

THE CLEAN AND EFFICIENT USE OF COAL AND LIGNITE: ITS ROLE IN ENERGY, ENVIRONMENT AND LIFE

HONG KONG • 30TH NOVEMBER - 3RD DECEMBER 1993

C O N F E R E N C E P R O C E E D I N G S

INTERNATIONAL ENERGY AGENCY
AUSTRALIAN DEPARTMENT
OF PRIMARY INDUSTRIES AND ENERGY
MINISTRY OF INTERNATIONAL TRADE AND INDUSTRY OF JAPAN
UNITED STATES DEPARTMENT OF ENERGY
UNITED STATES AGENCY FOR INTERNATIONAL DEVELOPMENT
US-ASIA ENVIRONMENTAL PARTNERSHIP
UNITED NATIONS

TABLE OF CONTENTS

	Page
Foreword	3
Acknowledgments	5
Table of Contents	7
OPENING SESSION AND KEYNOTE SPEECHES	17
Opening Speeches:	
Formal Opening of the Conference: <i>S. Garribba, Director, Energy Technology and R&D, International Energy Agency, Paris</i>	19
Remarks and Introduction: <i>S. Schweitzer, US Agency for International Development, Washington DC, US</i>	23
Keynote Speeches:	
World Energy Outlook and Technology Challenges: <i>S. Garribba, Director, Energy Technology and R&D, International Energy Agency, Paris</i>	25
Coal and Lignite: The Needs and Concerns of Developing and Industrialising Nations: <i>C. Ji, Under-Secretary General, United Nations, New York</i>	49
Energy for Tomorrow's World: <i>I. Lindsay, Secretary General, World Energy Council, London</i>	57
Clean Coal Production and Rational Use of Coal in China: <i>Deputy Minister Baoming Zhang, Ministry of Coal Industry, People's Republic of China</i>	71
The Perspectives of Coal Users and Suppliers: <i>J. Williams, Managing Director, Shell Coal International, Ltd., UK</i>	87
The Reality of Coal and Coal Technology: <i>A.C. Toohey, Chief Executive, World Coal Institute, London</i>	95
The Technological Pathway for Coal: <i>J. Siegel, Acting Assistant Secretary for Fossil Energy, US Department of Energy, Washington DC, US</i>	103

Coal in the 21st Century: <i>R. Higgins, Executive Director, Minerals and Fisheries Group, Department of Primary Industries and Energy, Australia</i>	111
Coal Technology Options, International Co-operation Partnership: <i>M. Ichikawa, Director, Coal Mining Department, Agency of Natural Resources and Energy, Japan</i>	123
SESSION I. ASIA-PACIFIC COAL USE STRATEGIES: NEEDS, PLANS AND OPPORTUNITIES	131
Development and Demonstration of Clean Coal Technologies: <i>A. Kunito and M. Takahashi, Electric Power Development Co., Japan</i>	133
Integrating Improved Coal Technologies into Regional Energy System: <i>S. Boedihardjo, Director, Engineering Service Center, PLN, Indonesia</i>	151
International Collaboration and Partnering for Effective Selection, Demonstration and On-going Use of Clean Coal Technologies: <i>A.M. Ferrer, Vice-President, Stone & Webster Engineering Corp., US</i>	177
SESSION II. ASIA-PACIFIC COAL USE STRATEGIES: AN INTEGRATED APPROACH	185
Environmentally Sound Technologies for Sustainable Development: <i>S. Schweitzer, Office of Energy and Infrastructure, US Agency for International Development, US</i>	187
Improved Coal Technologies for the Asia-Pacific 21st Century Economic Development: <i>G. Preston, Vice-President, Generation & Storage Div., EPRI, US</i>	205
Integrating Coal Use into Korean Energy Systems: <i>H.S. Moon, Chairman of the Board, Korea Electric Power Corp., Republic of Korea</i>	219
Coal in Power Generation: How the E7 Utilities Look at Technology Transfer to the Developing Countries: <i>D. Kallmeyer, Head of Fossil Fired Power Plants, RWE Energie, Germany</i>	231
Clean Coal Technology Development, Dissemination and Cooperation Through CCT Center of Japan: <i>H. Okamoto, Director-General, Clean Coal Technology Centre, New Energy Development Organization, Japan</i>	249

The Reality of Coal Technology for Today and Tomorrow: <i>D. Pai, Chairman and President, Foster Wheeler Development Corp., US</i>	259
WORKSHOP A1. FINANCING	287
Barriers to Investment in Emerging Power Markets: <i>J. Beardsworth, Hunton & Williams, US</i>	289
Financing Coal and Lignite Development and Electricity Projects: <i>M. Agata, Special Advisor to the Governor, The Export-Import Bank of Japan, Japan</i>	325
Process for Encouraging Investment and Technology Co-operation in the Electric Power Industry: <i>F. Denny, Vice-President, Engineering and Fossil Fuels, Edison Electric Institute, US</i>	337
Assisting Financeability Through Rate Structure Design: <i>D. Keith, President, Keith and Associates and R. Bibb, President, Bibb and Associates, Inc., US</i>	345
Critical Issues in Power Project Financing: <i>W. Holland, Partner, LeBoeuf, Lamb, Leiby and MacRae, US</i>	353
WORKSHOP A2. TECHNOLOGY OPTIONS: OVERVIEW	357
Coal Technology Selection Methods and Tools for New Power Generation and Environment/Performance Upgrading: <i>A. Armor, Director, Fossil Power Plants, EPRI, US</i>	359
Highly Efficient Pulverised Coal-Fired Power Plants: <i>U. Hauser, Engineering Manager, ABB Kraftwerke AG, Germany</i>	381
Systematic Coal Utilization Technology Options Evaluation Process: <i>A.M. Ferrer, Vice-President, Stone & Webster, US</i>	397
Development of Coal Utilisation Technologies in India: <i>B.C. Misra, Director, Central Mine Planning & Design, Ltd., India</i>	409
Coal Utilization in China: Technology Options by Sector: <i>D. Simbeck, Vice-President, Technology, SFA Pacific, Inc., US</i>	415
Development and Option of Retrofit and New Technologies for Low-Rank Coal: <i>G. Moumdjian, Head of Thermal and Nuclear Energy, University of Sofia, Bulgaria</i>	427

Production of Coal-Based Domestic Fuel: An Environmentally Friendly Technology: <i>B.C. Misra, Director, Central Mine Planning & Design, Ltd., India</i>	429
Coal Technology for Developing Countries: <i>M. Matei, Fuel and Chemical Methods Manager, ICEMENRG, Romania</i>	437
Technology Options for Industrial, Commercial, and Residential Applications: <i>J. Harrison, Professor, Leeds University, and J. Topper, Commercial Director, British Coal Corp., UK</i>	453
General Overview of Emerging Clean Coal Technology in the U.S. as Applicable to Asian Countries: <i>F. Emmett, Partner, Sargent & Lundy, US</i>	469
Review of Vietnamese Coals: <i>N.V. Quynh, Deputy Director-General, Coalimex, Vietnam, and P. Bosak, Senior Geologist, GMS, Czech Republic</i>	481
Coalbed Methane - the Cleanest Coal Utilisation Yet: <i>I. Clements, President and CEO, Powerbridge, Inc., US</i>	487
WORKSHOP A3. TECHNOLOGY OPTIONS: EMISSIONS CONTROL, COAL PREPARATION AND CLM FUELS	495
Carbon Dioxide Capture and Disposal as a Greenhouse Gas Abatement Option: <i>I. Webster, GHG Programme Director, IEA Greenhouse Gas R&D Programme, London, UK</i>	497
Clean and Efficient Use of Coal with CO₂ Stabilization: <i>V. A. Iyengar, and M.S. Iyengar, M.S. Iyengar & Assoc., India</i>	505
Improved Coal Utilisation Technology: Potential to Reduce Carbon Dioxide Emissions: <i>K. Sullivan, Global Climate Committee, Coal Industry Advisory Board, IEA, Paris</i>	513
Perspective on Coal Liquid Mixtures (CLM): <i>H. Feibus, Chair, IEA Coal-Liquid Mixtures Executive Committee, US</i>	523
Clean Competitive Coal Water Fuel: <i>D. Dunlop, President, Fuels Management Inc., US, and C. Capes, National Research Council of Canada, Canada</i>	531
Clean and Efficient Coal Handling Systems: Development of Coal Cartridge System (CES): <i>T. Yamada, General Manager, Technology/Energy Development Department, Idemitsu Kosan Co., Japan</i>	541

New Development of Processing for Coal Beneficiation: <i>P. Ling, Senior Preparation Engineer, Ministry of Coal Industry, People's Republic of China</i>	551
Advanced Flotation: Packed Column Froth Separation for Fine Coal Cleaning: <i>D. Yang, President, Mineral Technologies International, US</i>	557
Significance of Recent SCI Advances to Future of Coal Liquid Mixtures: <i>T. Hamieh, Professor of Physical Chemistry, CNRS, France</i>	567
Low-Grade Coal Upgrading: Application of the Liquids from Coal (LFC) Technology to Coals in the Pacific Rim: <i>S. van Hoften, SGI International, US</i>	577
Coal Liquefaction in Indonesia - Programme and Prospect: <i>A. Dasuki and H. Soedieto, Agency for the Assessment and Application of Technology, Indonesia</i>	599
WORKSHOP A4. REGIONAL NEEDS	611
Integrating Improved Coal Technology into Regional Energy Systems: <i>D. Boyd, Executive General Manager, Coal & Allied Industries, Australia</i>	613
Asia-Pacific and Europe Comparison of Coal Prospects/Opportunities: <i>M. Daniel, Head of Supply Transport and Markets, IEA Coal Research, UK</i>	625
Regional Analysis and Architecture of the Whole Energy System: <i>W. Gouse, Senior Vice-President, MITRE, US</i>	633
Efficient Use in Integrated Regional Energy Systems: <i>T. Kashiwagi, Professor, Tokyo University of Agriculture and Technology, Japan</i>	647
The Role of Coal in the Development of Pakistan: <i>R.M Sultan, Chief Inspector of Mines, Department of Labour and Manpower, Pakistan</i>	665
Changes in German Lignite Mining: Just the Effects of Reunification: <i>F. von Bismarck, Head of Lignite Planning Section, Ministry for Environment and Regional Planning, Brandenburg, Germany</i>	667
Some Considerations on Imported Coal and the Environment in Morocco: <i>M. Moubaraki, Engineer, Ministry of Energy and Mines, Morocco</i>	675
Indonesian Coal for Environmental Value in Slovenia Cogeneration Plants: <i>M. Vedenik-Novak, TETOL, Slovenia</i>	697
Low-Rank Coal Water Fuel (LRCWF) Commercial Demonstration: <i>W. Wilson, Senior Research Advisor, Energy Research Center, US</i>	705

Regional Perspectives on Externalities Analysis and Electric Resource Planning: <i>S. Kotz, J. London, California Public Utilities Commission, US</i>	707
WORKSHOP A5. ENVIRONMENTAL STRATEGIES: ENVIRONMENTAL CONSEQUENCES AND RESPONSE	717
Overview of Coal Use and Efficient Future Technology: <i>Y. Yu, Chief, Central Coal Mining Research Institute, People's Republic of China</i>	719
Reducing Environmental Impact from Using Coal and Lignite in Thailand: <i>A. Chiewwattakee, Senior Economist, Department of Energy Development and Promotion, Thailand</i>	729
Air Toxic Emissions from Coal-Fired Power Plants: Opportunities and Challenges: <i>K. Connor, Senior Associate, Decision Focus, Inc., Hong Kong</i>	741
Analysis of Development of Low-Emission Boiler Systems for DOE PETC Combustion 2000 Programme: <i>R. Kaminski, Raytheon Engineering & Constructors, US</i>	759
WORKSHOP B1. CO-OPERATION AND PARTNERSHIP	773
Improving Coal Use in Developing Countries through Technology Transfer: <i>J. Topper, Commercial Director, Coal Research Establishment, UK</i>	775
USAID Experience in Co-operation and Partnership: <i>S. Schweitzer, Chief, Energy Innovation and Private Sector Division, US Agency for International Development, US</i>	793
Promoting International Cooperation of Coal Patent Technology Development: <i>J. Lin, Engineer, Nanjing Coal Mining Machinery Factory, People's Republic of China</i>	811
US-AEP Programs: A Model for Public/Private Co-operation: <i>L.P. Reade, Director General, US-Asia Environmental Partnership, US</i>	815
Technology Options and Technology Transfer - An Indian Experience: <i>K. Ramakrishnan, Corporate Director, Bharat Heavy Electricals, Ltd., India</i>	825
Role of Multilateral Co-operation in Technology Development and Deployment: The IEA Experience: <i>J. Tilley, Head, Energy Technology Collaboration Division, International Energy Agency, Paris</i>	833

Comprehensive Promotion of Coal Use Technology and International Co-operation for Transfer of Appropriate Technology: <i>T. Abe, Senior Staff, International Co-operation Department, Center for Coal Utilization, Japan</i>	841
WORKSHOP B2. TECHNOLOGY OPTIONS: DESULFURISATION AND INTEGRATED DEGASIFICATION COMBINED CYCLE	855
Flue Gas Desulfurisation for Coal-Fired Power Generation in the Asia-Pacific Region: An Overview of Best Available Options: <i>I. Smith, Head of Environmental Group, IEA Coal Research, UK</i>	857
Gravimelt Process for Coal Desulfurization and Demineralization: <i>R. Meyers, Manager, Chemical Technology, TRW, Inc., US</i>	869
Available Technologies for Flue Gas Desulfurization in Thermal Power Plants: <i>R.J. Batyko, Manager, Environmental Projects, Babcock & Wilcox, US</i>	871
Techno-Economic Feasibility Assessment of Integrated Gasification Combined Cycle (IGCC) Power Generation Technology with High Ash Indian Coals: <i>O.P. Rao, Council of Scientific & Industrial Research, India</i>	883
Indirect Coal Liquefaction via Fischer-Tropsch Technology for Baseload IGCC Plant: <i>S. Tam, Manager, Advanced Process, Bechtel Corp., US</i>	895
Control of SO₂ and NO_x Emissions from Fossil Power Plants: <i>M. Zhang, Thermal Power Research Institute, Ministry of Power Industry, People's Republic of China</i>	905
WORKSHOP B3. TECHNOLOGY OPTIONS: PYROLYSIS AND FLUID-BED COMBUSTION	915
Coal Complex Centering on Coal Pyrolysis: <i>T. Kawamura, Senior Researcher, Nippon Steel Corp., Japan</i>	917
Cleaning of Sulphur-Contaminated Coal with Product Control Indirect Flash Pyrolysis Technology: <i>E. Someus, Director, Product Control, UK</i>	927
Circulating Fluidized Bed Gas-Steam Cogeneration and Its Environmental Assessments: <i>Y. Li, Director, and D. Qiu, Professor, INET/ITEESA, People's Republic of China</i>	949
Design Considerations for Utility Size CFB Steam Generators: <i>R. Skowrya, Engineering Manager, Fluidized Bed Steam Generation, ABB Combustion System, US</i>	957

Pressurized Fluidized Bed Combustion: Efficient, Clean and Compact Power Generation: <i>S. Jansson, Manager, Science and Technology, ABB Carbon AB, Sweden</i>	971
Technology Integration in Efficient and Clean Coal Use for Utilities: <i>T. Ogawa, Assistant General Manager, EPDC, Japan</i>	981
WORKSHOP B4: REGIONAL NEEDS AND PUBLIC OUTREACH	991
Energy-Environmental Issues in Shanxi Province and Taiyuan City: <i>S. Xia, Professor, Tsinghua University, People's Republic of China</i>	993
Coal-Fired Power Stations and Their Effect on the Environment in Shanxi, China: <i>R. Hui, Associate Professor, Shanxi, Province Planning Committee, People's Republic of China</i>	1001
The Way of Utilisation of Lignite in Yunnan Province of China: <i>Z. Ma, Central Coal Mine Research Institute, People's Republic of China</i>	1011
Clean Coal Transport System CWM Chain Between China and Japan: <i>N. Hashimoto, Manager, CWM Project Operations Department, JGC Corp., Japan</i>	1015
Coal Use: Public Perceptions: <i>G. Shedji, Superintending Engineer, Maharashtra State Electricity Board, India</i>	1025
The Effects of Environmental Compliance on Coal Use in the Midwestern United States: How Regulators Balance the Competing Interests: <i>J.M. Biddison, Commissioner, Public Utilities Commission of Ohio, US</i>	1031
Heat Rate Improvement Technology Transfer to Asian Countries: A US-Japan Initiative: <i>F. Wong, President, FKW Enertech, Inc., US and M. Takahashi, EPDC, Japan</i>	1043
WORKSHOP B5: ENVIRONMENTAL STRATEGIES: ENVIRONMENTAL CONTROL AND MANAGEMENT	1053
Energy Efficient Air Pollution Control for Fossil-Fuelled Plants: <i>P. Mathusa, Program Director, New York State Energy Research and Development Authority, US</i>	1055
Coal Technology and Environment: <i>R. Patil, Chief Engineer, Maharashtra State Electricity Board, India</i>	1073

The Role of Clean and Efficient Use of Coal in the Future Energy and Environment of China: <i>X. Song, China University of Mining and Tech., People's Republic of China</i>	1081
Environmental Sound Facilities Management: <i>J. Elliott and W. Cavanaugh, Ogden Environment and Energy Services, US</i>	1089
CQE: Bringing New Dimensions to Fuel Decisions: <i>S. Stallard, Project Manager, Black & Veatch, US</i>	1099
SESSION III. ENVIRONMENTAL CHALLENGES AND OPPORTUNITES	1115
Observations of Panelists	1117
CLOSING SESSION	1127
Closing Keynote Speech: <i>J.P. Ferriter, Deputy Executive Director, International Energy Agency, Paris</i>	1129
Final Remarks: <i>J. Siegel, Acting Assistant Secretary, US Department of Energy, Washington DC, US</i>	1135
Key Findings and Opportunities for Action: <i>S. Garribba, Director for Energy Technology and R&D, International Energy Agency, Paris</i>	1137
CONFERENCE PROGRAMME AND COMMITTEES	1147
Conference Programme	1149
Steering Committee	1165
Organising Committee	1167
Conference Participants	1169
