

Wei-Bin Zhang

A Theory of Interregional Dynamics

Models of Capital, Knowledge and
Economic Structures

Springer

Contents

1 Introduction	1
2 Regional Growth with Productivity and Amenity Differentials	11
2.1 Regional Growth with Differences	12
2.2 Equal Propensities to Consume and to Hold Wealth	17
2.3 Changes in Region 1's Working Efficiency	21
2.4 Changes in Region 2's Amenity Level	24
2.5 On Regional Dynamics	26
Appendix	27
A.2.1 Equilibria in the Case that the Propensities to Consume and to Hold Wealth Are Different	27
3 Regional Growth with Endogenous Time Distribution	33
3.1 Growth with Regional Time Values	33
3.2 The Equilibrium Structure with Identical Propensities	37
3.3 The Working Efficiency and the Equilibrium Structure	42
3.4 The Regional Amenity and the Equilibrium Structure	44
3.5 Concluding Remarks	46
4 Regional Sexual Division of Labor and Economic Growth	47
4.1 Regional Growth with Sexual Division of Labor	48
4.2 Equilibrium Structure of Regional Competition	53
4.3 Regional Amenity and the Equilibrium Structure	57
4.4 On Complex of Sexual Division of Labor and Consumption	59
5 A Two-group Regional Growth Model	61
5.1 The Regional model with Multiple Groups	62
5.2 The Equilibrium Regional Structure	66
5.3 On Regional Dynamics with Multiple Groups	71
Appendix	71
A.5.1 Equilibria in the Case that the Propensities are Different Between the Groups	71

6 Urban and Rural Equilibrium Structures	79
6.1 The Economic Structure with Urban and Rural Areas	81
6.2 The Spatial Equilibrium Structure	86
6.3 City 1's Amenity and the Economic Structure	88
6.4 On Spatial Economic Structure	91
Appendix	91
A.6.1 Proving Proposition 6.2.1	91
7 Regional Economic Equilibrium with two Groups	97
7.1 The Agricultural Economy with two Groups	98
7.2 The Regional Economic Equilibrium Structure	102
7.3 The Farmers and the Economic Structure	107
7.4 The Amenity of Landlord Class and Economic Structure	110
7.5 On Classes and Regional Economic Structure	112
8 Regional Growth with Economic Structure	115
8.1 Regional Growth with Structural Change	116
8.2 The Regional Equilibrium Structure	121
8.3 The Regional Amenity and the Economic Structure	124
8.4 The Propensity to Hold Wealth and the Economic Structure ..	128
8.5 On Regional Growth and Structural Change	131
Appendix	132
A.8.1 Proving Lemma 8.2.1	132
9 A Two-region Growth Model with Capital and Knowledge	137
9.1 Regional Growth with Endogenous Knowledge	138
9.2 Knowledge and the Equilibrium Structure	143
9.3 The Impact of Changes in some Parameters	149
9.4 On Knowledge and Regional Development	152
Appendix	153
A.9.1 Proving Proposition 9.3.1	153
A.9.2 Proving Proposition 9.3.2	153
10 Regional Economic Structure with Endogenous Knowledge	155
10.1 The Dynamics of Regional Economic Structure	156
10.2 The Equilibria Structure and Stability	160
10.3 The Creativity and the Regional Economic Structure	164
10.4 Regional Dynamics with Knowledge	168
Appendix	168
A.10.1 Proving Proposition 10.2.1	168
A.10.2 Proving Proposition 10.2.2	171
11 Regional Growth with Universities	173
11.1 The Regional Model with Universities	173

11.2 The Regional Equilibrium with Universities	179
11.3 The Education Policy and the Regional Structure	183
11.4 The Amenity Level and the Regional Structure	186
11.5 On Regional Dynamics with Universities	189
Appendix	189
A.11.1 Proving Proposition 11.2.1	189
12 Regional Dynamics in an Isolated State	193
12.1 The General Model of the Isolated State	194
12.2 The Temporary Spatial Equilibrium	200
12.3 The Dynamics of Capital and Knowledge	203
12.4 The Population and the Spatial Structure	205
12.5 On Complexity of Economic Geography	210
Appendix	211
A.12.1 Proving the Results in Section 12.2	211
A.12.2 Proving Proposition 12.3.1	213
13 Further Issues on Interregional Economics	217
Bibliography	221
Name Index	229
