

The Acquisition of Syntactic Knowledge

Robert C. Berwick

The MIT Press
Cambridge, Massachusetts
London, England

CONTENTS

Series Foreword vii
Preface ix

Part I: The Computer Model

Chapter 1	Computation and Language Acquisition 3
	The Acquisition Model is Simple 10
	Constraints Make Learning Possible 24
	Evaluating the Model 38
	Summary of Key Ideas 45

Chapter 2	The Acquisition Model 49
	The Initial State of Knowledge 49
	The Target Grammar 82
	The Input Data 85
	The Acquisition Procedure 102
	Appendix 1: The New Parser Design 119
	Appendix 2: Target Grammar Rules 129

Chapter 3	Learning Phrase Structure 139
	Learning To Parse a Simple Sentence 140
	Prepositional Phrases and Verb Complements 147
	Learning the Inflectional System 160
	The Order of Examples 173

Chapter 4	Learning Transformations 185
	Subject-Auxiliary Verb Inversion 185
	Passive Constructions 188
	Missing Subject Sentences 194
	Simple <i>Wh</i> Questions 201
	Some Miscellaneous Rules 205
	Summary of Part I 210

Part II: A Theory of Acquisition

Chapter 5	Acquisition Complexity 215
	Linguistic Theory and Acquisition Complexity 216
	Disjunction and Positive-only Acquisition 233
	The Subset Principle 235
	\bar{X} Theory and Phrase Structure Acquisition 239
Chapter 6	Learning Theory: Applications 249
	Kean's Theory of Phonological Markedness 250
	The <i>M</i> Constraint 269
	The Subset Principle 275
	Inductive Inference of the Auxiliary System 298
	Summary 308
Chapter 7	Locality Principles and Acquisition 311
	Formalizing the Marcus Parser 313
	Two-stack Deterministic Parsing 327
	Parsability and Learnability 332
	Learnability, Parsability, and Locality 339
References	343
Index	355
