

Alexander Bönner

Forecasting Models for the German Office Market

GABLER EDITION WISSENSCHAFT

Contents

CONTENTS	VII
SUMMARY	XI
SUMMARY (GERMAN)	XII
LIST OF TABLES	XIII
LIST OF GRAPHS	XV
LIST OF ABBREVIATIONS	XIX
1. INTRODUCTION	1
1.1. General Motivation	1
1.2. Research Questions	2
1.3. Outline of the dissertation	3
2. LITERATURE REVIEW	5
2.1. Multivariate regression models	5
2.2. Univariate models	8
2.3. VAR and VEC models	10
3. THEORETICAL FOUNDATIONS	12
3.1. General real estate market characteristics	12
3.1.1. Definition of the terms real estate and real estate market	12
3.1.2. The four quadrant model according to DiPasquale and Wheaton	13
3.1.3. Real estate market characteristics	17
3.2. Specifics of time series and panel data	18
3.2.1. Definition of time series data	19
3.2.2. Definition of panel data	19
3.2.3. Stationarity	20
3.2.4. Cointegration	21

3.3. Theoretical fundamentals of common forecasting models.....	21
3.3.1. Multivariate regression model	22
3.3.2. ARIMA model	24
3.3.3. GARCH model	26
3.3.4. VAR and VEC models.....	28
3.3.5. Evaluation of the examined forecasting models	30
3.4. Forecasting techniques and forecasting performance measures.....	32
3.4.1. Forecasting techniques.....	33
3.4.2. Forecasting performance measures.....	34
4. DESIGN OF THE EMPIRICAL STUDY.....	36
4.1. Research hypotheses	36
4.2. Research methodology	38
4.3. Data	41
4.3.1. Rent series.....	42
4.3.2. Total Yield series.....	42
4.3.3. Potentially explanatory variables.....	43
5. EMPIRICAL RESULTS: RENT FORECASTING.....	45
5.1. Univariate models.....	45
5.1.1. Rent data analysis	45
5.1.2. ARIMA models: Construction, estimation, and forecasting.....	53
5.1.3. GARCH models: Construction, estimation, and forecasting	66
5.1.4. Conclusion.....	70
5.2. Multivariate regression models.....	71
5.2.1. Explanatory variables analysis.....	71
5.2.2. Model construction and estimation.....	73
5.2.3. Discussion of the city rent series forecasts	75
5.2.4. Conclusion.....	85
5.3. Comparison of univariate and multivariate models.....	86
5.3.1. Comparison and interpretations	86
5.3.2. Conclusion.....	95
5.4. Long-run forecasting models.....	96
5.4.1. Determination and interpretation	97
5.4.2. Conclusion.....	103
5.5. Chapter Conclusion.....	104

6. EMPIRICAL RESULTS: TOTAL YIELD FORECASTING	108
6.1. Total yield series analysis	108
6.1.1. Total yield data description.....	108
6.1.2. Interpretations and conclusions	115
6.2. Multivariate models	117
6.2.1. Explanatory variables analysis.....	117
6.2.2. Model construction and estimation.....	119
6.2.3. Discussion of the city total yield series forecasts	120
6.2.4. Conclusion	130
6.3. Long-run forecasting models.....	131
6.3.1. Determination and interpretation	131
6.3.2. Conclusion	138
6.4. Chapter Conclusion.....	140
7. CONCLUSION	142
7.1. Summary of findings.....	142
7.2. Implications for practice.....	144
7.3. Research Outlook	145
APPENDIX.....	147
REFERENCES.....	168
