# Approximation Theory

*From Taylor Polynomials  
to Wavelets*

Birkhäuser  
Boston • Basel • Berlin

# Contents

<b>Preface</b>	<b>ix</b>
<b>1 Approximation with Polynomials</b>	<b>1</b>
1.1 Approximation of a function on an interval . . . . .	2
1.2 Weierstrass' theorem . . . . .	4
1.3 Taylor's theorem . . . . .	6
1.4 Exercises . . . . .	13
<b>2 Infinite Series</b>	<b>15</b>
2.1 Infinite series of numbers . . . . .	16
2.2 Estimating the sum of an infinite series . . . . .	21
2.3 Geometric series . . . . .	24
2.4 Power series . . . . .	27
2.5 General infinite sums of functions . . . . .	34
2.6 Uniform convergence . . . . .	40
2.7 Signal transmission . . . . .	44
2.8 Exercises . . . . .	48
<b>3 Fourier Analysis</b>	<b>51</b>
3.1 Fourier series . . . . .	52
3.2 Fourier's theorem and approximation . . . . .	57
3.3 Fourier series and signal analysis . . . . .	62
3.4 Fourier series and Hilbert spaces . . . . .	64
3.5 Fourier series in complex form . . . . .	67

3.6	Parseval's theorem . . . . .	69
3.7	Regularity and decay of the Fourier coefficients . . . . .	71
3.8	Best $N$ -term approximation . . . . .	73
3.9	The Fourier transform . . . . .	76
3.10	Exercises . . . . .	80
<b>4</b>	<b>Wavelets and Applications</b>	<b>83</b>
4.1	About wavelet systems . . . . .	84
4.2	Wavelets and signal processing . . . . .	92
4.3	Wavelets and fingerprints . . . . .	98
4.4	Wavelet packets . . . . .	103
4.5	Alternatives to wavelets: Gabor systems . . . . .	103
4.6	Exercises . . . . .	104
<b>5</b>	<b>Wavelets and their Mathematical Properties</b>	<b>105</b>
5.1	Wavelets and $L^2(\mathbb{R})$ . . . . .	106
5.2	Multiresolution analysis . . . . .	107
5.3	The role of the Fourier transform . . . . .	107
5.4	The Haar wavelet . . . . .	109
5.5	The role of compact support . . . . .	122
5.6	Wavelets and singularities . . . . .	123
5.7	Best $N$ -term approximation . . . . .	126
5.8	Frames . . . . .	128
5.9	Gabor systems . . . . .	132
5.10	Exercises . . . . .	136
<b>Appendix A</b>		<b>137</b>
A.1	Definitions and notation . . . . .	137
A.2	Proof of Weierstrass' theorem . . . . .	138
A.3	Proof of Taylor's theorem . . . . .	141
A.4	Infinite series . . . . .	145
A.5	Proof of Theorem 3.7.2 . . . . .	148
<b>Appendix B</b>		<b>149</b>
B.1	Power series . . . . .	149
B.2	Fourier series for $2\pi$ -periodic functions . . . . .	150
<b>List of Symbols</b>		<b>151</b>
<b>References</b>		<b>153</b>
<b>Index</b>		<b>155</b>
