TABLE OF CONTENTS

Preface v

Section I
LEARNING AND MEMORY AT THE BEHAVIORAL LEVEL

Visual memory in bees
J.L. GOULD (Princeton, U.S.A.) 3

A cognitive action theory of learning
H.L. ROITBLAT (Honolulu, U.S.A.) 13

Developmental change in learning and memory: infantile disposition for unitization
N.E. SPEAR, P.J. KRAEMER, J.C. MOLINA and D.E. SMOLLER (Binghamton, U.S.A.) 27

Symbolic and sub-symbolic models of memory
G. TIBERGHIEN (Grenoble, France) 53

Section II
NEURAL BASES

Pharmacological studies and models of learning and memory
G. CHAPOUTHIER (Gif s/Yvette, France) 69

A view on the memory system of the mammalian brain
J. DELACOUR (Paris, France) 83

The organization of memories into "files"
I. IZQUIERDO, C.A. NETTO, M.L. CHAVES, C. DALMAS, M.E. PEREIRA, M.B. FERREIRA and B. SIEGFRIED (Porto Alegre, Brazil) 105

Neuronal organization of memory functions in animals and humans
R.P. KESNER (Salt Lake City, U.S.A.) 127

Long term memory processing in the human brain: on the influence of individual variations
H.J. MARKOWITSCH (Konstanz, F.R.G.) 153

Mind and memory: between metaphor and molecule
S. ROSE (Milton Keynes, U.K.) 177

EEG research of neural dynamics: implications for models of learning and memory
C.A. SKARDA and W.J. FREEMAN (CREA, Paris, France and Berkeley, U.S.A.) 199

Section III
LEARNING, MEMORY AND BASIC BIOLOGY

Conditioning of immune responses
R. DANTZER and F. CRESTANI (Bordeaux, France) 213

Learning induced gene stimulation: the RNA hypothesis for learning and memory
H. HYDEN and A. CUPELLO (Göteborg, Sweden and Genova, Italy) 227

Molecular memory and sensing chemical signals by enzymes
J. RICARD, J.M. SOULIÉ, J. BUC and N. KELLERSHOHN (Marseille, France) 261

Learning and memory in the immune system: "Know your self"
M. SEMAN (Paris, France) 277

Section IV
BIOLOGY-ORIENTED MODELS

A learning theory using the hierarchic regulators model
P. ANIZAN (CNET, Lannion, France) 299

The use of neural models exhibiting memory domains can account for complex brain phenomena
P. ANNINOS, G. ANOGIANAKIS and M. APOSTOLAKIS (Alexandropoulis and Thessaloniki, Greece) 313

Correlation principle and physiological interpretation of synaptic efficacy
G. CHAUVET (Angers, France) 341

Neural networks and visual pattern recognition
K. FUKUSHIMA (Tokyo, Japan) 365

Mesoscales in neocortex and in C^3 systems
L. INGBER (Monterey, U.S.A.) 387

Trion model of cortical organization and the search for the code of short-term memory and of information processing
G.L. SHAW, D.J. SILVERMAN and J.C. PEARSON (Irvine and Princeton, U.S.A.) 411

Learning by selection using energy functions
P. STOLORZ and G.W. HOFFMANN (Vancouver, Canada) 437

Problems in modelling the nervous system: cerebellar capacity for pattern recognition
J.B. WILLIS (Southampton, U.K.) 453

Section V
PHYSICO-MATHEMATICAL MODELS

Neural networks: Learning rules and memory capacity
M.B. GORDON (Grenoble, France) 465

Independent components analysis in neural networks
J. HERAULT and C. JUTTEN (Grenoble, France) 483

Event horizons in associationist models of memory
B.A. HUBERMAN (Palo Alto, U.S.A.) 499

Neural network with self organization
J.C.S. LEVY and D. MERCIER (Paris, France) 517

Spin models of neural networks: yesterday, today and tomorrow
W.A. LITTLE (Stanford, U.S.A.) 543

Magnetic domains for memories
I.B. PUCHALSKA and G.A. JONES
(Meudon, France and Salford, U.K.) 557

Cellular automata and models of memory
P. RUJAN (Jülich, F.R.G.) 571

A multitude of phases in the ANNNI model
W. SELKE (Jülich, F.R.G.) 597
