Contents

Forewordxi
Premise xiii
Preface..... xv
Contributorsxvii
Introduction.....xix

SECTION I *Deep-Sea Environmental Variables*

Chapter 1 Total Organic Matter and Water Contents, Grain Size, Bulk Density, Porosity,
 and Redox Potential of Sediments 3

Chapter 2 Total Organic Carbon, Total Nitrogen, and Organic Phosphorus in Marine
 Sediments 13

Chapter 3 Bioavailable Organic Matter: Total and Enzymatically Hydrolyzable Proteins,
 Carbohydrates, and Lipids..... 23

Chapter 4 Photosynthetic Pigment Concentrations in Marine Sediments..... 45

**SECTION II *Food Supply of Organic Matter to the
 Deep-Sea Floor***

Chapter 5 Fluxes of Labile Organic Matter to the Sea Floor 55

Chapter 6 Total Carbohydrate Flux from Sediment Trap Samples 59

Chapter 7 Total Protein Flux from Sediment Trap Samples..... 63

Chapter 8 Total Lipid Flux from Sediment Trap Samples..... 69

Chapter 9 Total DNA from Sediment Trap Samples 75

Chapter 10 Phytopigment Flux from Sediment Trap Samples 81

SECTION III *Deep-Sea Benthic Life*

Chapter 11 Viral Abundance 87

Chapter 12 Prokaryotic Abundance..... 95

Chapter 13 Fluorescence *In Situ* Hybridization and Catalyzed Reporter Deposition for
 Benthic Prokaryote Assemblage Structure 107

Chapter 14 Prokaryotic Abundance by Real-Time PCR 121

Chapter 15 Abundance of Heterotrophic Benthic Protists 131

Chapter 16 Abundance of Benthic Foraminifera..... 141

Chapter 17 Abundance of Metazoan Meiofauna 149

Chapter 18 Macrofaunal Abundance 161

Chapter 19 Megafaunal Abundance 167

SECTION IV *Deep-Sea Benthic Diversity*

Chapter 20 Extraction and Purification of DNA from Marine Sediments Suitable for the
 Analysis of Prokaryotic Diversity 181

Chapter 21 Archaeal Diversity Analysis Using 16S rDNA T-RFLP (Terminal-Restriction
 Fragment Length Polymorphisms)..... 197

Chapter 22 Benthic Bacterial Diversity Based on Cloning and Sequencing of 16S rRNA
 Genes..... 209

Chapter 23 Benthic Bacterial Diversity Analysis Based on ARISA (Automated Ribosomal
 Intergenic Spacer Analysis)..... 223

Chapter 24 Meiofaunal Diversity 235

Chapter 25 Macrofaunal and Megafaunal Diversity 253

Chapter 26 Parameters for the Measurement of Marine Benthic Structural and Functional Diversity 259

SECTION V *Deep-Sea Benthic Functioning*

Chapter 27 Deep-Sea Experiments and Manipulations 269

Chapter 28 Effect of Pressure on Enzymatic Activities, Viral Production, and Prokaryotic Heterotrophic Production 285

Chapter 29 Organic Carbon Remineralization Rates in Marine Surface Sediments 291

Chapter 30 Degradation and Turnover of Organic Matter in Marine Sediments 297

Chapter 31 Extracellular DNA Extraction from Marine Sediments 303

Chapter 32 Degradation of Extracellular DNA in Marine Sediments 311

Chapter 33 Viral Production in Marine Sediments 317

Chapter 34 Determination of Living/Dead and Active/Dormant Bacterial Fractions in Marine Sediments 323

Chapter 35 Prokaryotic Biomass in Marine Sediments 331

Chapter 36 Benthic Prokaryotic Heterotrophic Production Using the Leucine Incorporation Method 337

Chapter 37 Prokaryotic Chemoautotrophic Production in Marine Sediments 343

Chapter 38 Meiofaunal Biomass and Secondary Production 351

Chapter 39 Macrofaunal and Megafaunal Biomass and Biochemical Composition 369

Chapter 40 Protistan Grazing on Benthic Prokaryotes and Viruses 377

Chapter 41 Meiobenthic Predation on Prokaryotes..... 385

Chapter 42 Analysis of Benthic Food Webs and Benthic Trophodynamics..... 393

SECTION VI *Suggested Readings for the Study of Deep-Sea Biodiversity and Ecosystem Functioning*

Suggested Readings 405

Index..... 417
