# Contents

Preface	xv	
<b>Chapter 1</b>	<b>Introduction to Statistics</b>	<b>1</b>
1.1	The Field of Statistics	1
1.2	The Design of Sample Surveys	2
1.3	The Design of Experiments	5
1.4	The Role of Probability in Statistics	7
1.5	Decision Making under Uncertainty	8
1.6	Bias and Error	10
1.7	The Frequency Distribution	14
	Chapter Review	24
<b>Chapter 2</b>	<b>Summary and Description of Data</b>	<b>26</b>
2.1	Introduction	26
2.2	Types of Summary Measures	26
2.3	Parameters and Statistics	28
2.4	Measures of Central Tendency	28
2.5	Measures of Dispersion	39
2.6	Misuses of Descriptive Statistics	48
2.7	Snow Removal in New York City: A Case Study in Descriptive Statistics	53
	Chapter Review	56
	Getting Down to Cases: A Descriptive Analysis of Die Stampings	57
	Appendix 2.1 Rules of Summation	58
<b>Chapter 3</b>	<b>Probability</b>	<b>61</b>
3.1	Introduction	61
3.2	Definition of Probability	61
3.3	Probability of an Event	66

Contents viii

3.4	Addition Rule	70	
3.5	Multiplication Rule	73	
3.6	Bayes' Theorem	82	
3.7	Subjective or Personal Probability	84	
3.8	A Case Study in Marketing	85	
	Chapter Review	88	
	Getting Down to Cases: The Reliability of the Apollo Space Mission	89	
	Appendix 3.1 Counting Techniques	90	
<b>Chapter 4 Probability Distributions, Expected Values, and the Binomial Distribution</b>			<b>99</b>
4.1	Introduction	99	
4.2	Random Variables	99	
4.3	Probability Distributions	103	
4.4	Expected Value of a Random Variable	109	
4.5	Variance and Standard Deviation of a Random Variable	112	
4.6	Chebyshev's Inequality	114	
4.7	The Binomial Distribution	116	
4.8	Acceptance Sampling	125	
4.9	Acceptance Sampling in the Department of Defense: A Case Study	126	
	Chapter Review	130	
	Getting Down to Cases: Quality Control in the Manufacture of Railway-Car Side Frames	131	
	Appendix 4.1 Expected Value of a Linear Function of a Random Variable	132	
	Appendix 4.2 The Hypergeometric Distribution	134	
	Appendix 4.3 Joint Probability Distributions and Sums of Random Variables	135	
<b>Chapter 5 The Normal and Poisson Distributions</b>			<b>141</b>
5.1	Introduction	141	
5.2	Continuous Distributions	141	
5.3	Probability Density Function of a Continuous Random Variable	143	
5.4	The Normal Distribution	144	
5.5	The Standard Normal Curve	147	
5.6	Calculating Normal Probabilities	148	
5.7	Using the Table of the Standard Normal Distribution	150	
5.8	The Normal Distribution as an Approximation to the Binomial Distribution	153	

5.9	Wind Changes for Hurricanes: A Case Study	156
5.10	The Poisson Distribution	159
5.11	Additional Uses for the Poisson Distribution	162
5.12	Replacement of Parts on Polaris Submarines: A Case Study	164
	Chapter Review	166
	Getting Down to Cases: A Trunking Problem in the Telephone Industry	167
Appendix 5.1	Waiting Lines and the Exponential Distribution	168
<b>Chapter 6</b>	<b>Sample Designs and Sampling Distributions</b>	<b>174</b>
6.1	Introduction	174
6.2	Probability Samples and Judgment Samples	174
6.3	Types of Probability Samples	175
6.4	Inventory Valuation: A Case Study	180
6.5	Using a Table of Random Numbers	182
6.6	Concept of a Sampling Distribution	185
6.7	The Sampling Distribution of the Sample Proportion	187
6.8	The Sampling Distribution of the Sample Mean	190
6.9	Accounts Receivable in a Department Store: An Experiment	198
	Chapter Review	202
	Getting Down to Cases: Sampling at the Exxon Research and Engineering Company	203
Appendix 6.1	Monte Carlo Methods: Another Application of a Table of Random Numbers	205
<b>Chapter 7</b>	<b>Statistical Estimation</b>	<b>209</b>
7.1	Introduction	209
7.2	Point Estimates and Interval Estimates	209
7.3	Point Estimation	211
7.4	Point Estimates for $\mu$ , $\sigma$ , and $P$	215
7.5	Confidence Intervals for the Population Mean	216
7.6	Confidence Intervals for the Population Proportion	226
7.7	Confidence Interval for the Difference between Two Means or Two Proportions	231
7.8	Determining the Size of the Sample	234
7.9	Statistical Estimation in the Chemical Industry: A Case Study	237
	Chapter Review	240
	Getting Down to Cases: The Effect of a New Enzyme on a Pharmaceutical Manufacturing Process	242
Appendix 7.1	Bayesian Estimation	243

<b>Chapter 8 Hypothesis Testing</b>	<b>245</b>
8.1 Introduction	245
8.2 Hypothesis Testing: An Illustration	245
8.3 Basic Concepts of Hypothesis Testing	247
8.4 One-Sample Test of a Mean: Large Samples	252
8.5 One-Sample Test of a Proportion: Large Samples	262
8.6 Two-Sample Test of Means: Large Samples	268
8.7 Two-Sample Test of Proportions: Large Samples	272
8.8 One-Sample Test of a Mean: Small Samples	276
8.9 Two-Sample Test of Means: Small Samples	279
8.10 Limitations of Classical Hypothesis Testing	281
8.11 Statistical Process Control at the American Stove Company: A Case Study	282
Chapter Review	287
Getting Down to Cases: How Dow Chemical Checks the Accuracy of Its Clerical Work	289
<b>Chapter 9 <math>\chi^2</math> (Chi-Square) Tests and Nonparametric Techniques</b>	<b>291</b>
9.1 Introduction	291
9.2 Target Practice and Pearson's Test Statistic	291
9.3 The $\chi^2$ Distribution	292
9.4 Test of Difference among Proportions	294
9.5 Contingency Tables	299
9.6 Contingency Tables and Metal Castings: A Case Study	301
9.7 Test of Goodness of Fit	302
9.8 Tests and Confidence Intervals Concerning the Variance	306
9.9 Nonparametric Techniques	309
9.10 The Sign Test	310
9.11 The Mann-Whitney Test	313
9.12 The Runs Test	316
9.13 Nonparametric Techniques: Pros and Cons	318
Chapter Review	321
Getting Down to Cases: Testing for Normality at the American Stove Company	322
<b>Chapter 10 Experimental Design and the Analysis of Variance</b>	<b>324</b>
10.1 Introduction	324
10.2 Design of Industrial Experiments	324
10.3 Testing Textile Fabrics: A Case Study	331
10.4 The $F$ Distribution	334
10.5 Analysis of a Completely Randomized Design	336
10.6 One-Way Analysis of Variance	338
10.7 Confidence Intervals for Differences among Means	343

10.8	Two-Way Analysis of Variance	345
10.9	Confidence Intervals for Differences among Means	350
10.10	A Final Caution	351
	Chapter Review	353
	Getting Down to Cases: How a Textile Manufacturer Used the Analysis of Variance	355
Appendix 10.1	Comparing Two Population Variances	356
Appendix 10.2	Formulas for Computations in the Analysis of Variance	357
<b>Chapter 11</b>	<b>Regression and Correlation Techniques</b>	<b>358</b>
11.1	Introduction	358
11.2	Relationship among Variables, and the Scatter Diagram	358
11.3	Aims of Regression and Correlation Analysis	362
11.4	Linear Regression Model	363
11.5	Sample Regression Line	366
11.6	Method of Least Squares	368
11.7	Characteristics of Least-Squares Estimates	373
11.8	Standard Error of Estimate	372
11.9	Estimators of (1) the Conditional Mean and (2) an Individual Value of $Y$	375
11.10	Coefficient of Determination	380
11.11	The Correlation Coefficient	384
11.12	Inference Concerning the Population Correlation Coefficient	387
11.13	Inference Concerning the Value of $B$	388
11.14	Statistical Cost Functions: A Case Study	390
11.15	Hazards and Problems in Regression and Correlation	391
	Chapter Review	395
	Getting Down to Cases: Pig Iron and Lime Consumption in the Production of Steel	397
Appendix 11.1	Logarithmic Regression	398
Appendix 11.2	Rank Correlation	401
<b>Chapter 12</b>	<b>Multiple Regression and Correlation</b>	<b>404</b>
12.1	Introduction	404
12.2	Multiple Regression: Nature and Purposes	404
12.3	The Multiple-Regression Model	406
12.4	Least-Squares Estimates of the Regression Coefficients	406
12.5	Confidence Intervals and Tests of Hypotheses Concerning $B_1$ and $B_2$	410
12.6	Multiple Coefficient of Determination	414
12.7	Geometrical Interpretation of Results of Multiple Regression and Correlation	415

12.8	Analysis of Variance	417	
12.9	Dummy-Variable Techniques	422	
12.10	Multicollinearity	426	
12.11	Serial Correlation and the Durbin-Watson Test	429	
12.12	Analyzing the Residuals	433	
12.13	Coping with Departures from the Assumptions	436	
12.14	Computer Programs and Multiple Regression	437	
12.15	Choosing the Best Form of a Multiple-Regression Equation	439	
12.16	Railroad Costs: A Case Study	440	
	Chapter Review	443	
	Getting Down to Cases: Determinants of the Strength of Cotton Yarn	445	

**Chapter 13 Introduction to Time Series 446**

13.1	Introduction	446	
13.2	The Traditional Time-Series Model	447	
13.3	Estimation of a Least-Squares Linear Trend Line	449	
13.4	Estimation of Nonlinear Trend	453	
13.5	The Trend in the Capital-Labor Ratio: A Case Study	455	
13.6	Moving Averages	457	
13.7	Exponential Smoothing	460	
13.8	Seasonal Variation	465	
13.9	Calculation of a Seasonal Index: Ratio-to-Moving-Average Method	468	
13.10	Calculation of Seasonal Variation: Dummy-Variable Method	471	
13.11	Cyclical Variation	473	
13.12	Elementary Forecasting Techniques	475	
13.13	Leading Indicators	477	
13.14	Econometric Models as Forecasting Techniques	479	
13.15	Forecasting Company Sales: A Case Study	480	
	Chapter Review	483	
	Getting Down to Cases: Industrial Production in Seven Major Countries	484	
	Appendix 13.1 The Wharton Econometric Model	487	
	Appendix 13.2 Forecasting Based on Exponential Smoothing	488	

**Chapter 14 Index Numbers 490**

14.1	Introduction	490	
14.2	Unweighted Index Numbers	491	
14.3	Weighted Index Numbers	493	
14.4	Other Weighting Schemes and Base Periods	496	
14.5	Chain Index Numbers	498	
14.6	Basic Considerations in Index Number Construction	501	
14.7	The Consumer Price Index: A Case Study	503	

14.8	Quantity Indexes	506	
14.9	The Index of Industrial Production: A Case Study	508	
	Chapter Review	511	
	Getting Down to Cases: Seasonal Variation in Indexes of Industrial Production	513	
<b>Chapter 15</b>	<b>Decision Theory: Prior Analysis and Posterior Analysis</b>		<b>515</b>
15.1	Introduction	515	
15.2	Decision Trees	515	
15.3	Decision Trees: A Case Study	517	
15.4	Maximization of Expected Utility	520	
15.5	Construction of a Utility Function	521	
15.6	Characteristics of Utility Functions	524	
15.7	Posterior Analysis	528	
15.8	Posterior Analysis in a Drug Firm: A Case Study	529	
15.9	Sample Size and the Relationship between Prior and Posterior Probability Distributions	532	
15.10	Expected Value of Perfect Information, Prior and Posterior	533	
15.11	Expected Opportunity Loss	535	
15.12	Two-Action Problems with Linear Profit Functions	537	
15.13	Solving a Two-Action Problem	539	
15.14	Posterior Analysis of the Two-Action Problem	543	
	Chapter Review	545	
	Getting Down to Cases: Maxwell House's Pricing Decision Concerning the Quick-Strip Can	546	
<b>Chapter 16</b>	<b>Decision Theory: Preposterior Analysis and Sequential Analysis</b>		<b>548</b>
16.1	Introduction	548	
16.2	Preposterior Analysis of the Marketing Manager's Problem	548	
16.3	Completing the Decision Tree	551	
16.4	Extensive Form Analysis and Normal Form Analysis	554	
16.5	Comparison of Results, and Advantages of Each Type of Preposterior Analysis	559	
16.6	Sequential Sampling	565	
16.7	Sequential Decision Making under Uncertainty	567	
16.8	Computation of Posterior Probabilities, Based on Results of Research Project Alone	569	
16.9	Computation of Posterior Probabilities, Based on Results of Research Project and Pilot Plant Together	570	

16.10 Solution to the Problem	573
16.11 Conclusion	576
Chapter Review	578
Getting Down to Cases: Maxwell House's Decision Concerning a Three-Month Sales Test of the Quick-Strip Can	579

<b>Appendix</b>		<b>A1</b>
Appendix Table 1	Binomial Probability Distribution	A1
Appendix Table 2	Areas under the Standard Normal Curve	A8
Appendix Table 3	Poisson Probability Distribution	A9
Appendix Table 4	Values of $e^{-x}$	A13
Appendix Table 5	Random Numbers	A14
Appendix Table 6	Values of $t$ That Will be Exceeded with Specified Probabilities	A16
Appendix Table 7a	Chart Providing 95 Percent Confidence Interval for Population Proportion, Based on Sample Proportion	A18
Appendix Table 7b	Chart Providing 99 Percent Confidence Interval for Population Proportion, Based on Sample Proportion	A19
Appendix Table 8	Values of $\chi^2$ That Will Be Exceeded with Specified Probabilities	A20
Appendix Table 9	Values of an $F$ Variable Exceeded with Probability Equal to .05	A22
Appendix Table 10	Values of an $F$ Variable Exceeded with Probability Equal to .01	A24
Appendix Table 11	Values of $d_L$ and $d_U$ for the Durbin-Watson Test	A26
Appendix Table 12	Common Logarithms	A29
Appendix Table 13	Squares and Squares Roots	A32
<b>Answers to Odd-Numbered Exercises</b>		<b>A45</b>
<b>Index</b>		<b>A81</b>
