Contents

	List of Contributors	v
	Preface	ix
1	Metagenomics and Ecosystems Biology: Conceptual Frameworks, Tools and Methods Jianping Xu	1
2	Beyond Metagenomics: Integration of Complementary Approaches for the Study of Microbial Communities Andrés Cubillos-Ruiz, Howard Junca, Sandra Baena, Ivonne Venegas and María Mercedes Zambrano	15
3	Horizontal Gene Transfer in Prokaryotic Microbiobial Communities Javier Tamames and Alex Mira	39
4	Analysis of Complex Microbial Communities through Metagenomic Survey María-Eugenia Guazzaroni, Peter N. Golyshin and Manuel Ferrer	55
5	Public Data Resources as a Foundation for a Worldwide Metagenomics Data Infrastructure Guy Cochrane, Maria Jesus Martin and Rolf Apweiler	79
6	The Potential for Investigation of Plant–Microbe Interactions using Metagenomics Methods Trevor C. Charles	107
7	Application of Metagenomics to Bioremediation Isabelle George, Benoît Stenuit and Spiros Agathos	119
8	Applications of Metagenomics for Industrial Bioproducts Dominic W. S. Wong	141
9	Archaeal Metagenomics: Bioprospecting Novel Genes and Exploring New Concepts Alexander M. Cardoso, Maysa M. Clementino, Ricardo P. Vieira, Janaína J.V. Cavalcante, Rodolpho M. Albano and Orlando B. Martins	159

10	Metagenomics and its Applications to the Study of the Human Microbiome	171
	Karen E. Nelson and Bryan A. White	
11	Philosophical Themes in Metagenomics	183
	Maureen A. O'Malley and John Dupré	
	Index	209
	Colour Plate
