

Physics and Chemistry of the Earth's Interior

Crust, Mantle and Core

Edited by

Alok K. Gupta
Somnath Dasgupta

Indian National Science Academy
A Platinum Jubilee Special Issue

Contents

1. Geophysical and Experimental Petrological Studies of the Earth's Interior <i>Alok K. Gupta, Mrigank Mauli Dwivedi and William S. Fyfe</i>	1
1.1 Introduction.....	2
1.2 The Crust.....	3
1.2.1 The Continental Crust	3
1.2.2 Oceanic Crust.....	6
1.3 Mantle	6
1.3.1 Peridotite with Compositions Similar to Chondritic Meteorite as a Possible Mantle Material	6
1.3.2 Various Seismic Discontinuities within the Mantle	8
1.3.3 Experimental Studies on Peridotites and Meteorites.....	15
1.3.4 Mantle Heterogeneity.....	17
1.3.5 Water Content in the Mantle	18
1.3.6 The D" Layer	20
1.4 Core of the Earth	23
1.5 References.....	24
2. Modelling of Metamorphic Textures with C-Space: Evidence of Pan-African High-grade Reworking in the Eastern Ghats Belt, India <i>Pulak Sengupta and Somnath Dasgupta</i>	29
2.1 Introduction.....	30
2.2 The Chilka Lake Anorthosite Complex (CLAC)	30
2.3 Reaction Textures and Phase Compositions	31
2.3.1 Sample #2K-28	31
2.3.2 Sample #CM10-2b	32
2.4 Modelling of Reaction Textures with C-Space Programme.....	33
2.4.1 Theory.....	33
2.4.2 Application of the C-Space Programme to Meta-anorthosite of the CLAC.....	34
2.5 Discussion.....	36
2.6 References.....	37
Appendix 1	38
Appendix 2.....	39

3. Orogenic Processes in Collisional Tectonics with Special Reference to the Himalayan Mountain Chain: A Review of Theoretical and Experimental Models

Nibir Mandal, Atin Kumar Mitra and Santanu Bose 41

3.1 Introduction	42
3.2 Orogens and their Tectonic Structures	43
3.2.1 Orogen Topography	43
3.2.2 Geological Setting	44
3.2.3 Ductile Deformational Structures and Strain	45
3.2.4 Large-scale Fault Systems	51
3.3 Crustal Flow in Orogens	52
3.3.1 Surface Velocity	52
3.3.2 Deep-crustal Flow	54
3.4 Orogenic Wedge Models	57
3.4.1 Preamble	57
3.4.2 Coulomb Wedge Models	57
3.4.3 Plastic Models	60
3.4.4 Viscous Wedge Model	60
3.5 Discussion	62
3.5.1 Orogenic Structures and Tectonic Modelling	62
3.5.2 Problem of Basement Shortening	62
3.5.3 Exhumation Processes and Orogenic Models	63
3.6 Concluding Remarks	63
3.7 References	64

4. Some Remarks on Melting and Extreme Metamorphism of Crustal Rocks

Michael Brown and Fawna J Korhonen 67

4.1 Introduction	68
4.2 Melting at the Extremes of the Metamorphic <i>P-T</i> Realm	68
4.3 Sources of Heat for High-Grade Crustal Metamorphism and Melting	69
4.4 Microstructures Indicative of the Former Presence of Melt in Residual High-grade Metamorphic Rocks	70
4.5 The Mechanism of Melt Extraction and Ascent in Continental Crust	70
4.6 The Melting Process in Crustal Rocks	71
4.6.1 The Initiation of Melting	71
4.6.2 Wet Melting	71
4.6.3 Hydrate-breakdown Melting	72
4.6.4 Implications for the Trace-Element Chemistry of Melts, and for Zircon and Monazite Chronology in High-grade Metamorphic Rocks	73
4.7 Phase Equilibria Modelling of Pelite and Aluminous Greywacke	74
4.7.1 Methodology	74
4.7.2 Modelling Melting of a Pelite Protolith Composition	75
4.7.3 Modelling Melting of a Peraluminous Greywacke Protolith Composition	78
4.7.4 Limitations of the Modelling	80
4.8 Importance of Melt Loss for Achieving Temperatures of UHTM	81
4.8.1 The Effect of Melt Loss on the Thermal Evolution	81
4.8.2 An Example: Interpretation of UHT Metamorphic Rocks from the Basement of the Peruvian Andes	81
4.9 Directions for Future Research	82
4.10 References	83

5. Closure Temperature, Cooling Age and High Temperature Thermochronology

Jibamitra Ganguly and Massimiliano Tirone 89

5.1 Introduction	90
5.2 Closure Temperature and Mineral Age	91

5.2.1 General Concept.....	91
5.2.2 Dodson Formulation	92
5.2.3 Extension of Dodson Formulation by Ganguly and Tirone	93
5.2.4 Effects of Modal Abundance and Nature of Matrix Phase.....	94
5.2.5 Effect of Diffusion Anisotropy	95
5.3 Thermochronology.....	95
5.3.1 Resetting of Bulk Mineral Age	95
5.3.2 Spatial Variation of Age Within a Crystal	95
5.4 Selection of Mineral Grains for Dating.....	97
5.5 Conclusions.....	98
5.6 References.....	98
6. Thermobarometry Gone Astray	
<i>Eric J. Essene</i>	101
6.1 Introduction.....	102
6.2 Empirical Thermobarometers.....	102
6.2.1 Chlorite Thermometry.....	102
6.2.2 Hornblende Barometry.....	108
6.2.3 Ti as a Thermobarometer in Silicates.....	110
6.2.4 Phengite Barometry.....	113
6.2.5 Transformations in Clay Minerals	117
6.2.6 Transformations in Carbonaceous Materials.....	118
6.3 Thermobarometers in the System CaO-ZrO ₂ -TiO ₂ -SiO ₂ (CazrtiQ)	119
6.3.1 Rutile Thermobarometer	119
6.3.2 Zircon Thermobarometer	121
6.3.3 Quartz Ti Thermometer (TitaniQ).....	123
6.3.4 Sphene Thermobarometer	125
6.3.5 Partition of Ti and Zr Between Sphene and Rutile	126
6.3.6 Partition of Si and Ti Between Quartz and Zircon	126
6.3.7 Partition of Zr and Ti Between Zircon and Rutile.....	126
6.4 Other Empirical Thermometers for Trace Elements	127
6.5 Discussion.....	127
6.6 References.....	128
7. On Fluids in the Dynamic Earth	
<i>M. Santosh</i>	135
7.1 Introduction.....	136
7.2 Evidence for Ancient Fluid Pathways.....	136
7.3 Evidence for Ongoing Fluid Processes	137
7.4 Plumes as Gigantic Pipes to Transport Fluids.....	137
7.5 Entrance and Exit of Fluids.....	138
7.6 Movement of Volatiles.....	139
7.7 References.....	141
8. Laboratory Measurements of Ultrasonic Wave Velocities of Crustal Rocks at High Pressures and Temperatures: Petrological Structure of Izu-Bonin-Mariana Arc Crust	
<i>Masahiro Ishikawa and Makoto Arima</i>	143
8.1 Introduction.....	144
8.2 Experimental Techniques of Ultrasonic Wave Velocity Measurements	144
8.2.1 Pulse Transmission Technique.....	145
8.2.2 Pulse Reflection Technique with Pure-Mode Transducers	145
8.2.3 Pulse Reflection Technique with Dual Mode Transducers	146
8.3 Constraints on Crustal Composition of IBM Island Arc	146
8.3.1 Parent Magma Paradox	147
8.3.2 Velocity Structure	147
8.3.3 Linking Seismic Velocity to Lithology.....	148

8.3.4 Arc Crustal Lithology.....	148
8.3.5 Sub-moho Lithology	149
8.4 References	150
9. Seismic Imaging of the Mantle Discontinuities Beneath India: From Archean Cratons to Himalayan Subduction Zone	
<i>Shyam S. Rai, K. Suryaprakasam and V. K. Gaur</i>	153
9.1 Introduction.....	154
9.2 Geological and Geophysical Framework	155
9.3 Data and Methodology	156
9.4 Discussion	158
9.4.1 Lehmann Discontinuity.....	158
9.4.2 410 km Discontinuity	158
9.4.3 475 km Discontinuity	158
9.4.4 660 km Discontinuity	159
9.4.5 Mantle Transition Zone Thickness.....	159
9.5 Conclusion.....	159
9.6 References	160
10. Models for Constraining Thermal Structure of the Indian Crust	
<i>R. N. Singh</i>	163
10.1 Introduction.....	164
10.2 The Heat Conduction Equation	164
10.3 Steady Thermal Models	165
10.4 Transient Thermal Models	166
10.4.1 Evolution of Initial Thermal Fields	166
10.4.2 Basal Heating	167
10.4.3 Reordering of Heat Sources	168
10.4.4 Transient Uplift/Erosion Effects.....	168
10.4.5 Effects of Fluid Transport	169
10.5 Applications to the Indian Regions	169
10.6 Summary	171
10.7 References	171
11. Convection in the Earth's Mantle	
<i>Ajay Manglik</i>	175
11.1 Introduction.....	176
11.2 Governing Equations.....	176
11.3 Analytical Solutions	178
11.4 Numerical Modelling	178
11.5 Applications to Mantle Dynamics	178
11.5.1 Effect of Viscosity Variations	178
11.5.2 Whole Versus Layered Mantle Convection.....	179
11.5.3 Effect of Boundary Layers	180
11.5.4 Plume Mode of Convection.....	180
11.6 Summary	182
11.7 References	182
12. Post-perovskite Phase: Findings, Structure and Property	
<i>Takehiko Yagi</i>	185
12.1 Introduction.....	186
12.2 Stability of Silicate Perovskite and the Discovery of Post-perovskite Phase	186
12.3 Structure of Post-perovskite	187
12.4 Properties of Post-perovskite.....	188
12.5 References	189
