

**Deregulation and the Future of
Intercity Passenger Travel**

John R. Meyer and Clinton V. Oster, Jr.

with

**John S. Strong, José A. Gómez-Ibáñez,
Don H. Pickrell, Marni Clippinger, Ivor P. Morgan**

**The MIT Press
Cambridge, Massachusetts
London, England**

Contents

List of Contributors	vii
List of Tables and Figures	ix
Series Foreword	xv
Preface	xvii
1	
A Turning Point in Transportation Policy	1
I	
THE U.S. EXPERIENCE WITH AIRLINE DEREGULATION	
2	
Antecedents and Consequences	9
3	
Airline Financial Performance since Deregulation with John S. Strong	17
4	
The New Entrepreneurs	39
5	
Responses of the Old Guard	55
6	
Productivity, Employment, and Labor Relations	83
7	
The Effect on Travelers: Fares and Service with John S. Strong	109
8	
Changes in Distribution Channels and the Travel Agency Business with Marni Clippinger and John S. Strong	125

9**International Consequences**

137

by Ivor P. Morgan

II**THE ECONOMICS OF COMPETITION IN
INTERCITY PASSENGER TRAVEL****10****The Other Modes: Rail, Bus, and Auto**

161

with José A. Gómez-Ibáñez and Marni Clippinger

11**Toward an Equilibrium in Intercity Travel Choices**

183

by José A. Gómez-Ibáñez and Don H. Pickrell

12**Market Structure, Public Policy, and the Future of Intercity
Passenger Transportation**

205

APPENDIXES**A****Costs of the Various Intercity Modes**

225

by José A. Gómez-Ibáñez

B**Models of Intercity Travel Demand**

249

by Don H. Pickrell

Notes

List of Contributors

Marni Clippinger, Center for Business and Government, Harvard University

José A. Gómez-Ibáñez, Graduate School of Design and Kennedy School of Government, Harvard University

John R. Meyer, Center for Business and Government, Harvard University

Ivor P. Morgan, School of Management, Boston University

Clinton V. Oster, Jr., Transportation Research Center, Indiana University

Don H. Pickrell, Transportation Systems Center, U.S. Department of Transportation

John S. Strong, School of Business Administration, College of William and Mary

List of Tables and Figures

Tables

3.1	Financial results by airline, 1982–1983	20
3.2	Traffic and earnings variations, by carrier groups within the U.S. airline industry, 1973–1984	22
3.3	Effect of recession on operating revenue, expense, and income of the U.S. domestic airline industry, 1980–1983	24
3.4	Effect of traffic forecasting and capacity errors on operating revenue, expense, and income of the U.S. airline industry, 1980–1982	26
3.5	Effect of fuel price increases on operating expense, revenue, and income of U.S. airlines, 1980–1983	28
3.6	Estimated effects of deregulation on traffic, revenue, expense, and operating income of U.S. domestic airlines, 1979–1983	31
4.1	Postderegulation changes in weekly airline service by airport size, June 1, 1978–June 1, 1984	43
4.2	Comparison of various airlines' costs for serving 200-mile markets	51
5.1	1984 capacity shares of major airlines at their primary hubs and change of share between 1978 and 1984	61
5.2	Wide-bodied aircraft capacity as a percent of the domestic fleet by airline 1970–1981	64
5.3	Number of airports served by major airlines, 1976–1984	65
5.4	Airline station changes, October 1978–December 1981	66
5.5	Average daily aircraft departures per station by airline July 1976 and July 1984	67
5.6	Hubs with an increase of 50 or more daily departures, July 1976 to July 1984	71
5.7	Hubs with a decrease of 25 or more daily departures, July 1976 to July 1984	71

5.8 Comparison of fares of new entrants and established carriers in selected markets, August 1982	76
6.1 Percent changes in productivity measures by carrier, 1978–1980	87
6.2 Adjustment equations for productivity measures	88
6.3 Comparison of carrier productivity performance, 1980	93
6.4 Comparison of the productivity of best established carrier and Southwest Airlines	96
6.5 Regression results for the employment model, major carriers, 1970–1982	103
6.6 Percent changes in RPMs and employment due to deregulation, 1979–1982, by airline	106
7.1 Availability and scope of discount fares, 1976, 1981, and 1984	113
7.2 Average coach and discount fares in top 31 markets, first quarter 1981	114
7.3 Service changes in selected markets, 1976–1981, 1981–1984	119
7.4 Business aircraft destinations, 1970 and 1982	123
9.1 Market share of revenue passenger miles, in total international scheduled traffic, 1950–1980	144
9.2 Change in U.S. citizen importance to airlines in markets with the United States	146
9.3 A comparison of growth rates of U.S. liberal bilateral markets with restrictive markets, 1975–1981	147
9.4 U.S. market share in liberal bilateral markets, 1975–1981	148
9.5 Market share of international arrivals and departures at U.S. gateways designated in Bermuda II, 1976 vs. 1981	149
9.6 Direct flight service time gains from new gateways to London and Brussels over previous routing via New York, 1982	150
9.7 Normal economy passenger fares as a ratio of DPFI and SIFL rates for similar distances, 1976–1980	152

9.8	First-class fares as ratio of U.S. SIFL, 1978–1982	153
9.9	Economy fares in several international markets, 1978 and 1982	154
9.10	U.S. carrier international operating: ratios out-of-pocket costs as a percent of total revenues, 1976–1983	156
10.1	Selected railroad passenger operating results, 1923–1967	166
11.1	Relationship of trip purpose to travel mode shares for selected route types, 1977	184
11.2	Relationship of traveler's income to travel mode shares for different trip purposes, 1977	185
11.3	Relationship of travel party size to travel mode shares for different trip purposes, 1977	186
11.4	Hypothetical 1980 and 1995 average traveler's characteristics compared to actual 1977 characteristics	188
11.5	Comparison of simulated 1980 with actual 1977 modal shares	189
11.6	The effects of alternative public policies on modal shares, assuming 1980 traveler's characteristics	191
11.7	The effects of changing demographics on modal shares, assuming 1980 public policies	194
11.8	Comparative highway and railway statistics for the United States, Japan, France, West Germany, and Great Britain, 1980	196
11.9	The effects on modal choice of Japanese or European conditions in a 200-mile travel corridor with 10 million passengers per year	197
A.1	Comparison of distances between selected city-pairs by train, highway, and airline, 1960	227
A.2	Full operating costs for conventional rail passenger service, 1980 dollars	229
A.3	"Deregulated" operating costs for conventional rail passenger service, 1980 dollars	231
A.4	Costs of intercity bus service, 1980 dollars	234

A.5 Costs of using a compact automobile for an intercity trip, 1980	236
A.6 Costs for propeller aircraft, 1980	238
A.7 Costs for jet aircraft, 1980	239
B.1 Airline demand model	250
B.2 Coefficient estimates, sample sizes, and goodness-of-fit measures for intercity travel mode choice models	255
B.3 Direct elasticities of individual mode choice probabilities implied by model coefficient estimates	257
B.4 Predicted mode shifts in response to cost/fare increases	259
B.5 Predicted mode shifts in response to travel time reductions	260

Figures

3.1 Pretax return on investment: airlines vs. nonfinancial corporations, 1972–1985	19
3.2 Coach fares and average yields, 1974–1983	30
3.3 Ratio of airline stock index to composite and transportation indexes, 1977–1985	33
3.4 Airline equity betas and asset betas, averages, 1973–1985	34
4.1 Distribution of changes in weekly departures at nonhubs, September 1978–September 1984	44
5.1 New York to California fare wars of 1980–1981	75
5.2 Fare wars in Dallas markets, 1981–1982	78
6.1 Trends in airline cost indexes, 1972–1980	85
6.2 Changes in ASMs and aggregate productivity, 1979–1980	95
6.3 Simulation of major airlines employment: actual vs. continued regulation, 1970–1982	105
7.1 Fare changes by type of market and type of consumer, 1979–1984	110
7.2 Travelers using discount fares by market rank, 1976–1983	117

7.3 Percent change in monthly flights by number of stops per flight, December 1983 vs. December 1978	120
9.1 Growth in international scheduled aviation, 1950–1980	145
12.1 Market structure of U.S. commercial aviation industry prior to deregulation	210
12.2 Market structure of U.S. commercial aviation industry after deregulation, in the mid-1980s	213
12.3 Market structure of U.S. intercity passenger transportation industry, in mid-1980s	215
A.1 Full costs for a 200-mile trip by conventional rail, air, bus, and auto	241
A.2 Air, auto, bus, and rail full costs at 250,000 passengers per year	243
A.3 Air, auto, bus, and rail full costs plus travel time at 250,000 passengers per year	244
A.4 Air, auto, rail, and bus user-paid costs at 250,000 passengers per year	245
A.5 Air, auto, bus, and rail potential deregulated costs at 250,000 passengers per year	246
