**What's on a C-test taker's mind?
Mental processes in C-test taking**

**Universitätsverlag Dr. N. Brockmeyer
Bochum 1991**

Contents

0.	Introduction	11 - 14
1.	The C-test	15 - 28
1.1	Some historical aspects	15
1.2	The C-test principle	17
1.3	Studies on the C-test	19
1.4	Correlational validation of the C-test: problems	25
1.5	C-test validation within a cognitive psychology approach	26
2.	Verbal report data	29 - 50
2.1	Current empirical methodology	29
2.2	A human information processing approach	32
2.3	Studies using verbal report techniques	39
2.3.1	Verbal reports in L1 text comprehension	39
2.3.2	Verbal reports in L2 studies	40
2.4	Conclusions	50
3.	The study	51 - 57
3.1	The development and evaluation of a C-test for French	51
3.2	Results from previous studies	52
3.3	The present study	54
3.3.1	Preparation of the study	54
3.3.2	Background information on the subjects	54
3.3.3	Data collection procedure	55
3.3.4	Characterizing the study	56
4.	Theoretical framework for a model of analysis and data interpretation. Part 1: word perception and recognition, reading and comprehension	58 - 140
4.1	Some methodological issues	60
4.2	Word perception and word recognition	68
4.2.1	Whole word based theories	68
4.2.2	Letter-mediated theories	71

4.2.3	Summary of findings	76
4.2.4	Relevance for the C-test task	79
4.3	Some models of word recognition and reading	81
4.3.1	Adams' model of word recognition	82
4.3.2	Adams and Collin's modified version	85
4.3.3	Rumelhart's interactive model of reading	85
4.3.4	McClelland and Rumelhart's interactive activation model	89
4.4	Reading Comprehension in L1	91
4.4.1	Carpenter and Just's model	92
4.4.2	Sternberg and Powell's approach	95
4.4.3	Kintsch and van Dijk's 1978 model of comprehension	96
4.4.4	Van Dijk and Kintsch's 1983 model of comprehension	98
4.4.5	Kintsch's 1988 construction-integration model	99
4.4.6	Representation of mental models	104
4.4.7	Comprehension and the C-test task	105
4.5	Reading Comprehension in L2	108
4.5.1	Introduction	108
4.5.2	Four theoretical frames in L2 reading	110
4.5.3	Bernhardt's constructivist model of L2 reading	112
4.5.4	Studies in L2 reading	115
4.5.5	Conclusions	138
4.5.6	Relevance for the C-test task	139
5.	Theoretical framework for a model of analysis and data interpretation. Part 2: memory	141 - 190
5.1	Characteristics of memory	141
5.1.1	Memory organization	141
5.1.2	Processing characteristics of memory	145
5.1.3	Automatic and controlled processes	151
5.1.4	Relevance for the C-test task	153
5.2	Knowledge	156
5.2.1	Some basic assumptions about the representation of knowledge	157

5.2.2	A summary: models of knowledge representation	160
5.2.3	A schema approach	165
5.2.4	The role of knowledge in van Dijk and Kintsch's 1983 approach	169
5.2.5	Knowledge and the C-test task	170
5.3	Propositions	172
5.3.1	Frederiksen's model of knowledge structures	173
5.3.2	Propositional analysis and the C-test task	176
5.4	Retrieval – Remembering – Recall	176
5.4.1	Introduction	177
5.4.2	Tulving's retrieval model	179
5.4.3	Raaijmakers and Shiffrin's retrieval model	184
5.4.4	Retrieval and the C-test task	188
6.	Theoretical framework for a model of analysis and data interpretation. Part 3: problem solving	191 – 225
6.1	Problem solving	191
6.1.1	Theories of problem solving	192
6.1.2	Frederiksen's problem frame syntax graph	198
6.1.3	Problem solving and mental ability	200
6.1.4	Problem solving and knowledge	201
6.1.5	Problem solving and task analysis	207
6.1.6	Problem solving: transfer and inferencing	208
6.1.7	Problem solving and feeling of knowing	210
6.1.8	Problem solving: relevance for the C-test task	211
6.2	Transfer	216
6.2.1	Inferencing	222
6.2.2	Relevance for the C-test task	225
7.	Theoretical framework for a model of analysis and data interpretation. Part 4: strategies in L2 research	226 – 238
7.1	Færch and Kasper's concept of strategy	228
7.2	Communication strategies versus problem solving strategies	232
7.3	Strategies versus operations	234
7.4	Cognitive and metacognitive strategies	234

7.5	Conclusions	235
7.6	Relevance for the C-test task	237
8.	The model of analysis	239 – 241
8.1	Task analysis	239
8.2	Analysis of verbal protocols	240
8.3	Analysis of performance data	241
8.4	The Model of Analysis	241
9.	Analysis of data	242 – 265
9.1	Task analysis	242
9.1.1	Item analysis	242
9.1.2	Text analysis	250
9.2	Analysis of verbal protocols	254
9.2.1	General problem solving behavior	254
9.2.2	Evaluation of general problem solving behavior	257
9.2.3	Specific problem solving behavior	258
9.2.4	Verbal Protocol Mapping Graph (VPMG)	260
9.2.5	Problems	264
10.	Statistical analyses	266 – 296
10.1	Performance data	266
10.1.1	Some general statistics on the C-test	266
10.1.2	Performance of the subjects on the three C-test texts	267
10.2	Strategies	272
10.2.1	Strategies and the C-test	272
10.2.2	Strategies and items	277
10.2.3	Strategies and subjects	283
10.2.4	Strategy type and boundary crossing	287
10.3	Propositions	290
10.3.1	Reading cycles and boundary crossings	290
10.3.2	Beginning of reading cycle and propositional boundary	294
10.3.3	Translation cycles and boundary crossings	295
11.	Summary of statistical results	297 – 302
11.1	The performance data	297

11.2	Strategies and the C-test	299
12.	Case study: 3 subjects – 9 items	303 – 325
12.1	Item characteristics	303
12.2	Subjects' characteristics	305
12.2.1	Background information	305
12.2.2	The subjects: items – strategies – propositions	306
12.2.3	Subject and item interaction	311
13.	Conclusions	326 – 333
13.1	What does the C-test measure?	327
13.2	Problems and shortcomings of the approach employed in this study	330
13.3	What are the perspectives?	331
	Appendices	334 – 373
	Appendix 1: C-Test	334
	Appendix 2: Cohesive ties	336
	Appendix 3: Propositional Analysis	339
	Appendix 4: Sequential list of propositions	345
	Appendix 5: Propositional Graphs	348
	Appendix 6: List of strategies	350
	Appendix 7: Verbal Protocol Mapping Graph (VPMG)	356
	Appendix 8: Transcripts of subject 19	366
	References	374
	Index	407
