

The Limits to Rational Expectations

M. Hashem Pesaran

Basil Blackwell

Contents

	Preface	ix
1	Introduction: Aims and Scopes	1
	Part I Methodological Issues	
2	Uncertainty and the Process of Expectations Formation	11
	2.1 The Source and Nature of Uncertainty	11
	2.2 Process of Expectations Formation	14
	2.3 The Adaptive Expectations Hypothesis	17
	2.4 Optimality of the Adaptive Expectations Hypotheses	19
	2.5 The Rational Expectations Hypothesis	21
	2.6 'As If' Principle and the Optimality of the REH	23
	2.7 Optimal Properties of the REH	24
	Example 2.1 A Simple Neoclassical Model (True Model Known)	26
	Example 2.2 Inflation-augmented Phillips Curve (True Model Not Known)	29
	2.8 Concluding Remarks	31
3	The Process of Learning and the Rational Expectations Hypothesis	32
	3.1 Introduction	32
	3.2 Rational Learning Models	34
	3.3 Boundedly Rational Learning Models	35
	3.4 Learning in a Cobweb Model	36
	3.5 Cost of Information Acquisition and the REH	42
	3.6 Costly Information and Existence of Informationally Efficient Markets	45
	3.7 Concluding Remarks	46
4	Heterogeneous Information and the Rational Expectations Hypothesis	49
	4.1 The Neoclassical Research Programme and the REH	49
	4.2 Profit Maximization under Uncertainty	50

4.3	Profit Maximization under Adjustment Costs	63
4.4	Concluding Remarks	70
Part II Econometric Considerations		
5	Solution of Linear Rational Expectations Models	75
5.1	Introduction	75
5.2	Solution of LRE Models with Current Expectations	77
	Example 5.1 Lucas's Surprise Supply Function	86
5.3	Solution of LRE Models with Future Expectations	88
	Example 5.2 Taylor's Macroeconomic Model	103
	Example 5.3 An Extension of Muth's Model of Inventory Speculation	112
5.4	Concluding Remarks	117
6	Identification of Linear Rational Expectations Models	119
6.1	Introduction	119
6.2	Identification: Basic Concepts	121
	A: Single-equation Models	122
6.3	Identification of Single-equation RE Models with Current Expectations	122
	Example 6.1 Identification of the Lucas Aggregate Supply Function	128
	Example 6.2 Identification of Models with Lagged Unanticipated Effects	130
6.4	Identification of Single-equation RE Models with Forward-looking Expectations	133
	Example 6.3 The Efficient Market Hypothesis	138
	B: Simultaneous Equation Models	146
6.5	Identification of Simultaneous RE Models with Current Expectations	146
	Example 6.4 Identification of Taylor's Macroeconomic Model of the US Economy	154
6.6	Identification of Simultaneous RE Models with Forward-looking Expectations	156
6.7	Concluding Remarks	160
7	Estimation and Hypothesis Testing in Rational Expectations Models	162
7.1	Introduction	162
	A: Models with Current and Lagged Expectations	164
7.2	The Basic Model	164
7.3	RE Models with Current Unanticipated Effects	170
7.4	RE Models with Current and Lagged Unanticipated Effects	172

7.5	Cross-equation Tests of Rationality and Policy Neutrality	179
B: Models with Future Expectations		183
7.6	Models of Exchange Rate Determination	183
7.7	Models with Future Expectations of the Endogenous Variable	190
Example 7.1		192
Example 7.2	A Target-seeking Decision Problem under Adjustment Costs	199
7.8	Concluding Remarks	203
Part III Use of Direct Observations on Expectations		
8	Measurement of Expectations and Direct Tests of the REH	207
8.1	Introduction	207
8.2	Measurement of Expectations	208
8.3	Methods of Quantification of Ordinal Responses	211
Example 8.1	The Uniform Distribution	214
Example 8.2	The Normal Distribution	217
Example 8.3	The Logistic Distribution	219
8.4	Alternative Measures of Inflation Expectations in British Manufacturing	224
8.5	Measurement Errors in Expectations	233
8.6	Direct Tests of the Rationality of Inflation Expectations	236
8.7	Concluding Remarks	242
9	Models of Expectations Formation under Bounded Rationality	245
9.1	Introduction	245
9.2	Extrapolative/Adaptive Models of Expectations Formation	246
9.3	Augmented Error-learning Models of Expectations Formation	252
9.4	Models of Inflation Expectations in British Manufacturing	257
9.5	Concluding Remarks	269
10	Conclusions	270
Appendices		
A	Conditional Expectations and Martingales: General Properties	273
A.1	Conditional Expectations	273
A.2	Properties of Conditional Expectations	274
A.3	Martingales	275

B	Solution of Linear Rational Expectations Models under Heterogeneous Information	276
B.1	Introduction	276
B.2	Solution by the Method of Infinite Regress	277
Example B.1		279
Example B.2		280
C	Solution of Rational Expectations Models with Future Expectations by the Martingale Method	282
C.1	The Univariate Case	282
C.2	The Multivariate Case	284
D	Derivation of Present Value of Prospective Yields under the Rational Expectations Hypothesis	291
	Data Appendix	296
	References	305
	Index of Subjects	317
	Index of Authors	323
