IPN 154

Contents

In Commemoration of Professor Heinrich Stork	9
<i>James J. Gallagher, Günther Harsch</i> Scientific Literacy: Science Education and Secondary School Students A Report of an International Symposium	13
<i>Heinrich Stork</i> Welcoming Remark	35
<i>Rodger W. Bybee</i> Toward an Understanding of Scientific Literacy	37
<i>George E. DeBoer</i> Historical Perspectives on Scientific Literacy	69
<i>Jürgen Oelkers</i> How to Define and Justify Scientific Literacy for Everyone	87
<i>Robert H. Evans</i> A Challenge to the Science Education Community: Morris H. Shamos' <i>The Myth of Scientific Literacy</i>	103
<i>Jon D. Miller</i> Civic Scientific Literacy in the United States: A Developmental Analysis from Middle-school through Adulthood	121
<i>Herbert J. Walberg, Susan Paik</i> Scientific Literacy as an International Concern	143
<i>Jürgen Baumert</i> Scientific Literacy – A German Perspective	167
<i>Thomas R. Koballa</i> Imparting Values Through Science Education: Some General Considerations	181

<i>Volker Scharf, Martin Gröger</i> Regarding Chemical Education: What Implies the Goal to Help Learners Becoming Responsible Citizens?	195
<i>Reinhard Demuth</i> How Can Chemistry Education Foster the Students' Ability to Judge? Environmental Analysis in School-Projects: A Report on Mistakes	209
<i>Peter Buck</i> About Pitfalls on the Road to Scientific Literacy – or: Barking at Cows and Samples of Epistemic Teaching	217
<i>James D. Herron</i> Before Repairing Potholes, Understand Their Causes	247
<i>Sylvia Ware</i> Science for All: Implications in the Chemistry Classroom	257
<i>John Holman</i> The National Curriculum: A Golden Opportunity for Scientific Literacy?	275
<i>W. G. Burton, J. S. Holman, G. M. Pilling, D. J. Waddington</i> The Salters Advanced Chemistry Project: The First 8 Years	287
<i>John M. Ramsey</i> STS Issue Instruction: Meeting the Goal of Social Responsibility in a Context of Scientific Literacy	305
<i>Olaf Köller</i> Evaluation of STS Approaches – A Psychological Perspective	331
<i>Elke Sumfleth, Anja Pitton</i> Learning Chemistry Today – Examples Related to Different Groups of Learners	349
<i>Hans-Dieter Barke</i> The Structure-Oriented Approach Demonstrated by Interdisciplinary Teaching Spatial Abilities	377

<i>Heinz Schmidkunz</i> Gestalt Theory within Chemistry Education	391
<i>Wolfgang Bündler</i> Practising Integration in Basic Science Education: PING	399
<i>Günther Harsch, Rebekka Heimann</i> Organic Chemistry as Precursor for Formula Language	415
<i>Peter Kelly</i> Scientific Literacy in an Educational Arena – a consideration of some contextual issues	429
<i>James J. Gallagher</i> Educating Teachers of Science to Improve Scientific Literacy of High School Students	445
<i>Jürgen Becker</i> New Findings in the Behaviour of Chemistry Teachers: Indicators for the Educational Level	461
Appendix: <i>List of Participants</i>	475
