Contents

PART I PERSPECTIVES FROM PRIMATE BEHAVIOR AND NEUROBIOLOGY

Chapter 1

Can Single Processes Explain Effects of Postnatal Influences on Primate Development? 3

Gene P. Sackett

Introduction	3
The Nongenerality of Isolation Rearing Effects	5
Effects of the Fetus on Its Mother	8
Conclusions	11
Abstract	11
References	11

Chapter 2

Infant Monkeys' Achievement of Temporal Coherence with Their Social Group 13

Clare F. Haynes, Ted D. Wade, and Thomas Z. Cassell

Introduction	13
The Research Problem	13
A Primate Model	15
The Social Group as an Organized Population	15
Method	16
The Group and Its Environment	16
Observational Protocol	17

Scoring of Adult Behaviors and Group State	17
Scoring of Infant Behaviors and Infant Scales	17
Results	19
Adult Group States	19
Infant Behavior Scales	21
Discussion	23
Temporal Coordination of Adult Behaviors	23
Group State Patterns	23
Infant's Achievement of Temporal Coherence with Adult Group State	25
Research on Temporal Adaptation	27
Dyads, Subgroups, and the Overall Social Group	27
Abstract	28
References	28

Chapter 3

Animal Models of Human Behavior: Their Application to the Study of Attachment 31

Linda S. Crnic, Martin L. Reite, and David W. Shucard

Are Animal Models of Attachment Necessary?	31
What Are Animal Models? A Paradox	32
Animal Models versus Animal Systems	32
Homology versus Nonhomology	33
Advantages of Animal Models	34
Risks of Animal Models	34
Minimizing the Risks	35
Animal Models Are Part of an Interactive System of Research	35
An Example of the Use of Animal Models: Attachment	36
Definition	36
Identification of Appropriate Species	37
Identification of Possible Neurobiological Mechanisms	38
Conclusions	39
Abstract	40
References	40

Chapter 4

Animal Models in Developmental Psychobiology 43

I. Charles Kaufman

Abstract	45
References	45

Chapter 5

The Timing of Hormone Signals in the Orchestration of Brain Development	47
--	-----------

Paola S. Timiras

Introduction	47
Critical Periods: Vulnerability and Nurture	50
Effects of Sex Hormones	51
Effects of Thyroid Hormones	55
Timing Signals for Regulation of Growth, Development, and Aging	59
Abstract	59
References	60

Chapter 6

Epigenetic Factors in Neuronal Differentiation: A Review of Recent Research	65
--	-----------

Antonia Vernadakis

Introduction	65
Role of Microenvironment on Neural Differentiation	66
Hormones as Epigenetic Growth Factors	68
Neurohumor Substances as Growth Factors	69
Glial Factors in Neuronal Growth	70
Conclusions	71
Abstract	71
References	72

Chapter 7

The Role of Hormones in Mother–Infant Transactions	75
---	-----------

Katherine Tennes

Introduction	75
Animal Models	75

The Corticosteroid Response to Brief Separations	76
Cortisol and the Infant's Distress	76
Cortisol and the Mother-Infant Relationship	78
Conclusion	79
Abstract	79
References	79

PART II PERSPECTIVES FROM HUMAN STUDIES

Chapter 8

Parent-to-Infant Attachment: A Critique of the Early "Bonding" Model	83
---	-----------

Marilyn J. Svejda, Betty Jean Pannabecker, and Robert N. Emde

Introduction	83
Mother-to-Infant Attachment	84
A Review of Maternal Bonding Research	84
Early Contact Fails to Generalize	86
Shortcomings of the Bonding Model	87
Father-to-Infant Attachment	89
Caregiving of the Father	89
A Test of Father Bonding	90
Conclusion	91
Bonding Model No Longer Useful	91
Abstract	92
References	92

Chapter 9

Silver Nitrate and the Eyes of the Newborn: Effects on Parental Responsiveness during Initial Social Interaction	95
---	-----------

Perry M. Butterfield, Robert N. Emde, Marilyn Svejda, and Sandy Naiman

The First Study	96
The Second Study	99
Discussion	104
Abstract	106
References	106

*Chapter 10***Effect of Gender and Caretaking Role on Parent–Infant Interaction 109***Michael E. Lamb, Ann M. Frodi, Carl-Philip Hwang, Majt Frodi, and Jamie Steinberg***Attitudes and Behavior of Traditional and Nontraditional Parents in Sweden 109**

Introduction 109

Method 111

Results 113

Discussion 115

Abstract 117

References 118

*Chapter 11***An Investigation of Change in the Infant–Caregiver System over the First Week of Life 119***Louis W. Sander, Patricia F. Chappell, and Patricia A. Snyder*

Conceptual Background 119

Methods of Data Collection 123

The Bassinet Monitor 123

Observation and Recording of Caregiver–Infant Interaction . . . 124

Results 125

Bassinet Monitor 125

Observation and Recording of Caregiver–Infant Interaction . . . 130

Discussion 132

Abstract 135

References 136

*Chapter 12***Biological Aspects of the Mother–Infant Bond 137***Melvin Konner***Consequences of Frequent Infant Nursing: A View of the Maternal Side of the Bond 138**

Foundations of Infant Social Behavior in Neurobehavioral Growth	142
The Growth of Social Smiling	145
The Growth of the Social Fears	149
Conclusion	153

Implications of the Present Definition of Temperament	178
The Relationship between Temperament and Manifest Behavior	178
Temperament and Personality	179
Contemporary Function of Temperament	179
Cross-situational Generality of Temperament	180
Origins of Temperament	180
Temperament and Affect	180
Measurement Implications of the Present Conceptualization of Temperament	182
Unresolved Issues	184
Temperament and Attachment	185
Temperament and Social Interaction: An Overview	185
Possible Relationships between the Development of Temperament and Attachment	185
Future Directions for the Study of Temperament	188
Abstract	189
References	189

*Chapter 14***Parent–Infant Interaction, Attachment, and Socioemotional Development in Infancy 195***Michael E. Lamb*

Introduction	195
The Development of Parent–Infant Attachments	196
To Whom Do Attachments Form?	197
Sex Differences	198
Individual Differences in Parent–Infant Attachments	199
Interpreting Strange Situation Behavior	202
Individual Differences in Strange Situation Behavior	203
A Research Agenda	205
Predictive Validity of Security of Attachment	206
Future Research Issues	207
Conclusion	208
Abstract	208
References	209

*Chapter 15***A Structural Modeling Approach to the Study of Attachment and Strange Situation Behaviors 213***J. P. Connell and H. Hill Goldsmith*

Overview	213
Previous Attachment Research: Concepts and Methodology	214
Overview	214
Attachment as an Organizational Construct	214
The Strange Situation Paradigm	215
The ABC Typology	216
Problems in Attachment Research Using the ABC Typology	216
How Well Does the ABC System Account for Individual Differences in Strange Situation Behaviors	216
The Issue of Stability of Patterns of Attachment Behaviors	217
The Issue of Predictive Validity of Patterns of Attachment Behaviors	218
The Limitations of Typologies as Related to the ABC System	219
The Structural Modeling Approach to the Study of Strange Situation Behaviors	221

Differences between the Structural Modeling Approach and the Traditional Approach 221

Substantive Applications of the Structural Modeling Approach 222

Comparison of Models in Different Contexts and in Different Groups of Subjects 228

Summary and Evaluation of the Structural Modeling Approach . . . 231

 Suggested Applications 231

 Disadvantages of the Approach 232

Conclusion 233

Appendix 234

 Confirmatory Factor Analysis 234

 Path Analysis of Functional Relationships Among Latent Variables 237

 Analysis of Latent Variable Means 240

Abstract 241

References 242

Chapter 16

Infants' Differential Social Response to Mother and Experimenter: Relationships to Maternal Characteristics and Quality of Infant Play 245

George A. Morgan, Nancy A. Busch-Rossnagel, Rex E. Culp, Annette K. Vance, and Janet J. Fritz

Introduction 245

 Overview 245

 Strange Situation Studies 246

 Reactions to Stranger and Mother, Attachment and Competence 247

 Studies of Maternal Characteristics 248

Method 249

 Subjects 249

 Procedure 249

 Differential Social Response to Experimenter and Mother . . . 250

 Maternal Characteristics 251

 Quality of Infant Play 252

Results 252

 Patterns of Infant Reaction to Experimenter and Mother 252

 Maternal Characteristics and Infant's Differential Response . . . 253

Quality of Play, Differential Response, and Maternal Characteristics	255
Discussion	256
Differential Social Response as a Useful Way of Grouping Infants	256
Attachment and Differential Social Response	256
Maternal and Demographic Factors	258
Differential Response as an Intervening Variable	259
Infant Effects	259
Future Research Directions	259
Abstract	260
References	260

Chapter 17

Attachment Behavior in Abused/Neglected and Premature Infants: Implications for the Concept of Attachment	263
--	------------

Theodore J. Gaensbauer and Robert J. Harmon

Validity of Ainsworth's Concepts of Secure versus Insecure Attachment	265
The Strong Predisposition of Infants To Show Attachment Behavior	268
The Specificity of Attachment Behavior	269
Stability of Attachment: Attachment Behavior as Reflecting Recent Caretaking Experiences Rather Than Past Experiences	272
The Role of Pleasurable Interaction in Facilitating Attachment Behavior	274
Attachment Behavior Must Be Seen in Developmental Perspective	275
Conclusion	276
Abstract	277
References	278

Chapter 18

Maternal Referencing in Normal and Down's Syndrome Infants: A Longitudinal Analysis	281
--	------------

James F. Sorce, Robert N. Emde, and Mark Frank

Methods	283
Subjects	283
Procedure	284
Results	285
Presence of Maternal Referencing	285
Visual Fixation Patterns	286
Emotional Behaviors Accompanying Referencing	287
Emotional State Baseline	288
Discussion	289
Abstract	291
References	291
