# Contents

	<b>Preface</b>	<b>v</b>
<b>1</b>	<b>Overview</b>	<b>1</b>
1.1	Historical notes	1
1.2	The Oberon user interface	4
1.3	The Oberon system architecture	7
1.4	Summary of innovations	11
1.5	System version, implementations and applications	13
	<b>Part I User's guide</b>	
<b>2</b>	<b>The Oberon user interface and the standard system editor</b>	<b>17</b>
2.1	Tiled display	19
2.2	The mouse and its use	20
2.3	The keyboard	26
2.4	The viewer	27
2.5	Commands	34
2.6	Tool viewers	37
2.7	Naming	42
2.8	Design for user satisfaction	43
<b>3</b>	<b>Using the standard editor</b>	<b>46</b>
3.1	Mouse and keyboard	47
3.2	Multiple views and the large selection	48
3.3	Closing viewers and saving to disk	49
3.4	Command module Edit	51
<b>4</b>	<b>File administration and system commands</b>	<b>53</b>
4.1	Commands dealing with files and the file directory	53
4.2	Other commands exported by command module System	55

<b>5</b>	<b>Using the Oberon compiler</b>	<b>59</b>
5.1	Compiler commands and messages	59
5.2	Debugging	60
<b>6</b>	<b>Using diskettes</b>	<b>63</b>
6.1	Commands dealing with diskettes	64
<b>7</b>	<b>Using network and servers</b>	<b>66</b>
7.1	Naming conventions	67
7.2	Command module Net	68
<b>8</b>	<b>Command module Miscellaneous</b>	<b>73</b>

## Part II Reference

<b>9</b>	<b>System overview</b>	<b>77</b>
9.1	Programs in the traditional sense	78
9.2	Oberon commands, module loading	79
9.3	The event loop	80
9.4	System architecture for up-calls: active objects	82
9.5	The module hierarchy	87
9.6	Guide to the notation used to describe the modules of the outer core	89
<b>10</b>	<b>Keyboard, mouse, network and printer</b>	<b>90</b>
10.1	Module Input	91
10.2	Module V24	92
10.3	Module SCC	93
10.4	Module Printer	95
<b>11</b>	<b>Module Files</b>	<b>98</b>
11.1	Files and the file directory	99
11.2	Read/write access: the rider	104
<b>12</b>	<b>Module Display</b>	<b>107</b>
12.1	Bitmapped display, the display area	108
12.2	Raster operations	111
12.3	Display control	116
12.4	The definition of Frame, FrameMsg and Handler	118
<b>13</b>	<b>Module Viewers</b>	<b>120</b>
13.1	The logical display	121
13.2	The viewer	124

13.3	Viewer messages	125
13.4	Tracks	128
13.5	The viewer manager	129
13.6	The viewer data structure	133
<b>14</b>	<b>Module Texts</b>	<b>135</b>
14.1	Module Fonts	138
14.2	Text and buffer	139
14.3	Reading from texts, writing to buffers	143
14.4	Text files	151
<b>15</b>	<b>Module Oberon</b>	<b>154</b>
15.1	Tasks and the event loop	157
15.2	Cursors	163
15.3	Command activation	165
15.4	Focus, mark and selection	166
15.5	Display management	169
15.6	Miscellaneous procedures	170
15.7	Exported system-wide resources	172
<b>16</b>	<b>Module MenuViewers</b>	<b>174</b>
16.1	The menu viewer	175
16.2	The modify message	177
16.3	The handler	180
<b>17</b>	<b>Module TextFrames</b>	<b>183</b>
17.1	The frame	185
17.2	The display manager	191
17.3	The handler and its components	195
17.4	Facilities dealing with texts	197
17.5	Opening and creating frames	199

## Part III Programming guide

<b>18</b>	<b>Programming commands</b>	<b>203</b>
18.1	General programming rules	204
18.2	Modules and commands	206
18.3	Working with texts	207
18.4	Accessing parameters	213
18.5	Working with text viewers	218
18.6	Working with text frames	225
18.7	Working with files	227
18.8	Long running commands, background tasks	237
18.9	Rules for well-behaved commands	242

<b>19</b>	<b>Programming viewers and frames</b>	<b>244</b>
19.1	The design of a viewer class	246
19.2	Working with the display	254
19.3	Handler for a viewer	264
19.4	Handler for a frame to be installed in a menu viewer	268
19.5	Handling mouse events, the track message	277
19.6	Example: handler for a text frame	283
19.7	Rules for well-behaved handlers	291
<b>Appendix A</b>	<b>Viewer class note board: an extended example</b>	<b>293</b>
A.1	Introduction	293
A.2	Module Boards	295
A.3	Module BoardFrames	300
A.4	Module PostIt (command module)	321
<b>Appendix B</b>	<b>Keyboard and ASCII characters</b>	<b>324</b>
<b>Appendix C</b>	<b>MS/DOS files</b>	<b>329</b>
	<b>Bibliography</b>	<b>331</b>
	<b>Glossary</b>	<b>333</b>
	<b>Index</b>	<b>339</b>
