

EVOOLUTION AND LEARNING

Edited by
ROBERT C. BOLLES
MICHAEL D. BEECHER
University of Washington

LAWRENCE ERLBAUM ASSOCIATES, PUBLISHERS
1988 Hillsdale, New Jersey London

Contents

Preface ix

1. **Nativism, Naturalism, and Niches** 1
Robert C. Bolles
 - The Empiricist Background 1
 - Nativism 2
 - Learning Theory 4
 - Naturalism 8
 - Niches 12
 - References 14

2. **Darwin was a Learning Theorist** 17
Rodrigo Garcia y Robertson and John Garcia
 - Darwin's Lamarckian Theory of Habit 20
 - Corporeal Structures, Instincts and Habits 24
 - The Darwin-Wallace Conditioning Theory 29
 - Pavlov, Thorndike and the Latter-Day
Adaptivists 32
 - References 36

3. **Evolution and Learning Before Thorndike: A
Forgotten Epoch in the History of Behavioral
Research** 39
Bennett G. Galef, Jr.
 - Darwin and Wallace: The Controversy 40
 - Darwinism in 19th Century Perspective 41
 - Views of Phylogeny: Darwin and Spencer 43
 - Georges Romanes: Darwin's Disciple? 45
 - The Origins of Instinct 49
 - Gemmules Vs. Germ-Plasm 1: August Weismann 52
 - Gemmules Vs. Germ-Plasm 2: C. L. Morgan 53
 - Conclusions 56
 - References 57

4. Learning as Inference	59
<i>J. E. R. Staddon</i>	
Laboratory Learning	61
Learning in Natural Situations	71
Conclusion	75
References	76
5. Learning and Adaptation in Food-Storing Birds	79
<i>David F. Sherry</i>	
The Adaptive Use of Learning	79
Adaptive Specialization in Learning Mechanisms	86
Questions about Learning and Adaptation	88
Conclusions	91
References	92
6. A Comparison of Taste Aversion Learning in Humans and Other Vertebrates: Evolutionary Pressures in Common	97
<i>A. W. Logue</i>	
The Unusual Properties of Taste Aversion Learning	98
Taste Aversion Learning in Humans and Other Species	99
The Effects of Evolution on Learning	108
Conclusion	111
References	112
7. A Comparative-Ecological Approach to the Study of Learning	117
<i>Alan C. Kamil and John E. Mauldin</i>	
Autoshaping in Three Passerine Species	118
Stay and Shift Learning in Hummingbirds	123
Research Tactics	127
References	131

- 8. The Phylogeny of Information Processing** **135**
Roger T. Davis and James D. Dougan
- Introduction 135
 Evolutionary Origins of Rehearsal 137
 Species Differences 140
 Components of Rehearsal 151
 Summary 151
 References 153
- 9. Contrasting Styles of Song Development and Their Consequences Among Passerine Birds** **157**
Donald E. Kroodsma
- Introduction 157
 Vocal Behavior and Its Development Among Suboscines 158
 Vocal Behavior and its Development Among Oscines 163
 Discussion 178
 References 180
- 10. A Functional Behavioristic Approach to Aversively Motivated Behavior: Predatory Imminence as a Determinant of the Topography of Defensive Behavior** **185**
Michael S. Fanselow and Laurie S. Lester
- The Predatory Imminence Continuum 187
 Pre-Encounter Defensive Behavior 188
 Post-Encounter Defensive Behavior 191
 Circa-Strike Defensive Behavior 202
 Recuperation and the Return to the Preferred Activity Pattern 205
 Temporal and Spatial Aspects of Predatory Imminence 206
 References 209

11. Reproductive Behavior: A Potential Model System for Adaptive Specializations in Learning	213
<i>Michael Domjan and Karen L. Hollis</i>	
Evidence of Learning in Animal Reproductive Behavior	215
Methodological Problems and Opportunities	222
Critical Variables in Adaptive Specializations in Sexual Learning	226
Implications for General Process Learning Theory	230
References	232
12. Some Comments on the Adaptationist Approach to Learning	239
<i>Michael D. Beecher</i>	
Points of Consensus	239
Points of Concern: Difficulties with the Adaptationist Approach	241
An Illustrative Example: Parent-Offspring Recognition	243
Conclusions	246
References	248
Author Index	249
Subject Index	259
