## VOLUME I

*Edited by*

**KEITH HARTLEY**  
*University of York*

and

**TODD SANDLER**  
*Iowa State University*

1995

**ELSEVIER**

**AMSTERDAM • LAUSANNE • NEW YORK • OXFORD • SHANNON • TOKYO**

# CONTENTS OF VOLUME I

Introduction to the Series	v
Acknowledgements	vii

## *Chapter 1*

Introduction	
KEITH HARTLEY and TODD SANDLER	1
Abstract	2
Keywords	2
1. Introduction	3
2. A brief history of the field	4
3. On the nature of defense economics	6
4. Importance of defense economics today	7
5. Organization of the book	8
References	11

## *Chapter 2*

Defense Economics and International Security	
MARTIN C. McGUIRE	13
Abstract	14
Keywords	14
1. Introduction	15
1.1. What is defense economics?	15
1.2. Some examples where economics has made central contributions to security studies	16
1.2.1. Defense strategy and resource allocations	17
1.2.2. Analysis of deterrence	17
1.2.3. Economic models of alliances	18
1.2.4. National power, economic survival, and international trade	18
1.2.5. Arms races and strategic interactions	19
1.2.6. Economic ecology and international conflict	20
2. Interactions between economics and defense	20
2.1. Levels of interaction	20
2.2. Historical evolution	21
3. Themes in the history of Defense Economics	21
3.1. World War II	21

- 3.2. Early Cold War
- 3.3. Later Cold War
  - 3.3.1. Alliances, burden sharing, and erosion of US hegemony
  - 3.3.2. Long run sustainability of defense and relative decline of the US
  - 3.3.3. Economic warfare/defense: a game of economic ruin
  - 3.3.4. Economic equity and defense: military manpower and conscription
  - 3.3.5. Defense industry analysis, acquisition and contracting
- 3.4. Post Cold War
  - 3.4.1. The emergence of positive theories of defense
  - 3.4.2. New directions in the normative analysis of defense
- 4. Agenda for Defense Economics
  - 4.1. Continuing/inherited policy concerns
  - 4.2. Normative issues arising from world economic change and the collapse of Communism
    - 4.2.1. Economics of transition
    - 4.2.2. New definition of national/international security
    - 4.2.3. New economic instruments for security
    - 4.2.4. New concepts of alliances and replacement for bi-polar world hegemony
  - 4.3. Positive analysis of international power equilibria
- 5. Concluding remark
- References

*Chapter 3*

**World Military Expenditures**

**MICHAEL BRZOSKA**

**Abstract**

**Keywords**

- 1. Introduction
- 2. Concepts and definitions
  - 2.1. Functional versus institutional approaches
  - 2.2. Direct, indirect and intangible costs and benefits
  - 2.3. Current versus comprehensive accounting
  - 2.4. Standard definitions
- 3. Intertemporal consistency
- 4. International comparisons
- 5. Relative measures
- 6. Data sources
- 7. International arms transfers
- 8. Conclusion
- References

*Contents of Volume 1*

*Chapter 4*

The Demand for Military Expenditure

RON SMITH

	69
Abstract	70
Keywords	70
1. Introduction	71
2. The framework	71
3. Interpretation	74
4. Theoretical specification	76
5. Data	78
6. Econometric issues	80
7. Some examples	83
8. Conclusion	84
References	85

*Chapter 5*

Military Alliances: Theory and Empirics

JAMES C. MURDOCH

	89
Abstract	90
Keywords	90
1. Introduction	91
2. Theoretical contributions	91
2.1. The pure public good model	92
2.2. The joint product model	95
2.3. Other contributions	98
2.3.1. Technology of supply	98
2.3.2. The allocation process	99
3. Empirical contributions	100
3.1. Tests based on the pure public good model	100
3.2. Tests based on the joint product model	103
3.3. Other empirical contributions	104
4. Conclusion	106
References	107

*Chapter 6*

Arms Races and Proliferation

DAGOBERT L. BRITO and MICHAEL D. INTRILIGATOR

	109
Abstract	110
Keywords	110
1. Introduction and overview of arms races, proliferation, and the outbreak of war	111
2. The Richardson model of the arms race	114

3. The dynamics of arms accumulation: the rational actor model
4. The dynamics of nuclear war: strategy and outcomes
5. Arms races and stability
6. A general model of an arms race
7. Power, bargaining, and war
8. The role of nuclear weapons
9. Nuclear weapons in a formal model of bargaining
10. Nuclear proliferation
11. Proliferation and the probability of war
12. The future of the arms race and of proliferation
13. Appendix
  - 13.1. Proof of proposition 1
  - 13.2. Proof of proposition 2
  - 13.3. Proof of proposition 4
  - 13.4. Proof of proposition 7

## Theorizing about Conflict

JACK HIRSHLEIFER

### Abstract

### Keywords

1. Introduction
2. Analytic choices in modelling conflict
  - 2.1. Conflict versus settlement: Dichotomy or continuum?
  - 2.2. Plays, rounds, and moves
  - 2.3. Binding agreements possible?
  - 2.4. Limited stakes? Restricted means?
  - 2.5. Varying the number of contenders
  - 2.6. Actual versus threatened conflict
3. Sources of conflict
4. The technology of conflict
5. A first illustrative model - does conflict promote equality?
  - 5.1. Elements of an economic model of conflict
  - 5.2. Optimization and Cournot equilibrium
  - 5.3. Resource disparities: The paradox of power
  - 5.4. When conflict becomes more decisive
6. A second illustrative model: armed settlement under threat
7. Concluding remarks

Insurrections

HERSCHEL I. GROSSMAN	191
Abstract	192
Keywords	192
1. Introduction	193
2. Analytical framework	194
2.1. The incumbent ruler	194
2.2. The potential insurgent leader	195
3. A formal model of insurrections	196
3.1. The peasant or worker families	196
3.2. An insurrection?	197
3.3. The deployment of soldiers	199
3.4. The ruler's tax policy	202
3.5. Income	203
4. Revolutions	204
4.1. A revolution?	204
4.2. The incumbent ruler	205
4.3. Income and wealth	207
4.4. Economic welfare	208
5. Summary	209
References	211

*Chapter 9*

Terrorism: Theory and Applications

WALTER ENDERS and TODD SANDLER	213
Abstract	214
Keywords	214
1. Introduction	215
2. Data and trends	216
3. Game theoretic analysis 1: Treaty formation and negotiations	221
3.1. A Prisoner's Dilemma scenario	221
3.2. To bargain or not to bargain	224
4. Game theoretic analysis 2: Terrorists' choice of targets	228
5. Further game analyses	233
6. Choice-theoretic models of terrorism	235
7. Intervention analysis	237
7.1. Other interventions: Increased embassy security	239
7.2. The Libyan raid and other retaliations	239
8. Vector autoregression models of terrorism	241
9. Concluding remarks	247
References	247

*Chapter 10*

Defense Expenditure and Economic Growth

RATIRAM

Abstract

Keywords

1. Introduction
  2. A methodological overview of the existing research
    - 2.1. Benoit's work and a list of the variations adopted by other scholars
    - 2.2. Some methodological issues
      - 2.2.1. Theoretical foundations for the econometric models used
      - 2.2.2. Exogeneity of the regressors and the possible SEM bias
      - 2.2.3. Cross-section versus individual-country estimates
  3. A summary of the evidence from existing studies
  4. Some thoughts on future research, and a few notes of caution
  5. Concluding remarks
- References

*Chapter 11*

Military Expenditure and Developing Countries

SAADET DEGER and SOMNATH SEN

Abstract

Keywords

1. Introduction
  2. Core issues
  3. Economic growth, development and defense spending
    - 3.1. Theoretical models
      - 3.1.1. Demand and supply factors in growth
      - 3.1.2. The externality model
      - 3.1.3. Model with defense as a public good
    - 3.2. Empirical models of the impact of military expenditure on growth
      - 3.2.1. Empirical models of demand and supply factors
      - 3.2.2. Externalities from defense
      - 3.2.3. Defense and security as a public good
  4. Security and development
    - 4.1. Nature of the problem
    - 4.2. Demand for military spending in developing countries
    - 4.3. Militarization, government legitimacy and military expenditure
    - 4.4. Socio-political instability
  5. Concluding remarks and further research
- References

*Chapter 12*

Incentive Models of the Defense Procurement Process

WILLIAM P. ROGERSON

	309
Abstract	310
Keywords	310
1. Introduction	311
2. Background	312
2.1. Introduction	312
2.2. Characteristic #1: Research and development	312
2.3. Characteristic #2: Uncertainty	312
2.4. Characteristic #3: Economies of scale in production	313
2.5. Characteristic #4: Government is the sole buyer	314
2.6. The program life cycle	316
2.7. Discussion	316
2.8. Theory of the internal organization of the firm	317
2.9. Prizes for innovation	318
2.10. Inter-linked stages	318
3. The simple procurement problem with a single agent	319
3.1. Introduction	319
3.2. The general model	320
3.3. Pure moral hazard: The model	322
3.4. Pure moral hazard: Discussion	323
3.5. Pure self selection: The model	325
3.6. Pure self selection: Discussion	331
3.7. The general model	333
4. The simple procurement problem with multiple agents	333
5. Research and development	335
6. Multiple periods of production, regulatory lag, and the ratchet effect	338
7. Incentives within government	339
7.1. Introduction	339
7.2. Two-level models	340
7.3. Three-level models	342
8. Conclusion	342
References	343

*Chapter 13*

The Economics of Military Manpower

JOHN T. WARNER and BETH J. ASCH

	\ 347
Abstract	348
Keywords	348
1. Introduction	349
1.1. Some definitions	349

- 1.2. Summary statistics
- 2. The supply of military manpower
  - 2.1. Initial enlistment supply
    - 2.1.1. Theoretical model of the enlistment process
    - 2.1.2. Empirical models
    - 2.1.3. Empirical estimates
  - 2.2. Retention
    - 2.2.1. Theoretical models of retention
    - 2.2.2. Empirical studies
- 3. Demand for military manpower
  - 3.1. Framework
  - 3.2. Studies of personnel productivity
  - 3.3. Force mix issues
- 4. Global procurement issue: to draft or not to draft?
  - 4.1. Economic theory of the draft
  - 4.2. Other issues
- 5. The structure of pay
  - 5.1. Stylized facts about military compensation
  - 5.2. Theory
- 6. Force management issues
  - 6.1. Women in the military
  - 6.2. Reserve force management issues
- 7. Civilian returns to military service
- 8. Summary
- References

*Chapter 14*

The Defense Industrial Base

J. PAUL DUNNE

Abstract

Keywords

- 1. Introduction
- 2. Defining the defense industrial base
- 3. The defense equipment market
- 4. The military industrial complex
- 5. The structure and evolution of the DIB
- 6. Efficiency and economic effects
- 7. Developments in the DIB
- 8. Conclusions

References

*Chapter 15*

Economics of Defense R&D

FRANK R. LICHTENBERG	431
Abstract	432
Keywords	432
1. Introduction	433
2. Design competitions	434
2.1. How much private investment in defense R&D?	436
3. Independent R&D subsidies	437
4. The profitability of defense (R&D and other) contracts	441
5. The impact of defense and other R&D on productivity growth	444
6. The effect of defense R&D on nondefense R&D investment	448
7. How do Government decision-makers respond to cost information yielded by defense R&D?	450
8. Are defense R&D programs dynamically optimal?	453
9. Conclusions	455
References	456

*Chapter 16*

Industrial Policies in the Defense Sector

KEITH HARTLEY	459
Abstract	460
Keywords	460
1. Introduction	461
2. The stylized facts and the policy problem	461
3. The economics of standardization	465
4. Taxonomy: project appraisal and procurement options	471
5. International collaboration	473
5.1. Collaboration: a public choice analysis	475
5.2. Empirical results	477
6. Licensed and co-production	479
7. Offsets	481
8. The military production function: internal efficiency	483
9. Conversion	484
9.1. Direct conversion	485
9.2. Re-allocating resources and public policy	486
10. Conclusion: a research agenda	487
References	487

*Chapter 17*

Regional Impact of Defense Expenditure

DEREK BRADDON

Abstract

Keywords

1. Introduction
2. Data problems
3. Theoretical approaches for evaluating regional impacts
  - 3.1. Economic base models and regional multipliers
  - 3.2. Regional defense expenditure and local labor markets
  - 3.3. Input-output analysis
  - 3.4. Regional econometric models
4. The regional distribution of defense expenditure
5. Selected case studies
6. Policy implications
7. Conclusions

References

*Chapter 18*

Economics of Arms Trade

CHARLES H. ANDERTON

Abstract

Keywords

1. Introduction
2. The structure of the international arms market
  - 2.1. Arms imports
  - 2.2. Arms exports
  - 2.3. Structural change: end of the Cold War
3. Causes of arms trade
  - 3.1. Economic causes
    - 3.1.1. Supply and demand model
    - 3.1.2. Neoclassical trade model
    - 3.1.3. Trade models with economies of scale and learning economies
    - 3.1.4. Imperfect competition and trade
  - 3.2. Domestic political economy
    - 3.2.1. Defense industrial base
    - 3.2.2. Employment
  - 3.3. Economic and political synthesis
4. Arms trade and conflict
  - 4.1. Theoretical models of arms trade and conflict
  - 4.2. Empirical studies
  - 4.3. Case studies

5. Arms trade and foreign policy influence	554
5.1. Sislin's theory of arms influence success	555
5.2. Determinants of arms influence success	556
5.3. Recipient influence	558
6. Concluding comments	558
References	559

Economics of Disarmament

JACQUES FONTANEL	563
------------------	-----

Abstract	564
----------	-----

Keywords	564
----------	-----

1. Introduction	565
-----------------	-----

2. Economic definitions of disarmament	565
--	-----

2.1. Disarmament via physical reductions and a ban or limitation on forces	566
--	-----

2.2. Military expenditure reduction	566
-------------------------------------	-----

2.3. Thoroughgoing disarmament	567
--------------------------------	-----

3. Theoretical economic analysis of disarmament	569
---	-----

3.1. The peace dividend approach	570
----------------------------------	-----

3.2. Disarmament as an investment	571
-----------------------------------	-----

3.3. Development as the main factor of disarmament	572
--	-----

3.4. Disarmament/armament as elements of a national strategy	572
--	-----

4. Empirical analysis of disarmament	575
--------------------------------------	-----

4.1. The United States	576
------------------------	-----

4.2. France	578
-------------	-----

4.3. United Kingdom	578
---------------------	-----

4.4. Simulations for developing countries	579
---	-----

5. Disarmament for development	580
--------------------------------	-----

5.1. The nature of the transfers	580
----------------------------------	-----

5.2. The economic effect of a disarmament for development process	581
---	-----

6. The role of public policy	583
------------------------------	-----

7. Conclusion	585
---------------	-----
