## FOURTH EDITION

## HANDBOOK OF BIOCHEMISTRY AND MOLECULAR BIOLOGY

## EDITED BY ROGER L. LUNDBLAD FIONA M. MACDONALD

## TABLE OF CONTENTS

Foreword	xi
Preface	
Acknowledgments	xv
Editors	xvii
SECTION 1: AMINO ACIDS, PEPTIDES, AND PROTEINS	
Properties of Amino Acids	3
Data on the Naturally Occurring Amino Acids	
Structures and Symbols for Synthetic Amino Acids Incorporated into Synthetic Polypeptides	
Unnatural Amino Acids for Incorporation into Proteins	
Properties of the α-Keto Acid Analogs of Amino Acids	
$\alpha, \beta$ -Unsaturated Amino Acids	
Amino Acid Antagonists	
Coefficients of Solubility Equations of Certain Amino Acids in Water	
Heat Capacities, Absolute Entropies, and Entropies of Formation of Amino Acids and Related Compounds	
Heat of Combustion, Enthalpy and Free Energy of Formation of Amino Acids and Related Compounds	
Solubilities of Amino Acids in Water at Various Temperatures	
Heats of Solution of Amino Acids in Aqueous Solution at 25°C	
Free Energies of Solution and Standard Free Energy of Formation of Amino Acids in Aqueous Solution at 25°C	77
Far Ultraviolet Absorption Spectra of Amino Acids	79
UV Absorption Characteristics of N-Acetyl Methyl Esters of the Aromatic Amino Acids, Cystine	
and of N-Acetylcysteine	81
Numerical Values of the Absorbances of the Aromatic Amino Acids in Acid, Neutral and Alkaline Solutions	
Luminescence of the Aromatic Amino Acids	
Luminescence of Derivatives of the Aromatic Amino Acids	
Luminescence of Proteins Lacking Tryptophan	
Luminescence of Proteins Containing Tryptophan	
Hydrophobicities of Amino Acids and Proteins	
Chemical Specificity of Reagents for Protein Modification	
Reagents for the Chemical Modification of Proteins	
Protein pK Values	
Protease Inhibitors and Protease Inhibitor Cocktails	
Assay of Solution Protein Concentration	
Spectrophotometric Determination of Protein Concentration in the Short-Wavelength Ultraviolet	161
SECTION 2: LIPIDS	
A Comprehensive Classification System for Lipids	165
Properties of Fatty Acids and Their Methyl Esters	189
Densities, Specific Volumes, and Temperature Coefficients of Fatty Acids from C <sub>8</sub> to C <sub>12</sub>	
Composition and Properties of Common Oils and Fats	
Androgens	
Bile Acids	
Corticoids	
Estrogens	
Progestogens	
Sterols	
Prostaglandins and Related Fatty-Acid Derived Materials	221
SECTION 3: VITAMINS AND COENZYMES	
Properties of Vitamins	225
Biological Characteristics of Vitamins	237
Properties for Ascorbic Acid and Ascorbate-2-Sulfate	241
Vitamers	
Vitamin Names Discarded	
SECTION 4: NUCLEIC ACIDS	
UV Spectral Characteristics and Acidic Dissociation Constants of 280 Alkyl Bases, Nucleosides,	
and Nucleotides	
Ultraviolet Absorbance of Oligonucleotides Containing 2'-O-Methylpentose Residues	263

Chemical Modification of Nucleic Acids Transfection Technologies.  TION 5: CARBOHYDRATES Introduction to Carbohydrates. Natural Additols, Inositols, Inososes, and Amino Alditols and Inosamines. Natural Additols of Carbohydrate Derivation Natural Addoses. Natural Ketoses Carbohydrate Phosphate Esters The Naturally Occurring Amino Sugars Oligosaccharides (Including Disaccharides). Mucopolysaccharides (Including Disaccharides). Mucopolysaccharides (Glycosaminoglycans).  TION 6: PHYSICAL AND CHEMICAL DATA Recommendations for Nomenclature and Tables in Biochemical Thermodynamics Standard Transformed Gibbs Energies of Formation for Biochemical Reactants. Enthalpy, Entropy, and Free Energy Values for Biochemical Redox Reactions. Oxidation-Reduction Potentials, Absorbance Bands and Molar Absorbance of Compounds Used in Biochemical Studies. Calorimetric ΔH Values Accompanying Conformational Changes of Macromolecules in Solution. Free Energies of Hydrolysis and Decarboxylation. Deci-Normal Solutions of Oxidation and Reduction Reagents. Guidelines for Potentiometric Measurements in Suspensions Part A. The Suspension Effect. Ionization Constants of Acids and Bases. Guidelines for NMR Measurements for Determination of High and Low pK, Values Measurement of pH Definition, Standards, and Procedures General Comments on Buffers. List of Buffers Bronsted Acidities. Measurement of pH Benfiniton, Standards, and Procedures General Comments on Buffers Useful for Biological Research Preparation of Buffers Useful for Biological Research Preparation of Buffers Useful for Biological Research Preparation of Buffers of Acrylamide Gels with More Than One Layer.	Spectrophotometric Constants of Ribonucleotides	
Transfection Technologies.  TION 5: CARBOHYDRATES Introduction to Carbohydrates Natural Aktols, Inosiosis, Inososes, and Amino Aktitols and Inosamines. Natural Aktols, Inosiosis, Inososes, and Amino Aktitols and Inosamines. Natural Aktolses. Natural Ketoses. Carbohydrate Phosphate Exters. The Naturally Occurring Amino Sugars . Oligosaccharides (Inchding Disaccharides). Micropolysaccharides (Inchdin		
Introduction to Carbohydrates Natural Alditols, Inositols, Inososes, and Amino Alditols and Inosamines Natural Alditols, Inositols, Inososes, and Amino Alditols and Inosamines Natural Aldoses Natural Aldoses Natural Ketones Carbohydrate Phosphate Esters. The Naturally Occurring Amino Sugars Oligosaccharides (Including Disaccharides), Mucopolysaccharides (Including Disaccharides), Mucopolysaccharides, Mucopolys		
Introduction to Carbohydrates Natural Aldiose, Inositois, Inososes, and Amino Alditois and Inosamines Natural Acids of Carbohydrate Derivation. Natural Acids of Carbohydrate Derivation. Natural Roboses Natu		
Natural Additols, Inositols, Inososes, and Amino Alditols and Inosamines Natural Adoses Natural Retoses Carbohydrate Phosphate Esters. The Naturality Occurring Amino Sugars Oligosaccharides (Including Disaccharides). Mucopolysaccharides (Glycosaminoglycans)  TION 6: PHYSICAL AND CHEMICAL DATA Recommendations for Nomenclature and Tables in Biochemical Thermodynamics Standard Transformed Gibbs Energies of Formation for Biochemical Reactants Enthalpy, Entropy, and Free Energy Values for Biochemical Redox Reactions Oxidation-Reduction Potentials, Absorbance Bands and Molar Absorbance of Compounds Used in Biochemical Studies. Calorimetric AH Values Accompanying Conformational Changes of Macromolecules in Solution. Free Energies of Hydrolysis and Decarboxylation. Deci-Normal Solutions of Oxidation and Reduction Reagents. Guidelines for Potentiometric Measurements in Suspensions Part A. The Suspension Effect. Ionization Constants of Acids and Bases. Guidelines for NMR Measurements for Determination of High and Low pK, Values Measurement and Interpretation of Electrokinetic Phenomena Measurement of PH Definition, Standards, and Procedures. General Comments on Buffers List of Buffers Bransted Acidities Measurement of PH Beniton, Standards, and Procedures. General Comments of Buffers List of Buffers Bransted Acidities Measurement of PH Definition, Standards, and Procedures. General Comments of Buffers Instrument of High and Low pK, Values Measurement of PH Buffer Solutions Annie Buffer for Acrylamide Gels with More Than One Layer Starch Gels.  Indicators for Volumetric Work and pH Determinations Acid and Base Indicators Specific Graylamide Gels with More Than One Layer Starch Gels.  Journal of Buffers of Use in Enzyme Studies Buffer for Acrylamide Gels with More Than One Layer Starch Gels.  Journal Department of Phenomena Definitions of Commendation on Spectroscopy Microplates.  Journal Department of Phenomena Definitions of Terms Related to Polymer Blends, on Multiphase Polymeric Materials.	TION 5: CARBOHYDRATES	
Natural Acids of Carbohydrate Derivation Natural Aldoses Natural Ketoses Carbohydrate Phosphate Esters The Naturally Occurring Amino Sugars Oligosaccharides (Including Disaccharides). Mucopolysaccharides (Glycosaminoglycans).  ZTION 6: PHYSICAL AND CHEMICAL DATA Recommendations for Nomenclature and Tables in Biochemical Thermodynamics. Standard Transformed Gibbs Energies of Formation for Biochemical Reactants Enthalpy. Entropy, and Free Energy Values for Biochemical Redox Reactions Oxidation-Reduction Potentials, Absorbance Bands and Molar Absorbance of Compounds Used in Biochemical Studies. Calorimetric ΔΗ Values Accompanying Conformational Changes of Macromolecules in Solution. Free Energies of Hydrolysis and Decarboxylation. Deci-Normal Solutions of Oxidation and Reduction Reagents. Guidelines for Potentiometric Measurements in Suspensions Part A. The Suspension Effect. Ionization Constants of Acids and Bases. Guidelines for NMR Measurements for Determination of High and Low pK, Values. Measurement and Interpretation of Electrokinetic Phenomena Measurement of pH Definition, Standards, and Procedures. General Comments on Buffers. List of Buffers Bronsted Acidities. Measurement of PH. Buffer Solutions Amine Buffers Useful for Biological Research Armine Buffers Useful for Biological Research Armine Buffer Solutions Amine Buffer for Acrylamide Gels with More Than One Layer Starch Gels. Indicators for Volumetric Work and pH Determinations. Acid and Base Indicators. Specific Gravity of Liquids. Viscosity and Density Tables. A Listing of Log P Values, Water Solubility, and Molecular Weight for Some Selected Chemicals. Chemicals Commonly Used in Biochemical Research Some Biological Stains and Dyes. Mordant Dyes Mordant Dy		
Natural Roteses Carbohydrate Phosphate Esters. The Natural Ry Occurring Amino Sugars Oligosaccharides (Including Disaccharides). Mucopolysaccharides (Glycosaminoglycans).  TION 6: PHYSICAL AND CHEMICAL DATA Recommendations for Nomenclature and Tables in Biochemical Thermodynamics. Standard Transformed Gibbs Energies of Formation for Biochemical Reactants. Enthalpy, Entrope, and Free Energy Values for Biochemical Redox Reactions. Oxidation-Reduction Potentials, Absorbance Bands and Molar Absorbance of Compounds Used in Biochemical Studies. Calorimetric AH Values Accompanying Conformational Changes of Macromolecules in Solution. Free Energies of Hydrolysis and Decarboxylation. Deci-Normal Solutions of Oxidation and Reduction Reagents. Guidelines for Potentiometric Measurements in Suspensions Part A. The Suspension Effect. Jonization Constants of Acids and Bases. Guidelines for NMR Measurements for Determination of High and Low pK, Values Measurement and Interpretation of Electrokinetic Phenomena Measurement of pH Definition, Standards, and Procedures.
