

The Neurophysiological Aspects of Human Mental Activity

SECOND EDITION

N. P. Bechtereva

NEW YORK • OXFORD UNIVERSITY PRESS • 1978

Institut für
Arbeitswissenschaft
der TH Darmstadt

vity of neuronal
acoustic charac-
and the presence
ams of long-term
significance that
art of a study of
rst place, in the

ur need to trace
ical mechanisms

Contents

N.P.B.

1. Introduction 3
2. The Functional State of the Human Brain during the
Performance of Conditioned Reflex Reactions and
Psychological Tests 19
 - The Electroencephalogram during Conditioned
Reflex Reactions 19
 - The Electroencephalogram during Psychological
Tests 46
 - The Electrosubcorticogram during Psychological Tests.
The Significance of its Changes during
Mental Activity 54
3. The Cerebral Maintenance of Mental Activity. 66
 - Principles of the Investigation of Elements of the System
of Cerebral Maintenance of Mental Activity 66
 - The Physiological Significance and Special Characteristics
of the Links in the System for Cerebral Maintenance of
Mental Functions 85

Contents

x

The Neurophysiological Nature of Certain Changes
Developing in Links in the System for the Cerebral
Maintenance of Mental Activity 100

Dynamics of the Interaction between the Links of the
Cerebral System for the Maintenance of
Mental Activity 118

4. Some Fundamental Questions and Prospects 129

The Study of Human Brain Physiology and
Animal Experimentation 154

Bibliography 157

Russian Literature 157

Non-Russian Literature 170
