

Microbial Production of Biopolymers and Polymer Precursors

Applications and Perspectives

Edited by Bernd H. A. Rehm

Institute of Molecular BioSciences
Massey University
Palmerston North
New Zealand

Contents

	List of contributors	v
	Preface	ix
1	Xanthan Biosynthesis by <i>Xanthomonas</i> Bacteria: an Overview of the Current Biochemical and Genomic Data	1
	Anke Becker and Frank-Jörg Vorhölter	
2	Microbial Production of Alginate: Biosynthesis and Applications	13
	Uwe Remminghorst and Bernd H. A. Rehm	
3	Bacterial Cellulose Production: Biosynthesis and Applications	43
	Svein Valla, Helga Ertesvåg, Naoto Tonouchi and Espen Fjærvik	
4	Cyanophycin: Biosynthesis and Applications	79
	Ahmed Sallam, Anna Steinle and Alexander Steinbüchel	
5	Biosynthesis and Application of Poly(γ-glutamic acid)	101
	Ing-Lung Shih and Jane-Yii Wu	
6	Levan: Applications and Perspectives	145
	Soon Ah Kang, Ki-Hyo Jang, Jeong-Woo Seo, Ki Ho Kim, Young Heui Kim, Dina Rairakhwada, Mi Young Seo, Jae Ok Lee, Sang Do Ha, Chul Ho Kim and Sang-Ki Rhee	
7	Microbial Hyaluronic Acid Biosynthesis	163
	Esteban Marcellin, Wendy Chen and Lars Keld Nielsen	
8	Fermentative Production of Organic Acids for Polymer Synthesis	181
	Sang Yup Lee, Yu Kyung Jung, Hyohak Song, Ji Mahn Kim and Jin Hwan Park	
9	Metabolic Engineering of Microorganisms for Oligosaccharide and Polysaccharide Production	197
	Anne Ruffing and Rachel Ruizhen Chen	

10	Microbial Exopolysaccharides: Variety and Potential Applications	229
	Anita Suresh Kumar and Kalpana Mody	
11	Polyhydroxyalkanoates: from Bacterial Storage Compound via Renewable Plastic to Bio-Bead	255
	Katrin Grage, Verena Peters, Rajasekaran Palanisamy and Bernd H. A. Rehm
