

Pharmaceutical residues in urine and potential risks related to usage as fertiliser in agriculture

Vom Promotionsausschuss der
Technischen Universität Hamburg-Harburg
zur Erlangung des akademischen Grades

Doktor-Ingenieurin

genehmigte Dissertation

von

Martina Winker

aus
Stuttgart

2009

Table of Contents

List of Tables	4
List of Figures	6
List of Abbreviations	10
Indices	12
1 Introduction.....	13
2 Materials and methods	16
2.1 Screening via database.....	16
2.1.1 Database (DB).....	16
2.1.2 Revised literature.....	18
2.2 Mode of entry into database.....	19
2.2.1 Amounts of substances consumed.....	19
2.2.2 Pharmacokinetic data	21
2.2.3 Veterinary pharmaceuticals	24
2.2.4 Ecotoxicological data.....	24
2.2.5 Sorption and biodegradation data.....	26
2.3 Analysis of database	28
2.3.1 Calculation of pharmaceutical concentrations in urine.....	28
2.3.2 Calculation of mean concentrations of pharmaceuticals in environmental compartments	31
2.3.3 Are pharmaceutical concentrations applied to plants in other investigations relevant for fertilisation with AGU?.....	32
2.4 Plant experiments	33
2.4.1 Selection of pharmaceuticals.....	33
2.4.2 Preparation of spiked urine.....	33
2.4.3 Application of pharmaceuticals	35
2.4.4 Final harvest and sample preparation	36
2.4.5 Analytical determination of pharmaceuticals	36
2.4.6 Statistical evaluation of experimental results.....	38
3 Results & Discussion.....	39
3.1 General overview of pharmaceuticals in DB datasets	39
3.2 Detailed overview of pharmaceuticals in <i>Wastewater</i> and <i>Water</i>	41
3.3 Pharmaceuticals in urine	46
3.3.1 Predicted concentrations of pharmaceuticals in urine	46
3.3.2 Comparison of calculated with measured renal concentrations.....	48
3.3.3 Comparison to pharmaceutical concentrations in yellowwater derived from literature	51
3.4 Comparison of pharmaceutical concentrations in urine and raw municipal wastewater	54
3.4.1 Predicted excreted amounts of pharmaceuticals in urine and faeces...54	
3.4.2 Pharmaceutical concentrations in urine versus raw municipal wastewater	59
3.5 Pharmaceuticals in soil	62
3.5.1 Pharmaceutical concentrations in soil	64

3.5.2	Presence of pharmaceuticals in groundwater.....	66
3.5.3	Processes pharmaceuticals undergo in soil	69
3.5.4	Pharmaceutical concentrations in soil determined during pot experiments.....	77
3.6	Pharmaceuticals in plants	79
3.6.1	Uptake into plants.....	80
3.6.2	Phytotoxicological aspects	84
3.6.3	Risk determination for plants by database results	86
3.6.4	Behaviour of rye grass during pot experiments towards pharmaceuticals	89
3.7	Extended discussion	93
3.7.1	Ecotoxicological potential	93
3.7.2	Modelling approach	96
3.7.3	Social considerations.....	98
4	Conclusion.....	99
