Contents

Preface	ix
R. C. Bose, List of Publications	xiii
1. Some classical and modern topics in finite geometrical structures, A. Barlotti	1
2. Balanced hypergraphs and some applications to graph theory, C. Berge	15
3. A strongly regular graph derived from the perfect ternary Golay code, E. R. Berlekamp, J. H. van Lint and J. J. Seidel	25
4. Characterization problems of combinatorial graph theory, R. C. Bose	31
5. Line-minimal graphs with cyclic group, I. Z. Bouwer and R. Frucht	53
6. Circle geometry in higher dimensions, R. H. Bruck	69
7. Bose as teacher—The early years, K. A. Bush	79
8. Construction of symmetric Hadamard matrices, K. A. Bush	81
9. Cayley diagrams and regular complex polygons, H. S. M. Coxeter	85
10. Combinatorial problems in finite Abelian groups, G. T. Diderrich and H. B. Mann	95
11. A p -analog of the partition lattice, T. A. Dowling	101
12. Problems and results on combinatorial number theory, P. Erdős	117
13. Dissection graphs of planar point sets, P. Erdős, L. Lovász, A. Simmons and E. G. Strauss	139
14. Some combinatorial problems and results in fractional replication, W. T. Federer, U. B. Paik, B. L. Raktue and L. H. Werner	151
15. The Bose-Nelson sorting problem, R. W. Floyd and D. E. Knuth	163
16. Nombres d'Euler et permutations alternantes, D. Foata and M. P. Schützenberger	173
17. Some combinatorial aspects of coding theory, J. M. Goethals	189
18. Some augmentations of Bose-Chaudhuri error correcting codes, A. J. Gross	209

19. On order statistics and some applications of combinatorial methods in statistics, S. S. Gupta and S. Panchapakesan	217
20. Construction of block designs, M. Hall, Jr.	251
21. A survey of graphical enumeration problems, F. Harary and E. M. Palmer	259
22. On spectrally bounded graphs, A. J. Hoffman	277
23. Combinatorial search problems, G. O. H. Katona	285
24. Some problems in combinatorial geometry, D. Kelly and G.-C. Rota	309
25. Recent developments in India in the construction of confounded asymmetrical factorial designs, K. Kishen and B. N. Tyagi	313
26. Combinatorial problems in communication networks, B. P. Lientz	323
27. On Hadamard difference sets, H. B. Mann and R. L. Macfarland	333
28. On the randomization of block designs, J. Ogawa and S. Ikeda	335
29. Some combinatorial problems of arrays and applications to design of experiments, C. R. Rao	349
30. The existence of resolvable block designs, D. K. Ray-Chaudhuri and R. M. Wilson	361
31. Variants of (v, k, λ) -designs, H. J. Ryser	377
32. Coding need: a system's concept, F. D. Schmandt	385
33. On the problem of construction and uniqueness of saturated 2_R^{K-p} designs, E. Seiden	397
34. Strongly regular graphs and symmetric 3-designs, S. S. Shrikhande	403
35. Balanced arrays and orthogonal arrays, J. N. Srivastava and D. V. Chopra	411
36. On software validation, R. B. Stillman and N. J. Stillman	429
37. The enumerative theory of planar maps, W. T. Tutte	437
38. A construction for Room squares, W. D. Wallis	449
