

Electrical Feed Drives in Automation

Basics, Computation, Dimensioning

By Hans GroS, Jens Hamann and Georg Wiegartner

Publicis MCD Corporate Publishing

Contents

1	Fundamentals of Control Theory	.12
1.1	Terminology.	.12
1.1.1	Open Control Chain and Closed Control Loop.	.12
1.1.2	Closed Control Loop Signals.	.13
1.1.3	Sampling.	.16
1.1.4'	Linearization :	.19
1.1.5	Normalizing.	.19
1.1.6	Referenced Variables .,	.20
1.2	Response Characteristics	.21
1.2.1	Steady-state transfer characteristic	.21
1.2.2	Dynamic Response.	.21
1.2.3	Basic Transfer Elements.	.23
1.3	Representation in the Time Domain	.35
1.3.1	Differential Equation	.35
1.3.2	Step Response.	.42
1.4	Representation in the Frequency Domain	.47
1.4.1	Frequency Response.	.47
1.4.2	Bode Diagram. ^	.51
1.4.3	P-T _r and P-T ₂ -Response.	.52
1.4.4	Frequency Response Measurement.	.61
1.5	Root Loci	61
1.5.1	Representation	.61
1.5.2	Poles.	.62
1.5.2	Zeros	.63
1.5.4	Root Loci of the P-T ₂ -Element. ,	.64
1.5.5	Root Loci of 1-and 2-Mass Oscillators.	.66
1.6	Linking of Transfer Elements	.76
1.7	Comparison of the Description Methods	.79
1.8 '	Appendix	.80
1.8.1	Fundamentals of Control Theory	.80
1.8.2	Analogies between electrical and mechanical oscillators.	.89

2	Control Loops for Feed Drives	
2.1	Terminology.	92
2.1.1	Block Diagram.	92
2.1.2	Step Function	94
2.1.3	Accuracy	. 95
2.1.4	Frequency Responses	96
2.1.5	Characteristic Stability Values	. 97
2.2	Controller Design Options.	99
2.1.6	Feed Drive Controllers.	99
2.2.2	Analog PI Controller.	.102
2.2.3	Digital PI Controller	103
2.2.4	DI Controller with Pafaranaa Model	1105
2.2.3		.110
2.3	Optimization Rules ,	.113
2.3.1		.113
2.3.2	Symmetrical Optimum, Absolute value Optimum.	.114
2.4	Dynamic Response Characteristics.	.115
2.4.1	Command Frequency Response of the PI Controller	115
242	Command Frequency Response of the Conventional PI	.115
2.7.2	Controller	.116
2.4.3	Interference Frequency Response of the PI Controller.	.117
2.4.4	Determining the Controller Parameters	.117
2.4.5	Standard 2^{nd} and 3^{rd} Order Drive Frequency Responses	118
2.4.6	Summary \	.121
2.5	Command and Disturbance Response in the Time Domain	121
2.5.1	Command Response.	.121
2.5.2	Disturbance Response.	.124
2.6	Command and Disturbance Response in the Frequency	105
261	Domain.	.125
2.0.1	Disturbance Response	,127
2.0.2		127
2.7	Modeling an example of the Speed Control Loop.	.129
3	Feed Drive Position Control	.141
3.1	Terminology, Basics	141
3.1.1	Configuration and Function	.141
3.1.2	Position Measurement.	.143

3.1.3	Parameters and Characteristics of Position Control Loops 14 Modeling Linear Position Control Loops	16 10
3.2	Dynamic Response Characteristics of Linear Position	r)
	Control Loops	54
3.2.1	Command Response of Linear Position Control	
	Loops with Indirect Measuring System	54
3.2.2	Command Response of Linear Position Control	
	Loops with Direct Measuring System 16	50
3.2.3	Disturbance Response of Linear Position Control Loops 16	6
3.3	Circular Contour Errors	17
3.3.1	-Causes, Influencing Variables 17	7
3.3.2	Errors caused by the Command Response	70
222	at the Indirect Measurement System. 1/	8'
5.5.5	Errors caused by the Command Response at the Direct	28
3.3.4	Circular Contour Distortions by the interaction	,0
	of both feed axes	39
3.3.5	Summary of the Errors and Distortions on the Circular Contour 19	94
3.4	Feed Forward Control)0
3.5	Command Variable Control)3
3.6	Position Control Limits for Oscillatory Mechanical Systems . 20)6
3.6.1	Natural Frequencies)6
3.6.2	Frequency Response of the Mechanical System)8
3.6.3	Feed Axis Modeling	0
3.6.4	Disturbance Optimum and Damping Optimum. 21	3
3.6.5	Influence of the Sampling Periods 22	25
3.7	Final Conclusions regarding the K_{ν} Factor	26
4	Steady-State Layout and Calculation	1
4.1	Calculation Methods	31
4.2	Steady-state Layout	32
4.2.1	Requirements 23	32
4.2.2	Feed Drive with Lead Screw. 23	33
4.2.3	Rack-and-Pinion Feed Drive 24	1
4.2.4.	Linear Motor Drive	15
4.3	Steps for the Dynamic Layout	1 7
4.3.1	Requirements	1 7

4.3.2	Rough Sizing Estimate	247
4.3.3	Requirements based on Speed and Acceleration.	.248
4.3.4	Examples.	.252
4.4	Motion Diagrams	.260
4.4.1	Jerk limitation	260
4.4.2	Running Travel Distances.	.266
4.4.3	Estimating the Positioning Time	282
4.4.4	Energy Content of the Moved Masses	.285
4.4.5	Attainable Acceleration	.286
4.4.6	Periodic Duty Cycle.	290
4.5	Summary	.296
4.5.1	Feed Drive Layout based on a Flow Diagram.	.296
4.5.1 5	Feed Drive Layout based on a Flow Diagram. Technical Appendix	.296 .306
4.5.1 5 5.1	Feed Drive Layout based on a Flow Diagram. Technical Appendix Formula Symbols.	.296 .306 .306
4.5.1 5 5.1 5.2	Feed Drive Layout based on a Flow Diagram. Technical Appendix Formula Symbols. SI Units	.296 .306 .306 .319
4.5.1 5 5.1 5.2 5.3	Feed Drive Layout based on a Flow Diagram. Technical Appendix Formula Symbols. SI Units . *. Conversion Tables.	296 .306 .306 .319 .322
4.5.1 5 5.1 5.2 5.3 5.4	Feed Drive Layout based on a Flow Diagram. Technical Appendix Formula Symbols. SI Units . *. Conversion Tables. Equations.	296 306 306 319 322 326
