Advances in Turbulence IX

Proceedings of the Ninth European Turbulence Conference, held in Southampton, U.K., July 2–5 2002

Edited by:

I. P. CASTRO
School of Engineering Sciences, University of Southampton, UK

P. E. HANCOCK
School of Engineering, University of Surrey, UK

T. G. THOMAS
School of Engineering Sciences, University of Southampton, UK

Editorial Advisory Committee:
K. Bajer, G. Coleman, Y. Coulder, H. Fernholz, G. J. von Heijst, L. Kleiser, A. Johansson, D. Ronneberger, R. Piva, C. Vassilicos and M. Wright

A publication of CIMNE.

International Center for Numerical Methods in Engineering (CIMNE) Barcelona, Spain

TECHNISCHE INFORMATIONSBIBLIOTHEK
UNIVERSITÄTSBIBLIOTHEK HANNOVER

Contents

PREFACE xxiii

Invited Lecture

Transition to turbulence in open flows: what linear and fully nonlinear local and global theories tell us. 3
J.-M. Chomaz

I Instabilities & Transition (1)

Fully nonlinear waves and transition in the boundary layer over a rotating disk 13
P. Benoît

Numerical simulations of transition in a boundary layer under free-stream turbulence 17
L. Brandt, P. Schlatter and D. S. Henningson

A new parametric instability in rotating cylinder flow 21
L. Graftieaux, L. Le Penven, J. F. Scott and N. Grosjean

II Two-phase Flows (1)

Particle response in a turbulent pipe flow 27
A. Granados, A. Crespo and J. García

Inertial particles in random flows 31
J. Bec and K. Domelevo

Effects of inertia on droplet dispersion in turbulent liquid-liquid systems 35
P. Vedula, R. Delfos and F.T.M. Nieuwstadt

III Intermittency & Scaling (1)

Numerical analysis of existence of Extended Self-Similarity in Burgers' turbulence 41
I.I. Wertgeim and V.G. Zakharov

Conditional statistics of the velocity increments in fully-developed turbulence. 45
A. Naert and P. Marcq

The Kolmogorov constant, intermittency and scaling 49
B.R. Pearson, G.R. Johnson and P.-Å. Krogstad

IV Acoustics & Turbulence (1)

Noisy convection: wave excitation due to velocity inhomogeneities 55
A. G. Tevzadze, G. D. Chagelishvili and M. Goossens

Study of the transducer size effect on wall pressure spectra using DNS 59
Z.W. Hu, C.L. Morfey and N.D. Sandham

Separation control by flow-induced oscillations of a resonator 63
F. Urzynicok and H.-H. Fernholz

Invited Lecture

Control of turbulent boundary layers 69
John Kim

V DNS/LES (1)

The swept backward-facing step with an upstream turbulent boundary layer 73
H.-J. Kaltenbach

DNS of swirling flow past a sphere 77
M. Giacobello, K. Higgins, A. Ooi, M.S. Chong and S. Balachandar

DNS of fractal forced turbulence 81
B. Mazzi and J.C. Vassilicos

DNS and new scaling laws of a turbulent channel flow rotating about the mean flow direction 85
T. Murakhtina and M. Oberlack

Direct numerical simulations of viscoelastic turbulent channel flow close to maximum drag reduction 89
P.K. Ptasinski, F.T.M. Nieuwstadt and B.J. Boersma

VI Structures & Vortex Dynamics (1)

Origin of periodic vortices at laminar boundary layer separation 95
A.V. Dovgal and A.M. Sorokin

Decomposition of turbulent fields using wavelets: an *a priori* investigation 99
P. Subbareddy and I. Marusic

Wavelet scale-angle analysis of hydrodynamic irregular patterns similar to Voronoi tesselations 103
V.G. Zakharov and I.I. Wertgeim

The evolution of hairpin vortices in sub-critical air channel flow 107
A. Svizher and J. Cohen

Local spectra in plane channel flow using wavelets designed for the interval 111
M. Uhlmann and J. Fröhlich

VII Transport & Mixing (1)

Structure and dynamics of the scalar field with a mean gradient in isotropic turbulence 117
G. Brethouwer, J.C.R. Hunt and F.T.M. Nieuwstadt

Evolution of a scalar gradient in a 2D flow under influence of vorticity, strain and molecular diffusion 121
G. Godard, M. Gonzalez and P. Paranthoën

Stretching rate of material surfaces in isotropic turbulence 125
S. Goto and S. Kida

The relationship between fluctuating scalar gradients and the flow topology of homogeneous isotropic turbulence 129
P.L. O'Neill and J. Soria

Scalar dispersion in turbulent channel flow 133
R. Lavertu and L.B. Mydlarski

Writing passive tracers in turbulent air 137
T. Elenbaas, W. van de Water, N. Dam and J.J. ter Meulen

VIII Miscellaneous (1)

Buoyancy effects on turbulent flow and heat transfer in a vertical plane passage 143
J. Wang, J. Li and J.D. Jackson

Direct assessment of the turbulent kinetic energy transport equation for a complex flow 147
F. G. Schmitt, B. Merci, Ch. Hirsch and E. Dick

Kolmogorov spectra of weak turbulence in media with two types of interacting waves 151
F. Dias, P. Guyenne and V.E Zakharov

A second-moment closure for turbulent flows subjected to magnetic field of arbitrary orientation 155
S. Kenjereš, K. Hanjalić and D. Bal

Rayleigh-Bénard cells: influence of the plates' properties 159
S. Chaumat, B. Castaing and F. Chillà

Prandtl and wall effects in hard turbulence convection 163
P.-E. Roche, B. Attias, B. Castaing, B. Chabaud, B. Hébral and J. Sommeria

Invited Lecture

Sound generation by turbulence 169
A.P. Dowling

IX Structures & Vortex Dynamics (2)

Experimental attempt for controlling the large-scale rotating spiral vortex 173
I.V. Kolesnichenko, G.V. Levina and A.N. Sukhanovsky

Three-dimensional vorticity measurements in the near wake of a circular cylinder 177
T. Zhou, M.W. Yiu, Y. Zhou and L.P. Chua

Numerical study of the near wake behind two side-by-side cylinders 181
L. Chen, J. Tu, Y. Zhou and B. Anderson

Experimental and numerical investigation of the 3D intermediate wake topology for a square cylinder 185
A. Dobre, J. D. Kim and H. Hangan

Merging of co-rotating vortices 189
C. Cerretelli and C.H.K. Williamson

X DNS/LES (2)

The effect of SGS models on the vortical structures computed from Large-Eddy Simulations 195
C.B. da Silva

A new treatment of commutation-errors in large-eddy simulation 199
A.W. Vreman and B.J. Geurts

A two-level simulation methodology for LES of high Reynolds number flows 203
K. Kemenov and S. Menon

Large Eddy Simulation of melt convection during Czochralski crystal growth 207
V.V. Kalaev and A.I. Zhmakin

Depth-averaged Large Eddy Simulation of shallow water flows – modelling aspects 211
C. Hinterberger, J. Fröhlich and W. Rodi

XI Geophysical Turbulence (1)

DNS of turbulent heat transfer in Ekman layer with stable stratification 217
K. Shingai and H. Kawamura

Modelling of momentum and scalar fields in a circulation flow above an area heat source in a stably stratified environment 221
A.F. Kurbatskii

On the instability of Ekman boundary flow. Helicity accounting. 225
O.G. Chkhetiani, V.M. Ponomarev and A.A. Khapaev

Wave/Vortex decomposition in rotating stratified turbulence 229
H. Hanazaki

Numerical simulations of thermal convection in ultra-turbulent range: a new insight into near-wall structures 233
S. Kenjereš and K. Hanjalić

XII Turbulence Control (1)

Feedback control of channel flow 239
O.R. Tutty, L. Baramov, E. Rogers and E.J. O'Dea

Measurement and control of the flow in a plane asymmetric diffuser 243
O. Törnblom, B. Lindgren and A.V. Johansson

Drag reduction by the interaction of coherent structure with strands of entangled polymers in turbulent flow 247
T. Murata and Y. Hagiwara

A passive mechanism of turbulence control in jet mixing layers 251
J.F. Olsen

XIII Acoustics & Turbulence (2)

Reconstruction of large-scale structures and acoustic radiation from a turbulent M=0.9 jet using proper orthogonal decomposition 257
T. Colonius and J.B. Freund

A new method of investigation of acoustic characteristics of turbulent jets 261
V.F. Kopiev, M.Yu. Zaitsev and A.N. Kotova

Spectral vorticity and sound scattering 265
C. Poulain, P. Gervais, C. Baudet, Y. Gagne, C.R. Koudella and E. Lévêque

On mechanisms of sound radiation in a supersonic jet with complicated cross-section geometry 269
N.N. Ostrikov, V.F. Kopiev, S.A. Chernyshev and J.W. Elliott

XIV Intermittency & Scaling (2)

Bolgiano scaling in a 3D convective cell 275
F. Toschi, E. Calzavarini and R. Tripiccione

Very high Reynolds number turbulence with low-temperature gaseous helium 279
S. Piétropinto, C. Poulain, C. Baudet, B. Castaing, B. Chabaud, Y. Gagne, P. Gervais, B. Hébral, Y. Ladam, P. Lebrun and O. Pirotte

Combined grid-shell approach for convection problem in a spherical layer 283
M. Reshetnyak, P. Frick and D. Sokoloff

Intermittency in stratified turbulence produced by breaking internal gravity waves 287
P. Bouruet-Aubertot, J. Sommeria and C.R. Koudella

Invited Lecture

Intermittency and universality in turbulence 293
L. Biferale, G. Boffetta, A. Celani, A. Lanotte, F. Toschi and M. Vergassola

XV Intermittency & Scaling (3)

Effect of helicity transfer on the formation of small-scale turbulence spectrum 303
E. Golbraikh, A. Eidelman and S.S. Moiseev

Effect of dilute polymer solutions on dissipation range quantities in bulk turbulence 307
A. Crawford, N. Mordant, A. La Porta and E. Bodenschatz

Scale by scale budget and similarity laws for homogeneous shear flow 311
P. Gualtieri, C.M. Casciola, R. Benzi and R. Piva

The small-scale structure of homogeneous shear turbulence 315
A.D. Staicu and W. van de Water

On the universality of small scale turbulence 319
J. Peinke, Ch. Renner, M. Karth, M. Siefert and R. Friedrich

XVI DNS/LES (3)

Large scale structures and transitional behaviours of high *Ra* number turbulent thermal convection 325
R. Verzicco and R. Camussi

Large-eddy simulation of a hot round jet; assessment of subgrid scale modeling 329
C. Ferreira Gago, F. Garnier and F. Utheza

Langevin models of turbulence: RNG, DSTA or RDT? 333
J.-P. Laval, B. Dubrulle and J.C. McWilliams

Leray simulation of turbulent shear layers 337
B.J. Geurts and D.D. Holm

Coherent Vortex Simulation of a three dimensional temporally developing turbulent mixing layer 341
G. Pellegrino, K. Schneider and M. Farge

XVII Compressible Turbulence

Structure and performances of supersonic compressible boundary layer 347
M. Goldfeld

Direct numerical simulation of reacting corner plumes 351
K.H. Luo and X. Jiang

Influence of convective Mach number on the structure of a temporal mixing layer 355
A. Beer and M. Lesieur

DNS of high-speed compressible channel flows 359
Q. Li, N.D. Sandham and G.N. Coleman

XVIII Two-phase Flows (2)

Issues on the practical application of microbubbles to full-scale ships for skin friction reduction 365
Y. Kodama, A. Kakugawa, T. Takahashi and S. Nagaya

On the hydrodynamics of a turbulent suspension 369
G. Ooms, C. Poelma and J. Westerweel

Lagrangian tracking of polymers in wall turbulence 373
E. De Angelis, C.M. Casciola and R. Piva

Turbulence modification by particles in a vertical grid-turbulence facility 377
C. Poelma, G. Ooms and J. Westerweel

The rheological behaviour of small fibres in turbulent channel flow 381
M. Manhart

XIX DNS/LES (4)

DNS of a turbulent channel flow with different rough walls 387
S. Leonardi, P. Orlandi, L. Djenidi and R.A. Antonia

Large Eddy Simulation of flow in a 2:1 aspect ratio rectangular duct 391
H. Xu, M. Khalid and A. Pollard

Analytical study and DNS of turbulent Couette-Poiseuille flow with uniform transpiration 395
I.I. Vigdorovich, Z.W. Hu and G.N. Coleman

A study of turbulence thermal structure in a channel flow through DNS up to $Re_\tau = 640$ with $Pr = 0.025$ and 0.71 399
H. Abe and H. Kawamura

DNS of the very large anisotropic scales in a turbulent channel 403
Juan C. del Álamo and J. Jiménez

XX Structures & Vortex Dynamics (3)

Vortex structure in a plane jet excited by bimodal waves 409
N. Sekishita and H. Makita

Turbulent wake stabilization in MHD flows 413
H. Branover, A. Eidelman, E. Golbraikh, A. Kapusta and B. Mikhailovich

Forcing terms to simulate α-like effects in thermoconvective turbulence 417
G.V. Levina and I.A. Burylov

Precessing vortex structures in flow within rotor-stator disc cavities: DNS and Visualization Studies 421
E. Serre, O. Czarny, H. Iacovides, P. Bontoux and B. Launder

Measuring free surface turbulence 425
R. Savelsberg, G.J.F. van Heijst, H.J.H. Clercx and W. van de Water

Coherent structures in interfacial turbulence 429
S. Solbakken, H.I. Andersson and E. Fontaine

Invited Lecture

Strongly stratified turbulence: A special type of motion 435
E. Lindborg

XXI Geophysical Turbulence (2)

Large scale turbulence properties in the flows with vortical filaments and sheets 445
A. Eidelman and S.S. Moiseev

Regular structure of small–scale turbulence in forced impinging jet 449
S. Alekseenko, A. Bilsky, O. Heinz, B. Ilyushin, D. Markovich and V. Vasechkin

Angular momentum in forced 2D turbulence on a bounded square domain 453
D. Molenaar, H.J.H. Clercx and G.J.F. van Heijst

Evolution of turbulent convective entrainment in heterogeneously versus linearly stratified fluids 457
E. Fedorovich and R. Conzemius

Growth of error in quasi-isotropic turbulent flow 461
U. Burr, M. Kholmyansky, W. Kinzelbach, B. Lüthi, M. Ortenberg and A. Tsinober

XXII Structures & Vortex Dynamics (4)

Turbulence structure in vortex formation region behind cylinder in lock-on conditions 467
A. Jarża and M. Podolski

Coherent Vortex Simulation (CVS) 471
of an impulsively started cylinder at Re=3000 using an adaptive wavelet method with penalisation
K. Schneider and M. Farge

Generation and nonlinear evolution of unstable shear flows in plasmas and fluids 475
C.N. Lashmore-Davies, D.R. McCarthy and A. Thyagaraja

On Burgers' vortex: the missing mechanism 479
C. Nore, B. Andreotti, S. Douady and M. Abid

Concentrated vortex in a Poiseuille flow 483
K. Bajer, A.P. Bassom and A.D. Gilbert

XXIII Miscellaneous (2)

On a high-resolving LCA – Laser Cantilever Anemometer 489
S. Barth, S. Schlüter, S. Lück and J. Peinke

The statistics of injected power in a constant-torque-forcing turbulent flow 493
J.H.C. Titon and O. Cadot

DNS and scaling laws from new symmetry groups of turbulent boundary layer with zero pressure gradient 497
G. Khujadze and M. Oberlack

Far downstream development of POD modes in a turbulent disk wake 501
P.B.V Johansson and W.K. George

Regularization opportunities in the adjoint analysis of multiscale systems 505
B. Protas and T. R. Bewley

XXIV Geophysical Turbulence (3)

Mesoscale plasma turbulence, zonal flows and transport barrier dynamics 511
A. Thyagaraja, P.J. Knight and N. Loureiro

The Barrel of Ilmenau: a novel facility for experiments on high Rayleigh number convection 515
C. Resagk, F. Busse, R. du Puits, A. Thess and A. Tilgner

Small-scale turbulent dynamo: a numerical investigation 519
R. West, S. Nazarenko and S. Galtier

XXV Two-phase Flows (3)

Intraphase interaction in two-phase flow by way of turbulized particle trails 525
V.M. Boiko, K.V. Klinkov and S.V. Poplavski

Modeling of chemically active multiphase turbulent flows based on rational extended thermodynamics 529
A. Sadiki and G. Ahmadi

Numerical simulation of instability of a homogeneous sedimenting suspension 533
E.S. Asmolov

XXVI Jets

An experimental investigation of the near-field of a coaxial square jet 539
X.K. Wang, S.C.M. Yu and L.P. Chua

POD Investigation into the dynamics of the turbulent jet using hot-wires 543
S. Gamard and W.K. George

Using multigrid cross-correlation DPIV to study the structure of elliptic jets in cross flow 547
T.H New, T.T. Lim, J. Soria and S.C. Luo

Invited Lecture

The emerging roles of model-based control theory in fluid mechanics 553
T. R. Bewley

XXVII Turbulence Control (2)

Experimental investigations on active and dynamic control of turbulent separated flows 565
B. Gölling and U. Ch. Dallmann

Passive control of flow entrainment in buoyant reacting jets 569
K.H. Luo and X. Jiang

Passive versus active control of backward-facing step flow: DNS/LES and POD analysis 573
J. Neumann and H. Wengle

Passive control of flow instabilities in a reacting swirling jet using vortex generators 577
C. O. Paschereit and E. Gutmark

XXVIII DNS/LES (5)

A new multifractal subgrid-scale model for Large-Eddy Simulation 583
G.C. Burton, W.J.A. Dahm, D.R. Dowling and K.G. Powell

Investigation of different approaches and models for subgrid-scale modelling 587
H. Jeanmart and G. S. Winckelmans

Analysis of LES with ADM for forced and decaying isotropic turbulence 591
S.B. Müller, N.A. Adams, S. Stolz and L. Kleiser

DNS/LES of a turbulent mixing layer using instantaneous experimental data as inflow conditions 595
F. Coiffet, J. Delville and E. Lamballais

Effects of anisotropy on energy transfer in near-wall turbulence 599
D.C. Dunn and J.F. Morrison

XXIX Transport & Mixing (2)

Occurrence of internal gravity waves and counter-gradient heat-flux in a strongly stably-stratified mixing layer 605
H. Makita, K. Ohba and N. Sekishita

Dispersion from point sources over a rough wall: Large-Eddy Simulation and Extreme Value Theory predictions 609
P.R. Voke and Z. Xie

The connection between Langmuir circulations and turbulence in a rotating shear flow 613
M.A.C. Teixeira

Energy transfer in turbulent flows: the Lagrangian view 617
A. Pumir, B. I. Shraiman and M. Chertkov

Geometry of multipoint turbulent dispersion 621
M.A.I. Khan, A. Pumir and J.C. Vassilicos

XXX Separated Flows

Low-dimensional descriptions of separated flows 627
C.E. Tinney, J.A. Taylor, E. Eaton and M.N. Glauser

The development of a three-dimensional turbulent separated flow downstream of attachment 631
C. Cao and P. E. Hancock

A MEMS surface fence for time resolved skin-friction measurements in separated flows 635
M. Schober, E. Obermeier, T. Papen, S. Pirskawetz and H.-H. Fernholz

Pressure-based scaling in a separating turbulent APG boundary layer 639
K. P. Angele

Study of separated flow in an asymmetric diffuser 643
J. Gullman-Strand, G. Amberg and A.V. Johansson

XXXI Structures & Vortex Dynamics (5)

Coherent structures in 3D mean flow 649
H.I. Andersson and M. Lygren

The degree of tangleness of knotted vortex lines 653
D.R. Poole, C.F. Barenghi and D.C. Samuels

Turbulent explosion of a stretched vortex 657
Y. Cuypers, F. Bottausci and P. Petitjeans

Stability of a canonical multitude of slender helical vortices 661
V.L. Okulov

Self similar solutions of quantum vortex motion 665
T. Lipniacki

Alternative statistical-mechanical descriptions of decaying 2d turbulence in terms of "patches" and "points" 669
Z. Yin and D.C. Montgomery

XXXII Transport & Mixing (3)

Study of the development of an iso-concentration surface using Kinematic Simulation 675
S. Massiera, F. Nicolleau, F. Bataille and A. Lallemand

Convection in a horizontal fluid layer with internal heat generation 679
M. Nagata, O. Morii and W. Yano

Buoyant turbulent mixing in shear layers 683
B.J. Geurts

Two-dimensional cascade of a tracer and anisotropic modeling of turbulent mixing 687
T. Dubos and A. Armando

Turbulent diffusion in rapidly rotating flows with and without stable stratification 691
C. Cambon, F.S. Godeferd, F. Nicolleau and J.C. Vassilicos

Direct numerical simulation of inertia-sensitive turbulence 695
L. Bretonnet, L. Joly and P. Chassaing

Invited Lecture

Turbulence transition in shear flows 701
B. Eckhardt, H. Faisst, A. Schmiegel and J. Schumacher

XXXIII Instabilities & Transition (2)

Eigenvalue sensitivity to base flow variations in Hagen-Poiseuille flow 711
M.I. Gavarini, A. Bottaro and F.T.M. Nieuwstadt

The linear response 715
of a turbulent channel flow
M. Quadrio and P. Luchini

Universal coherent structures in a transitional boundary layer 719
V.I. Borodulin, Y.S. Kachanov, V.R. Gaponenko and A.P. Roschektayev

Influence of oblique vortices on the shear layer development behind a swept, backward-facing step 723
W. Jürgens and H.-J. Kaltenbach

DNS of transition in a laminar separation bubble 727
J.G. Wissink and W. Rodi

XXXIV Intermittency & Scaling (4)

Long time correlations in Lagrangian dynamics 733
N. Mordant, J. Delour, E. Lévêque, A. Arnéodo and J.-F. Pinton

Longitudinal and transverse structure functions in near wall turbulence 737
B. Jacob, A. Olivieri and C.M. Casciola

The integral scale in isotropic turbulence 741
H. Wang and W.K. George

A new method for analyzing multifractal data 745
Takeshi Matsumoto and Uriel Frisch

Energy and pressure spectra in superfluid turbulence 749
C.F. Barenghi, D. Kivotides, J.C. Vassilicos and D.C. Samuels

XXXV Structures & Vortex Dynamics (6)

Experiments on continually forced 2D turbulence 755
M.G. Wells, H.J.H. Clercx and G.J.F. van Heijst

Organised structures in near-wall two-dimensional turbulence 759
M.F. Baig and S. Chernyshenko

A vortex method simulation of near-wall turbulence structures 763
Z. Khatir

Two-dimensional turbulence on bounded domains 767
A.H. Nielsen, V. Naulin and J.J. Rasmussen

XXXVI Geophysical Turbulence (4)

On the dissipation of kinetic energy in two-dimensional turbulence in a bounded domain 773
H.J.H. Clercx and G.J.F. van Heijst

Plume and puff eddy motion in convective turbulence over a conducting base 777
J.C.R. Hunt, F.T.M. Nieuwstadt and H.J.S. Fernando

Effect of rotation on developed turbulent stratified convection: the hydrodynamic helicity, the alpha-effect and the effective drift velocity 781
I. Rogachevskii and N. Kleeorin

Structure of MHD turbulence in large-Prandtl-number plasmas 785
A. Schekochihin, J. Maron, S. Cowley and J.C. McWilliams

Invited Lecture

Premixed turbulent combustion based on the Level Set approach 791
N. Peters

XXXVII Reacting Flows

A flamelet formulation for Large Eddy Simulation 801
C. Duwig

The interaction of a thin flame front with homogeneous turbulence 805
F.T.M. Nieuwstadt and T.C. Treurniet

Non-premixed flame-turbulence interaction in compressible turbulent flow 809
D. Livescu and C.K. Madnia

Large Eddy Simulation of Non-Isobaric Supersonic Jets 813
D. Khotyanovsky and A. Kudryavtsev

XXXVIII Boundary Layers & Pipe Flows

LES and PIV experiments of the flow over a wavy wall 819
M. Cardi, L. Falcomer, V. Armenio and G.P. Romano

Organization of autonomous wall turbulence. 825
J. Jiménez, O. Flores and M. García–Villalba

Singular solutions of the turbulent boundary layer equations in the case of marginal separation as $Re \to \infty$ 829
B. Scheichl and A. Kluwick

Additional measurements and analysis of high Reynolds number fully-developed pipe flow 833
B.J. McKeon, J.F. Morrison, W. Jiang, J. Li and A.J. Smits

Posters

Transition and Control

Experimental analysis of the flowfield in non-isothermal countercurrent jets 839
D. Asendrych and S. Drobniak

Absolute and convective instability of the round variable-density jet 840
A. Boguslawski and S. Drobniak

Numerical simulation of seawater electromagnetic flow fontrol 841
F. Bouillon, M. Perrin, S. Tardu and J-P. Thibault

DNS of a turbulent flow with sudden change in pressure gradient 842
Y.M. Chung and K.H. Luo

A transition scheme of the radius component velocity in the axisymmetric sudden expansion flow 843
N. Furuichi, Y. Takeda and M. Kumada

Transition in the wing boundary layer at high free stream turbulence 844
G.R Grek and A.R. Ablaev

Methods of control of flow crossed bodies 845
S.V. Guvernuik , S.A. Isaev and V.L. Zhdanov

Large-eddy simulations of a ribbed channel 846
G. Hauët and M. Lesieur

Wall-friction intermittency in transitional flat plate boundary layer in turbulent free stream 847
P. Jonáš, O. Mazur and V. Uruba

Transition to turbulence in plane and circular Couette flow 848
P. Manneville

Prediction of drag reduction and heat transfer enhancement based on coherent fine scale eddies in near-wall turbulence 849
K. Nishimura, M. Tanahashi and T. Miyauchi

Experimental study of electromagnetic flow control in seawater 850
L. Rossi, J-P. Thibault and C. Lindquist

Production of streaks by localized vortical disturbances interacting with a blunt leading edge 851
M.V. Ustinov

An experimental investigation of the wake behind a cylinder with momentum injection 852
M. Yu, G. Lin and Y. Liao

DNS/LES

Renormalization Group approach to VLES subgrid modelling 853
C. De Langhe, B. Merci and E. Dick

A Cartesian DNS of flow around a circular cylinder 854
M.T. Dröge and R.W.C.P. Verstappen

Large Eddy Simulation of turbulent flow over a cylinder of square cross section 855
R. Giammanco and C. Benocci

Small Eddy Simulation of plane parallel flows 856
F. Hersant and B. Dubrulle

Microscale closing method in turbulent flow simulation 857
M. Ja. Ivanov

Accuracy limitations in LES employing eddy-viscosity subgrid-parameterization 858
J. Meyers, M. Baelmans and B.J. Geurts

LES study on the very large scale structures of wall-bounded turbulence and an effect of thermal stratification 859
M. Tsubokura and T. Tamura

The use of a Dynamic Grid Adaptation algorithm and LES turbulence model for modeling flow around a circular cylinder in the sub-critical flow regime 860
G. de With, A.E. Holdøand T.A. Huld

Compressible and Reacting Flow

Numerical simulation of supersonic turbulent flows in plane channels 861
I.A. Bedarev, A.V. Borisov, N.N. Fedorova, R.V. Nestoulia and A.V. Starov

Turbulence/radiation interaction in diffusion flames 862
A. I. Bril and V. P. Kabashnikov

Statistical analysis of coherent structures in turbulent premixed jet flames 863
R. Camussi and G. Guj

Refinement of turbulence and combustion models for the simulation of turbulent reacting flows 864
A. Maltsev, B. Merci and A. Sadiki

Suppression of vortical motions due to compressibility in decaying isotropic turbulence 865
H. Miura

Hot-wire calibration and measurements in compressible subsonic flow 866
T. Sigfrids, N. Tillmark and P.H. Alfredsson

Reactive and non-reactive passive scalars in turbulent shear flow 867
A.J. Vrieling, B.J. Boersma and F.T.M. Nieuwstadt

Hybrid RANS/LES combustion model 868
V. Zimont and V. Battaglia

Transport and Mixing

Modeling of turbulent transport of a concentration over a heated surface 869
U.S. Abdibekov, B. Surapbergenov and N. Usenbaev

Analysis of the turbulent transport phenomena of momentum on a surface impinged by a turbulent free jet 870
L. Bogusławski

Modelling of scalar micromixing in homogeneous turbulence 871
A. D. Chorny and V. A. Sosinovich

Effects of perturbations on turbulent mixing in impinging jets 872
R. Ding, J. Revstedt and L. Fuchs

PIV measurements in oscillating grids turbulence 873
A. Eidelman, T. Elperin, N. Kleeorin, A. Krein, A. Markovich and I. Rogachevskii

Strong and weak clustering of inertial particles in turbulent flows 874
T. Elperin, N. Kleeorin, V.S. L'vov, I. Rogachevskii and D. Sokoloff

Long-time evolution of a passive scalar field undergoing steady stirring 875
M. Gonzalez

Experimental study on the high temperature field behind a flame in a turbulent boundary layer 876
T. Maruyama and T. Tanaka

A new model for simulations of particulate plumes spreading over obstacles 877
V.V. Papkov, K.V. Karelsky and A.S. Petrosyan

Variation of eddy diffusivity with molecular Prandtl number 878
H.B. Zhou, G.X. Cui, Z.S. Zhang and L. Shao

Geophysical and Astrophysical Turbulence

Method of 'self-regulation' based on the Hamiltonian approach describing an evolution of vorticity into a bounded domain 879
S. Decossin and V. Pavlov

Generation of large-scale semi-organized structures in sheared turbulent convection 880
T. Elperin, N. Kleeorin, I. Rogachevskii and S. Zilitinkevich

New approach for determination of marine turbulence energy 881
G.A. Fedotov

Atmospheric dynamics in narrow valleys 882
A. Kerbiriou, G. Brulfert and C. Staquet

Fractal aircraft trajectories: 883
direct evidence for 23/9 elliptical dimensional cascades
S. Lovejoy, D. Perrault-Joncas and D. Schertzer

Order in atmospheric chaos 884
D.M. Sonechkin

Vortex and Structure Formation Dynamics

Standing waves on the surface of a conducting fluid rotating in a magnetic field 885
E. Golbraikh, A. Kapusta and B. Mikhailovich

Signatures of vortex hierarchy from 886
Reynolds stress evolution
D. Poggi and L. Ridolfi

Detection and characteristics of meanders of streaks 887
S. Tardu and D.C. Dunn

Characterisation of the interaction between instationnary flow structure and wall pressure field 888
C. Vartanian, J.J. Lasserre and V. Linet

Intermittency and Scaling

Homogeneous anisotropic turbulence 889
L. Biferale, A. Lanotte and F. Toschi

On the role of roughness on the small-scale structure of turbulence 890
D. Poggi and A. Porporato

Evidence for algebraic tails of probability distributions in laboratory-scale turbulence 891
M.I. Radulescu, L.B. Mydlarski, S. Lovejoy and D. Schertzer

A Langevin equation for inhomogeneous turbulence 892
C. Simand, F. Chillà and J.-F. Pinton

Turbulence in Multi-phase Flow

The effect of injected solid particles on fluid turbulence in vertical water tank at different particle loading and nozzle diameter 893
I. M. Youssef, T. Ishima and T. Obokata

Miscellaneous

Turbulent pulsatile blood flow computation in an arterial obstruction 894
F. Ghalichi

Turbulence characteristics of flow over a bluff body with side jet 895
A. Hamamcioglu, G. Ozkan and İ. B. Ozdemir

Experimental study of near-wall turbulent pressure fluctuations in conditions of flow-induced vibrations and accoustic noise 896
E.B. Kudashev, L.R. Yablonik

Oscillating phenomena of a turbulent plane jet flowing into a cavity 897
A. Mataoui, R. Schiestel and A. Salem

Summary guidelines & criteria for use of turbulence models in complex flows 898
A.M. Savill and J.C.R. Hunt

The Nordic Wind Tunnel – proposal to build a large turbulence research facility 899
M. Wosnik, W.K. George, R.I. Karlsson and T.G. Johansson
