List of Tables	vii
List of Figures	ix
1. Introduction	1
1.1. Plan of the Book	5
✓ 2. Theoretical Framework	9
2.1. Evolutionary Economics	9
2.2. Organizational Ecology	14
2.3. An Integrated Approach: Combining Evolutionary and Ecological Theories	18
2.4. The Evolution of Industrial Systems: Some Hypotheses	22
3. The Computer Industry	35
3.1. The Transistor Period	39
3.2. The Integrated Circuits Period	42
3.3. The LSI and VLSI Period	45
3.4. New Niches: The Super-Computer and PCM Market	46
3.5. Recent Trends: Decline or Rejuvenation?	50
3.6. IBM's Domination of the Industry	56
3.7. Discussion	59
✍ 4. The Telecommunications Industry	65
4.1. The Telephone	66
4.2. The Electronic Vacuum-Tube (Valve) Period	70
4.3. The Transistor Period	72
4.4. Digitalization: An Era of Structural Transformation	74
4.5. Deregulation and Liberalization	77
4.6. Regulation, Deregulation and After	83
4.7. Discussion	87
5. The Semiconductor Industry	93
5.1. The Birth of a New Industry	95
5.2. The Integrated Circuit	99
5.3. The LSI/VLSI Period	103
5.4. Recent International Developments	113
5.5. Discussion	115

6. Technological Convergence: An Empirical Analysis	122
6.1. Research Questions	125
6.2. Hypotheses	126
6.3. Data	128
6.4. Analysis	131
6.5. Discussion	140
7. Inter-Firm Relationships in Major IT Networks	143
7.1. Research Questions	144
7.2. Research Methodology and Data	149
7.3. Historical Patterns of Cooperative Agreements in Major IT Sectors	151
7.4. Networks of Partnerships in Information Technologies	161
7.5. Summary and Discussion	182
8. Internationalization of Corporate Technological Activity	187
8.1. The Internationalization of Corporate Technological Activity	188
8.2. Internationalization of R&D: Some Empirical Trends	189
8.3. International Strategic Technology Alliances	191
8.4. Convergence of Globally Operating Companies	194
8.5. Empirical Patterns of Convergence in Information Technologies	201
8.6. Discussion and Conclusions	209
 9. Summary and Conclusions	213
<i>Appendix I</i>	227
<i>Appendix II</i>	229
<i>Appendix III</i>	233
<i>References</i>	235
<i>Index</i>	257

## Tables

---

2.1	Fitness of organizational forms under different environmental circumstances	18
3.1	Integration of components per chip	46
5.1	Characteristics of transistors and vacuum tubes	95
5.2	Vertical integration in the semiconductor industry	110
5.3	League micro-electronics manufacturers (1945–1990)	118
6.1	Results of the regression analysis on alliances and patents of major computer companies	134
6.2	Results of the regression analysis on alliances and patents of major telecommunications equipment companies	137
6.3	Results of the regression analysis on alliances and patents of major semiconductor companies	139
7.1	Average network densities, degree centrality and betweenness centrality measures (1970–1993)	165
7.2	Network centrality measures in the computer industry (1970–1977)	168
7.3	Network centrality measures in the computer industry (1978–1985)	170
7.4	Network centrality measures in the computer industry (1986–1993)	172
7.5	Network centrality measures in the semiconductor industry (1970–1977)	174
7.6	Network centrality measures in the semiconductor industry (1978–1985)	176
7.7	Network centrality measures in the semiconductor industry (1986–1993)	177
7.8	Network centrality measures in the telecommunications industry (1970–1977)	178
7.9	Network centrality measures in the telecommunications industry (1978–1985)	180
7.10	Network centrality measures in the telecommunications industry (1986–1993)	181
8.1	Foreign subsidiary patenting (1980–1985 and 1986–1991)	191
8.2	Distribution of strategic technology alliances within and between economic blocs (1978–1985 and 1986–1993)	192
8.3	Relative internationalization index of strategic technology partnering in overall information technology (1980–1984 and 1985–1989)	194

8.4 Companies in the population of dataprocessing, telecommunications and semiconductor industries	199
8.5 Wilks' Lambda and univariate F-ratio, dataprocessing	202
8.6 One-way analysis of variance in diversification, dataprocessing	203
8.7 One-way analysis of variance in overall size, dataprocessing	203
8.8 Canonical discriminant functions, dataprocessing	203
8.9 Results of the discriminant analysis, dataprocessing	204
8.10 Wilks' Lambda and univariate F-ratio, telecommunications	205
8.11 Canonical discriminant functions, telecommunications	205
8.12 Results of the discriminant analysis, telecommunications	206
8.13 Wilks' Lambda and univariate F-ratio, semiconductors	206
8.14 One-way analysis of variance in diversification, semiconductors	207
8.15 One-way analysis of variance in technological strength, semiconductors	207
8.16 Canonical discriminant functions, semiconductors	208
8.17 Results of the discriminant analysis, semiconductors	208
9.1 Confirmation or rejection of seven basic hypotheses for three different industry settings	215
9.2 Confirmation or rejection of ten basic hypotheses	221

## Figures

---

2.1	Stages of a population's growth	16
2.2	Non-cumulative pattern of adoption	26
2.3	Patterns of product and process innovations	28
2.4	A shift of the technological paradigm	31
2.5	The effects of a paradigmatic shift on carrying capacity	31
3.1	The von Neumann architecture	37
3.2	Value of shipments of major computer systems (1960–1990)	40
3.3	Price/performance improvements of computer systems	48
3.4	A distributed processing network	51
3.5	Growth of revenues in annual percentages (1986–1992)	53
3.6	Data-processing revenues of major companies (1992)	57
3.7	IBM's market share	58
4.1	Telephone development in the US (1876–1955)	72
4.2	AT&T's organization structure after divestiture	81
4.3	Rental cost of a private leased 64 kilobit/second line (January 1991)	85
5.1	Value of industry shipments of vacuum tubes and transistors (1952–1975)	96
5.2	Military procurement of semiconductors and ICs	103
5.3	World-wide semiconductor market share (1978–1991)	115
6.1	The distribution of patents of leading computer companies (1980–1993)	132
6.2	The distribution of strategic technology alliances of leading computer companies (1980–1993)	133
6.3	The distribution of patents of leading telecommunication equipment companies (1980–1993)	135
6.4	The distribution of strategic technology alliances of leading telecommunications equipment companies (1980–1993)	136
6.5	The distribution of patents of leading semiconductor companies (1980–1993)	138
6.6	The distribution of strategic technology alliances of leading semiconductor companies (1980–1993)	139
7.1	Number of cooperative technology agreements	150
7.2	Number of newly established strategic technology alliances in IT sectors (1971–1992)	151
7.3	Number of newly established strategic technology alliances in various sub-fields (1971–1992)	152

7.4	Non-equity agreements in information technologies (1980–1992)	156
7.5	Distribution of motives for strategic technology alliances (1980–1988)	159
7.6	Alliances in the computer industry (1970–1977)	167
7.7	Alliances in the computer industry (1978–1985)	170
7.8	Alliances in the computer industry (1986–1993)	171
7.9	Alliances in the semiconductor industry (1970–1977)	173
7.10	Alliances in the semiconductor industry (1978–1985)	175
7.11	Alliances in the semiconductor industry (1986–1993)	176
7.12	Alliances in the telecommunications industry (1970–1977)	178
7.13	Alliances in the telecommunications industry (1978–1985)	179
7.14	Alliances in the telecommunications industry (1986–1993)	182
