TABLE OF CONTENTS

- Executive Summary 13**
- 1. ... Introduction 25**
- 2. ... The economic importance of the health sector..... 33**
 - 2.1..... Impact of health on economic growth..... 33
 - 2.2..... The health sector as a productive sector 35
 - 2.3..... The health sector – a potential for high-skilled and flexible employment..... 38
- 3. ... Past and recent trends in health expenditure and brief overview of the 2009 EPC/EC expenditure projections 43**
 - 3.1..... Past trends in public expenditure on health 43
 - 3.2..... The potential impact of the economic crisis on health related expenditure..... 46
 - 3.2.1..... Theoretical considerations and empirical observations from past crises..... 46
 - 3.2.2..... Simulation of the computational effect..... 50
 - 3.3..... Long-term projection of public expenditure on health care and long-run sustainability of public finances: short overview of the EPC/EC 2009 Ageing Report..... 54
 - 3.3.1..... Factors affecting health care spending considered in 2009 EPC/EC projection exercise and reported in the EPC/EC 2009 Ageing Report 55
 - 3.3.2..... Methodology and results..... 60
- 4. ... Survey of health system efficiency, effectiveness and sustainability issues 65**
 - 4.1..... Concepts of efficiency and effectiveness regarding health systems 65
 - 4.2..... Efficiency analysis 68
 - 4.3..... The quest for measuring and improving health system performance 68
 - 4.4..... Health systems: possible ways to improve cost-effectiveness in the sector 77
 - 4.4.1..... Improve the management of information and knowledge to help decision-making in the health sector: 78
 - 4.4.2..... Strengthen primary care, ambulatory practices and care coordination..... 80
 - 4.4.3..... Emphasise more strongly health promotion and disease prevention 80
 - 4.4.4..... Correct price signals in health services markets and align incentives with effectiveness and efficiency 81
 - 4.4.5..... Training human resources for health and ensuring a balance between inputs:..... 81
 - 4.4.6..... Look outside the box: socio-economic determinants of health..... 82
 - 4.4.7..... Leadership and consensus building and governance 82
- 5. ... Health system characteristics and their relation to health expenditure..... 83**
 - 5.1..... Health insurance coverage and its relation to expenditure 83
 - 5.2..... Collection, pooling and allocation of financial resources and system administration and the link with expenditure..... 90
 - 5.2.1..... Collection, pooling and allocation of financial resources..... 90
 - 5.2.2..... System administration..... 93
 - 5.2.3..... Expenditure control mechanisms..... 97
 - 5.3..... Providers of health services: numbers and status..... 100
 - 5.3.1..... Numbers of physicians and nurses..... 100
 - 5.3.2..... Providers' status 113
 - 5.3.3..... Hospital beds..... 114
 - 5.4..... Rules on access: the use of primary care, referral systems, care coordination and patient choice of provider 116
 - 5.5..... Purchasing, contracting and remuneration systems and sector outputs 120
 - 5.5.1..... Payments to physicians: primary care and specialists 120
 - 5.5.2..... Payments to hospitals..... 123
 - 5.5.3..... Policies regarding pharmaceuticals..... 128

5.6..... Information and monitoring, use of health technology assessment including cost-effectiveness information	134
5.7..... Health status, health behaviour and health promotion and disease prevention policies	137
5.8..... Social determinants of health: looking outside the health system	143
6. ... Main challenges ahead to contain costs and make the health systems more efficient	145
6.1..... Ensuring a sustainable financing basis to the sector, a good pooling of funds and that resource allocation is not detrimental to more vulnerable regions	147
6.2..... Adjusting existing cost-sharing systems to ensure that they encourage a cost-effective use of care	149
6.3..... Ensuring balanced mix of different staff skills and preparing for potential staff needs due to ageing	151
6.4..... Improving and better distribute primary health care services and reducing the unnecessary use of specialist and hospital care	153
6.5..... Increasing hospital efficiency through increasing use of day-case surgery and concentrating some hospital services	155
6.6..... More cost-effective use of medicines while allowing for innovation in the health sector .	157
6.7..... To improve the general governance (coherence of decision-making and management) of the system	158
6.8..... To improve data collection and information channels and to use available information to support performance improvement	160
6.9..... To use health technology assessment more systematically to help decision making processes	161
6.10.... Improving life-styles and access to more effective health promotion and disease prevention.....	162
Annex 1: Health expenditure growth vs. GDP growth	165
Annex 2: Efficiency and effectiveness concepts and efficiency analysis.....	167
What is meant by effectiveness and efficiency?	167
Efficiency analysis	168
Annex 3: Institutional features of health systems.....	171
Annex 4: Country fiches.....	177
Belgium	177
Bulgaria	187
Czech Republic	199
Denmark	207
Germany	215
Estonia	225
Ireland	233
Greece	241
Spain	251
France	263
Italy	273
Cyprus	283
Latvia	293
Lithuania	303
Luxembourg	313
Hungary	321
Malta	329
The Netherlands	337
Austria	347

Poland	357
Portugal	367
Romania	377
Slovenia.....	385
Slovakia.....	393
Finland	403
Sweden.....	413
United Kingdom.....	421
