Contents

<i>Preface</i>	vii
<i>List of contributors</i>	ix
Part I Models and methodology	1
<i>Introduction</i>	2
1 Processing resources and attention <i>C.D. Wickens</i>	3
2 A review of the engineering models of information-processing and decision-making in multi-task supervisory control <i>K.R. Pattipati and D.L. Kleinman</i>	35
3 Modeling the acquisition of dual-task skill in a connectionist/control architecture <i>M. Detweiler and W. Schneider</i>	69
4 Dual-task methodology: Some common problems <i>D.L. Damos</i>	101
Part II Learning and performance	121
<i>Introduction</i>	122
5 Issues for acquisition and transfer of timesharing and dual-task skills <i>G. Lintern and C.D. Wickens</i>	123
6 Multiple cue probability learning and the design of information displays for multiple tasks <i>V.G. Cuqlock-Knopp, C.A. Wilkins and W.S. Torgerson</i>	139
7 Vigilance and monitoring for multiple signals <i>A. Craig</i>	153
8 Motor constraints in dual-task performance <i>H. Heuer</i>	173
Part III Mental workload	205
<i>Introduction</i>	206
9 Workload assessment in multi-task environments <i>F.T. Eggemeier, G.F. Wilson, A.F. Kramer and D.L. Damos</i>	207

10	Performance-based and subjective assessment of workload in multi-task environments <i>F.T. Eggemeier and G.F. Wilson</i>	217
11	Physiological metrics of mental workload: A review of recent progress <i>A.F. Kramer</i>	279
12	Psychophysiological assessment of workload in multi-task environments <i>G.F. Wilson and F.T. Eggemeier</i>	329
Part IV Individual differences		361
	<i>Introduction</i>	362
13	Individual differences in multiple-task performance <i>J.B. Brookings and D.L. Damos</i>	363
14	Aging, divided attention, and dual-task performance <i>J. McDowd, M. Vercruyssen and J.E. Birren</i>	387
15	Development of skilled performance: An age-related perspective <i>A.D. Fisk and W.A. Rogers</i>	415
	<i>Glossary</i>	445
	<i>Index</i>	460
