TECHNOLOGICAL DIMENSION.....                       | 34        |
| 3.3.1 <i>Large-scale water supply</i> .....                                    | 35        |
| 3.3.2 <i>Technical problems with the large-scale water supply system</i> ..... | 37        |
| 3.3.3 <i>Oshanas and excavation dams (Omatale)</i> .....                       | 39        |
| 3.3.4 <i>Shallow dug wells (Omuthima)</i> .....                                | 44        |
| 3.3.5 <i>Groundwater and dug wells (Oshikweyo)</i> .....                       | 45        |
| 3.3.6 <i>Rainwater harvesting</i> .....  | 49        |
| 3.3.7 <i>Other water supply techniques</i> .....                               | 54        |
| 3.3.8 <i>Sanitation problems</i> .....   | 55        |
| <b>4 SYSTEMS ANALYSIS AND SIMULATION.....</b>                                  | <b>61</b> |
| 4.1 SENSITIVITY MODEL .....  | 61        |
| 4.1.1 <i>Approach</i> .....  | 61        |
| 4.1.2 <i>Results and discussion</i> .....                                      | 65        |
| 4.2 HETEROGENEITY OF INTERDEPENDENCIES.....                                    | 71        |
| 4.2.1 <i>Approach</i> .....  | 71        |
| 4.2.2 <i>Results and discussion</i> .....                                      | 74        |

|         |   |     |
|---------|---|-----|
| 4.3     | FEEDBACK LOOPS.....   | 79  |
| 4.3.1   | <i>Approach</i> .....   | 79  |
| 4.3.2   | <i>Results and discussion</i> .....                                   | 80  |
| 4.3.2.1 | Water-related feedback loops.....                                     | 84  |
| 4.3.2.2 | Non-water-related feedback loops.....                                 | 95  |
| 4.4     | CAUSE-EFFECT CHAINS.....  | 99  |
| 4.4.1   | <i>Approach</i> .....   | 99  |
| 4.4.2   | <i>Results and discussion</i> .....                                   | 99  |
| 4.4.2.1 | Effects trees of systemic sources.....                                | 100 |
| 4.4.2.2 | Causes trees of systemic sinks .....                                  | 105 |
| 4.5     | SIMULATION OF SCENARIOS .....   | 110 |
| 4.5.1   | <i>Approach</i> .....   | 110 |
| 4.5.2   | <i>Results and discussion</i> .....                                   | 111 |
| 4.5.2.1 | Baseline scenario.....  | 111 |
| 4.5.2.2 | Water supply scenarios.....   | 114 |
| 4.5.2.3 | Scenarios of selected key variables.....                              | 121 |
| 5       | ASSESSMENT AND INTERPRETATION.....                                    | 124 |
| 5.1     | APPROACH.....   | 124 |
| 5.1.1   | <i>Hazards and risks</i> .....  | 124 |
| 5.1.2   | <i>Regulation and transformation</i> .....                            | 126 |
| 5.1.3   | <i>Perceptions and power</i> .....                                    | 127 |
| 5.2     | POTENTIAL REGULATORS .....  | 128 |
| 5.2.1   | <i>Large-scale water supply</i> .....                                 | 128 |
| 5.2.2   | <i>Oshanas and excavation dams (Omatale)</i> .....                    | 130 |
| 5.2.3   | <i>Groundwater and dug wells (Oshikweyo)</i> .....                    | 131 |
| 5.2.4   | <i>Rainwater harvesting</i> .....                                     | 133 |
| 5.2.5   | <i>Low level of education and understanding of water issues</i> ..... | 134 |
| 5.3     | SYSTEMIC HAZARDS.....   | 134 |
| 5.3.1   | <i>Traditional livestock farming</i> .....                            | 134 |
| 5.3.2   | <i>Subsistence and poverty</i> .....                                  | 135 |
| 5.3.3   | <i>Urbanisation</i> .....   | 136 |
| 5.3.4   | <i>Governance and management problems</i> .....                       | 137 |
| 5.3.5   | <i>Scarcity of water resources</i> .....                              | 138 |
| 5.3.6   | <i>Angolan water demand</i> .....                                     | 138 |
| 5.3.7   | <i>Floods, droughts, and climate change</i> .....                     | 138 |
| 5.3.8   | <i>Population growth and migration</i> .....                          | 139 |
| 5.4     | VIABILITY INDICATORS .....  | 139 |
| 5.4.1   | <i>Security of water supply</i> .....                                 | 139 |
| 5.4.2   | <i>Health</i> .....   | 140 |

|       |  |     |
|-------|--|-----|
| 5.4.3 | <i>Disparities and exclusion</i>                                   | 140 |
| 5.4.4 | <i>Weak regional economy</i>                                       | 140 |
| 5.4.5 | <i>Technical problems with the large-scale water supply system</i> | 141 |
| 6     | <b>CONCLUSIONS</b>   | 143 |
|       | <b>LIST OF REFERENCES</b>  | 150 |
|       | <b>APPENDIX</b>  | 163 |
