PREFACE	xi
PART I: THE CHALLENGE OF TEACHING THINKING	
1. INTRODUCTION	3
2. ASPECTS OF INTELLECTUAL COMPETENCE	8
1. What is Intelligence?	8
<i>The ability to classify patterns</i>	9
<i>The ability to modify behavior adaptively—to learn</i>	9
<i>The ability to reason deductively</i>	10
<i>The ability to reason inductively—to generalize</i>	10
<i>The ability to develop and use conceptual models</i>	11
<i>The ability to understand</i>	12
2. Some Conceptions of Differential Intelligence	14
3. The Assessment of Intelligence	23
<i>Some sociological factors behind the idea and practice of mental testing</i>	23
<i>Forerunners and pioneers of mental testing</i>	24
<i>Components of early tests</i>	27
<i>Summary</i>	27
4. Cognitive Development	29
5. Efforts to Increase Intelligence Through Training	36
6. Summary	42

3.	SOME PERSPECTIVES ON THINKING	44
1.	Thinking Ability as a Skill or Collection of Skills	45
2.	Bartlett's View	46
3.	Thinking Skills versus Knowledge	48
4.	Some Dichotomies	50
5.	What Limits Thinking?	51
	<i>Encoding, operations, goals</i>	51
	<i>Style, know-how, load, abilities</i>	52
	<i>Rule-based versus model-based behavior</i>	54
	<i>Implicit and explicit know-how</i>	56
	<i>Generality versus context-boundedness</i>	57
6.	Can Thinking Skills be Taught?	59
7.	Summary	61
4.	PROBLEM SOLVING, CREATIVITY AND METACOG- NITION	64
1.	Problem Solving	64
	<i>What is problem solving?</i>	65
	<i>The identification of problem-solving strategies</i>	68
	<i>Some problem-solving heuristics</i>	74
	<i>Implications for the teaching of thinking</i>	85
2.	Creativity	86
	<i>Definitions of the creative and creativity</i>	87
	<i>Components of creativity</i>	89
	<i>Implications for the teaching of thinking</i>	100
3.	Metacognition	100
	<i>Some examples of metacognitive skills</i>	103
	<i>Accessibility as a metacognitive skill</i>	107
	<i>Implications for the teaching of thinking</i>	109
4.	Summary	109
5.	ERRORS AND BIASES IN REASONING	111
1.	Errors in Deductive Reasoning	111
	<i>Nature of deductive reasoning</i>	111
	<i>Using criteria other than validity</i>	112
	<i>Errors due to difficult terms</i>	115
	<i>Altering the representation</i>	116
	<i>Summary</i>	118
2.	Errors in Inductive Reasoning	118
	<i>Nature of inductive thinking</i>	118

	<i>Biases in drawing a sample</i>	119
	<i>Biases in relating a sample to a hypothesis</i>	124
	<i>Biases in forming new hypotheses</i>	127
	<i>Summary</i>	129
3.	Reasoning Errors Due to Social Factors	130
	<i>Favoritism in evaluating hypotheses in which one has a vested interest</i>	131
	<i>Evaluating people rather than hypotheses</i>	134
	<i>Summary</i>	135
4.	Failures to Elaborate a Model of a Situation	136
	<i>Measuring the quality of informal reasoning</i>	136
	<i>Common errors in informal reasoning</i>	137
	<i>Failures of elaboration</i>	138
5.	Summary	140
6.	Summary for Part I	140

PART II: APPROACHES TO TEACHING THINKING

6.	COGNITIVE OPERATIONS APPROACHES	147
1.	The Instrumental Enrichment Program	147
	<i>Feuerstein's concept of intelligence and its assessment</i>	148
	<i>Cognitive modifiability and the importance of mediated learning</i>	149
	<i>Cognitive structure, deficient cognitive functions and cognitive maps</i>	151
	<i>Specifics of the program</i>	153
	<i>Evaluation of the program</i>	155
2.	The Structure of Intellect Program	161
	<i>The theoretical basis for the program</i>	161
	<i>Content of the program</i>	163
	<i>Evaluation</i>	166
3.	Science ... A Process Approach	169
	<i>Specifics of the program</i>	169
	<i>Klausmeier's work with SAPA material</i>	170
4.	ThinkAbout	172
	<i>Content of the program</i>	173
	<i>A program cluster</i>	174
	<i>Evaluation</i>	175
5.	BASICS	176
	<i>Content of the program</i>	176

viii CONTENTS

	<i>Evaluation</i>	179
6.	Project Intelligence	181
	<i>Background</i>	181
	<i>The course</i>	182
	<i>The teacher's manual</i>	182
	<i>Evaluation</i>	185
7.	The Cognitive Operations Approach in General	187
7.	HEURISTICS ORIENTED APPROACHES	190
1.	Patterns of Problem-Solving	191
	<i>The course</i>	191
	<i>The book</i>	193
2.	Schoenfeld's Heuristic Instruction in Mathematical Problem Solving	195
	<i>Instruction in heuristics</i>	196
	<i>The importance of a managerial strategy</i>	197
	<i>A further evaluation study</i>	200
3.	A Practicum of Thinking	203
	<i>Contents of the program</i>	203
	<i>Evaluation studies</i>	205
4.	The Cognitive Studies Project	206
	<i>The Whimbey and Lochhead approach</i>	206
	<i>Observations about the project</i>	207
5.	The Productive Thinking Program	209
	<i>The program</i>	209
	<i>Formal tests</i>	211
6.	Lateral Thinking and the CoRT Program	214
	<i>Overview of the CoRT program</i>	215
	<i>Evidence for the effectiveness of CoRT</i>	217
7.	Problem-Based Self Instruction in Medical Problem Solving	220
8.	The Heuristics Approach in General	225
8.	FORMAL THINKING APPROACHES	227
1.	ADAPT (Accent on the Development of Abstract Processes of Thought)	231
	<i>Description</i>	231
	<i>Evaluation</i>	233
2.	DOORS (Development of Operational Reasoning Skills)	234
	<i>Description</i>	234
	<i>Evaluation</i>	235
3.	COMPAS (Consortium for Operating and Managing Programs for the Advancement of Skills)	237

	<i>Description</i>	237
	<i>Evaluation</i>	238
4.	SOAR (Stress on Analytical Reasoning)	239
	<i>Description</i>	239
	<i>Evaluation</i>	240
5.	DORIS (Development of Reasoning in Science)	241
	<i>Description</i>	241
	<i>Evaluation</i>	242
6.	Formal-Thinking Programs in General	245
9.	THINKING THROUGH LANGUAGE AND SYMBOL MANIPULATION	248
1.	Language in Thought and Action	248
2.	Writing as an Occasion for Thinking	251
	<i>The demands of writing</i>	251
	<i>The pedagogy of writing</i>	254
3.	Writing as a Means of Thinking	258
4.	Universe of Discourse	260
	<i>Instructional approach</i>	261
	<i>Evaluation</i>	263
5.	Modeling Inner Speech and Self Instruction as a Means of Teaching Thinking	265
6.	LOGO and Procedural Thinking	269
	<i>The LOGO language and early uses</i>	269
	<i>Turtle geometry</i>	271
	<i>LOGO with the handicapped</i>	273
	<i>Evaluation</i>	274
7.	The Language Approach in General	278
10.	THINKING ABOUT THINKING	280
1.	The Philosophy for Children Program	280
	<i>Children as natural philosophers</i>	281
	<i>The general approach</i>	282
	<i>The program</i>	283
	<i>Evaluation</i>	286
2.	The Anatomy of Argument	290
3.	Metacognitive Skills	294
	<i>Self monitoring for reading comprehension</i>	295
	<i>Metamemory</i>	296
	<i>Metacognition and transfer of training</i>	299

x CONTENTS

<i>Summary</i>	302
4. The Complete Problem Solver	302
5. The "Thinking About Thinking" Approach in General	306
6. Summary for Part II	308

PART III: PROSPECTS FOR TEACHING THINKING

11. EVALUATION	313
1. Purposes of Evaluation	313
2. Obstacles to Evaluation	315
3. Performance Measures and Tests	316
4. Some Neglected Issues	318
<i>Statistical versus practical significance</i>	318
<i>Direct versus indirect, or primary versus secondary, effects</i>	319
<i>Short-term versus long-term effects</i>	319
<i>The need to assess goals</i>	320
<i>The need to assess negative effects</i>	321
<i>The possibility of premature closure</i>	321
12. PROSPECTS FOR TEACHING THINKING	323
1. Is the Teaching of Thinking a Legitimate Educational Objective?	323
2. Ingredients of Success	326
<i>The Teacher</i>	326
<i>Teacher acceptance of the program</i>	327
<i>Objectives, instructional procedures, and evaluation procedures</i>	329
<i>Time on task</i>	333
<i>Transfer</i>	335
<i>Conducive Environments</i>	336
<i>Motivation</i>	337
<i>Attitudes</i>	339
3. Some Recommendations	340
<i>On selecting programs</i>	341
<i>On implementation of any program</i>	342
4. Risks	343
