Preface xviii

PART I An Introduction to Microeconomics 1

Chapter 1 Microeconomics: A Working Methodology 2

- 1.1 Choice of Production Technique 3
- 1.2 The Water Shortage Problem 3
 - Common Property Problems 8
- 1.3 Agricultural Price Support Programs 9
 - Competitive Equilibrium Price and Quantity 10
 - Price Supports 11
- 1.4 Describing an Economy 14
 - A Resource Endowment 15
 - A Technology 15
 - Preferences of Individuals 15
 - Self-Interest and Economic Choice Making 16
 - Institutions 17
- 1.5 The Equilibrium Method 18
- 1.6 Positive and Normative Economics 19
 - The Pareto Criterion 20
 - Cost-Benefit Analysis 21
- 1.7 The Market Economy 22
 - The Circular Flow of Economic Activity 23
 - The Plan of the Book 24
- Summary 24
- Exercises 25
- Appendix: Model Building 27
- References 37

PART II Individual Choice 39

Chapter 2 A Theory of Preferences 40

- 2.1 Completeness and Consistency of Preferences 40
 - The Two-Good Case 41

	A Preference Ordering	41
	Completeness Assumption	42
	Two-Term Consistency Assumption	42
	Transitivity (or Three-Term Consistency) Assumption	42
2.2	Tradeoffs and Indifference Curves	44
	Nonsatiation	46
	The Slope of Indifference Curves	47
	Non-Intersecting Indifference Curves	48
2.3	Tradeoffs and the Marginal Rate of Substitution	50
	Diminishing Marginal Rate of Substitution	52
	Kinked Indifference Curves	52
	Shapes of Indifference Curves	53
2.4	Applications	56
	Overtime Pay	56
	Pollution	57
	Snap Courses	59
2.5	Utility Functions	61
	Constructing a Utility Function	61
	Many Utility Functions	63
	The Meaning of Utility Numbers	64
2.6	The Many-Goods Case	65
	Summary	66
	Exercises	67
	References	68

Chapter 3 Getting and Spending: The Problem of Economic Choice Making 69

3.1	Economic Choices	69
3.2	The Budget Constraint	71
	Attainable Consumption Bundles	71
	Opportunity Cost	72
3.3	The Consumer's Choice Problem	73
	The Choice Problem	73
	The Solution: Demand Functions	74
3.4	Graphic Analysis of Utility Maximization	76
	Interior Solutions	76
	Corner Solutions	78
3.5	Elasticity	81
	Elasticity of the Number of Smokers with Respect to Price	84

3.6	Comparative Statics Analysis of Demand	85
3.7	Consumption Response to a Change in Income	86
	Normal Goods and Inferior Goods	86
	Engel Curves	87
	Some Income Elasticities of Demand	88
3.8	Consumption Response to a Change in Price	89
	The Price-Consumption Path	91
	The Demand Curve	91
	Some Price Elasticities of Demand	91
3.9	Income and Substitution Effects	92
	Income and Substitution Effects for a Price Increase	93
	Income and Substitution Effects for a Price Decrease	94
	The Negative Substitution Effect	96
	The Ambiguous Income Effect	96
	The Slope of the Demand Curve	97
*3.10	The Compensated Demand Curve	97
	The Substitution Effect Revisited	97
	The Compensated Demand Function	99
3.11	Complements and Substitutes	101
	Some Cross-Price Elasticities of Demand	102
3.12	Composite Commodities	103
*3.13	Two General Properties of Demand Functions	104
	No Money Illusion	104
	Engel's Aggregation Law	106
	Summary	106
	Exercises	107
	References	109

Chapter 4 Vicarious Problem Solving: Applications of the Theory of Choice 110

4.1	Lump-Sum Versus Excise Taxes	110
	Excise Tax Versus Lump-Sum Tax	110
	An Application to the Theory of Clubs	113
	Government Subsidies	113
4.2	Measuring Benefits and Costs	114
	Equivalent Variation for a New Good	114
	Compensating Variation for a New Good	114
	Equivalent Variation for a Price Change	117
	Compensating Variation for a Price Change	117

	Comparing Equivalent Variation and Compensating Variation	117
	Consumer's Surplus	118
*4.3	The Demand for Consumer Capital	121
*4.4	Two-Part Tariffs	124
4.5	The Demand for Leisure and the Supply of Labor	127
	Work, Leisure, and Income	127
	Time and Money Prices	128
*4.6	The Tragedy of the Commons	129
	Racquetball and the Tragedy of the Commons	130
	First Come, First Served Allocation	130
	Institutional Mechanisms for Allocation	131
*4.7	Index Numbers	133
	Quantity Indexes	133
	Price Indexes	135
	Summary	137
	Exercises	137
	References	139

Chapter *5 Choice Making under Imperfect Information 140

5.1	Expected-Utility Theory	140
	Calculating Expected Monetary Value	141
	The Expected-Utility Hypothesis	142
	The Expected-Utility Function	143
5.2	Generalizing the Expected-Utility Approach	146
	Subjective Probabilities	147
	State-Dependent Preferences	148
5.3	Attitudes Towards Risk	148
5.4	Shedding Risk	152
	Informal Risk Pooling	152
	The Market for Insurance	154
	Risk Spreading	157
	The Case for Risk Aversion	158
5.5	The Economics of Asymmetric Information	158
	Hidden Characteristics	159
	Adverse Selection: The "Lemons Principle"	161
	Signaling	162
	Moral Hazard Problems: Hidden Actions	165
	Summary	167
	Exercises	167

Appendix: The Expected-Utility Theorem	171
The Substitution Assumption	172
The Ordering Assumption	173
Expected Utility Theorem	174
References	175

PART III The Firm 177

Chapter *6 The Theory of the Firm 178

6.1	Organizational Issues	178
	Three Structures of the Firm	179
	Cooperation from Noncooperative Behavior	180
	A Key to the Puzzle: Institutions	181
	The Existence of Multiperson Firms	182
6.2	Organizational Issues	183
	The One-Person Firm	183
	A Two-Person Alternative	185
	The Partnership Equilibrium	187
	Pareto Optimality and Choice of Institutions	189
6.3	Team Production	189
	Productivity of Teams	190
	Partnership with Team Production	190
	The Owner-Managed Team	192
	Contracting and Monitoring Costs	193
6.4	The Pareto-Preferred Organizational Forms	195
6.5	Specialization and the Division of Labor	197
	Transactions Costs	199
	Generic Inputs	199
	Specific Inputs	200
	Summary	201
	Exercises	202
	References	204

Chapter 7 Production and Cost: One Variable Input 205

7.1	The Production Function	205
	Defining the Production Function	206
	A Fixed-Proportions Production Function	206
	Variable-Proportions Production Functions	207

7.2	The Short- and Long-Run Cost-Minimization Problems	209
	The Long-Run Cost-Minimization Problem	209
	Input Prices	210
	Short-Run Cost-Minimization Problems	210
7.3	Production: One Variable Input	210
	Total Product	211
	Marginal Product	212
	Diminishing Marginal Productivity	213
	Average Product	216
7.4	Costs of Production: One Variable Input	219
	The Variable Cost Function Illustrated	220
	Deriving the Variable Cost Function	221
	Average Variable Cost and Short-Run Marginal Cost	221
	Average Product and Average Cost	225
	Marginal Product and Marginal Cost	225
	Fixed Cost	226
	Short-Run Total Cost and Short-Run Average Cost	226
*7.5	Applications: Traffic Congestion and Multiplant Firms	228
	The Allocation of Output among Different Plants	233
	Summary	234
	Exercises	235
	References	237

Chapter 8 Production and Cost: Many Variable Inputs 238

8.1	Isoquants and Input Substitution	238
	The Shape of Isoquants	239
8.2	Marginal Rate of Technical Substitution	240
	Perfect Substitutes and Perfect Complements	243
	Diminishing Marginal Rate of Technical Substitution	243
	<i>MRTS</i> as a Ratio of Marginal Products	244
8.3	Returns to Scale	245
8.4	The Cost-Minimization Problem: A Perspective	248
8.5	Solving Cost-Minimization Problems	249
	The First Principle of Cost Minimization	251
	The Second Principle of Cost Minimization	251
8.6	Comparative Statics for Input Prices	254
8.7	Comparative Statics for the Level of Output	256
	Normal and Inferior Inputs	257
	Long-Run Costs and Output	258

8.8	Comparing Long-Run and Short-Run Costs	261
8.9	A Theory of Market Structure	265
	Summary	267
	Exercises	268

Part IV Goods Markets 271

Chapter 9 The Theory of Perfect Competition 272

9.1	Competitive Model of Exchange	272
	Market Demand	273
	Market Supply	274
	The Walrasian Auctioneer	275
	Competitive Equilibrium	275
	Pareto Optimality, or Efficiency	277
	The Role of Initial Allocation	277
	The Function of Price	278
9.2	Potential Difficulties with the Competitive Model	279
	Price Taking or Price Manipulating	279
	Large Numbers and Price-Taking Behavior	281
	Price Making: The Walrasian Auctioneer	281
	Perfect Information	282
	Robustness of the Competitive Model	282
9.3	The Assumptions of Perfect Competition	283
9.4	The Firm's Short-Run Supply Decision	284
9.5	Short-Run Competitive Equilibrium	290
	Aggregating Demand	290
	Aggregating Short-Run Supply	291
	Short-Run Competitive Equilibrium	292
9.6	Efficiency of the Short-Run Competitive Equilibrium	294
9.7	Long-Run Competitive Equilibrium	296
	No-Exit, No-Entry, and Long-Run Equilibrium	296
	Price Equal to Minimum Average Cost	297
	The Individual Firm in Long-Run Equilibrium	298
	Long-Run Supply Function	298
	The Constant-Cost Case	299
	A Dynamic Story	299
	The Increasing-Cost Case	301
	The Decreasing-Cost Case	304
9.8	Comparative Statics	304

*9.9	Rent Control	305
	The Rent Control Model	305
	Apparent Effects of Rent Control	307
	Short-Run Effects	307
	Long-Run Effects	309
	Summary	310
	Exercises	311
	References	314

Chapter 10 Monopoly 315

10.1	Monopoly Defined	315
10.2	The Monopolist's Revenue Functions	316
	Marginal Revenue	317
	Marginal Revenue and the Price Elasticity of Demand	319
	Linear Demand Curve	319
10.3	Maximizing Profit	321
10.4	The Inefficiency of Monopoly	324
10.5	Sources of Monopoly	327
	Government Franchise Monopoly	327
	Patent Monopoly	327
	Resource-Based Monopoly	327
	Technological (or Natural) Monopoly	327
	Monopoly by Good Management	330
*10.6	Regulatory Responses to Monopoly	330
	Divestiture in a Resource-Based Monopoly	331
	Responses to Patent Monopoly	331
	Responses to Natural Monopoly	331
	Average Cost Pricing	331
	Rate-Of-Return Regulation	332
	Efficient Regulatory Mechanisms	334
	Franchise Monopoly	338
10.7	Price Discrimination	338
	Market Segmentation	338
	Perfect Price Discrimination	339
	Ordinary Price Discrimination	339
	Market Segmentation Revisited	344
	Multipart or Block Pricing	345
*10.10	Patent Policy	348
	The Appropriability Problem	349

A Model of Inventions	349
Product Development in the Absence of Patents	351
The Effects of Patents	352
Optimal Patent Policy	352

Summary	355
Exercises	356
References	358

Chapter 11 Game Theory and Oligopoly 359

11.1	Game Theory	360
11.2	Monopoly Equilibrium	361
11.3	Duopoly as a Prisoners' Dilemma	362
	The Oligopoly Problem	363
	The Prisoners' Dilemma	364
11.4	The Cournot Duopoly Model	364
	Mock Dynamics in the Cournot Model	367
	Generalizing Results	368
	Isoprofit Curves	368
11.5	The Cournot Model with Many Firms	371
11.6	The Bertrand Model	372
	Dynamics in the Bertrand Model	374
11.7	The Collusive Model of Oligopoly	375
11.8	Experimental Evidence	377
11.9	Repeated Play, Supergames, and Richer Strategies	377
11.10	The Limit Output Model	379
	Barriers to Entry	380
	The Inducement to Entry	381
	Strategic Choice of Industry Output	383
	Critique of the Model	384
11.11	Refinements of Limit Output	384
11.12	Positioning and Reacting	388
	Summary	389
	Exercises	390
	Appendix: Collusion in Supergames	392
	Trigger Strategies	392
	The Credibility Problem	395
	Subgame Perfection	396
	Critique of the Collusive Model	396
	References	397

Chapter *12 Product Differentiation 398

- 12.1 Chamberlin's Symmetrically Differentiated Products 399
 - Symmetric Preferences 400
 - Symmetric Demand Functions 401
- 12.2 Chamberlin's Small-Numbers Case 404
 - The Nash Price Equilibrium 405
 - The Collusive Price 405
 - The Oligopoly Problem Again 407
 - Entry 408
- 12.3 Chamberlin's Large-Numbers Case 409
 - Short-Run Equilibrium 409
 - Long-Run Equilibrium 409
 - Efficiency and the Chamberlin Model 409
- 12.4 Address Models of Monopolistic Competition 412
 - A Model of Spatial Competition 412
 - Short-Run Price Equilibrium 413
 - Long-Run Equilibrium 417
 - Profit in Long-Run Equilibrium 418
 - Product Proliferation 420
 - Generalizing the Model 420
 - Efficiency 421
 - Product Diversity: Equilibrium Versus Cost-Benefit Efficiency 422
- Summary 422
- Exercises 424
- References 424

PART V Resource Markets and General Equilibrium 427

Chapter 13 Input Markets and the Allocation of Resources 428

- 13.1 The Role of Input Markets 428
- 13.2 Perfectly Competitive Input Markets 429
- 13.3 The Supply of Non-Labor Inputs 431
- 13.4 The Supply of Labor 431
 - Responses to Changes in Non-Work Income 433
 - Responses to a Change in the Wage Rate 434
 - Labor Supply Curves 435

13.5	The Firm's Demand for One Variable Input	437
	Input Demand in a One-Good Economy	437
	Value of the Marginal Product	441
13.6	Input Demand with Many Variable Inputs	442
	Downward-Sloping, Long-Run Input Demand Curve	442
	A Comparison of Long-Run and Short-Run Input Demand	444
13.7	Competitive Equilibrium in an Input Market	445
13.8	Monopsony in Input Markets	447
	The Monopsonist's Factor Cost Functions	447
	The Short-Run Monopsony Equilibrium	450
	The Inefficiency of Monopsony	452
13.9	Sources of Monopsony Power	453
	Immobility	454
	Monopoly and Specialized Inputs	455
13.10	Monopsonistic Price Discrimination	455
	Summary	458
	Exercises	459
	References	461

Chapter 14 The Distribution of Income 462

14.1	Distributive Justice	462
	The Productivity Principle	463
	Product Exhaustion	463
	Thought Experiments for the Productivity Principle	464
	Input Prices and Scarcity	465
	The Redistributionist Principle	465
14.2	Minimum-Wage Legislation	468
	Competitive Labor Markets	468
	Monopsonistic Labor Markets	470
	Union Wage Rates: Some Analogous Issues	472
14.3	Wage Floors in a Two-Sector Model	473
	The Underemployment Equilibrium	474
	The Unemployment Equilibrium	474
14.4	Income Maintenance	476
	The Efficient Transfer Mechanism	477
	Topping Up and Welfare	478
	The Negative Income Tax	480
	Summary	482
	Exercises	482
	References	484

Chapter 15 Intertemporal Resource Allocation 485

- 15.1 Intertemporal Value Comparisons 486
 - A Perfect Market for Loanable Funds 487
 - The Separation Theorem 487
 - Present Value 488
- 15.2 The Life-Cycle Model 489
 - The Budget Line 489
 - The Intertemporal Allocation of Lifetime Income 492
 - Comparative Statics 494
 - Supply and Demand for Loanable Funds 498
- 15.3 Human Capital 499
- 15.4 Intertemporal Allocation of Nonrenewable Resources 504
 - Individual Supply Behavior 505
 - Hotelling's Law 506
 - Determining the Competitive Equilibrium 506
- 15.5 The Firm's Demand for Capital Inputs 508
- 15.6 The Market for Loanable Funds 511
 - Summary 512
 - Exercises 513
 - References 515

Chapter 16 Efficiency and the Allocation of Resources: A General Equilibrium Approach 516

- 16.1 Efficiency in an Exchange Economy 517
 - The Edgeworth Box Diagram 517
 - Preference Assumptions 519
 - Efficiency in Consumption 520
 - The Contract Curve 521
- 16.2 Competitive Equilibrium in an Exchange Economy 522
 - Budget Lines in an Exchange Economy 522
 - Finding the Competitive Equilibrium 524
 - The First Theorem of Welfare Economics 526
 - The Second Theorem of Welfare Economics 526
- 16.3 Efficiency in General Equilibrium with Production 527
 - Production Assumptions 527
 - Efficiency in Consumption 528
 - Production Possibilities Set 528
 - Efficiency in Production 529
 - The Marginal Rate of Transformation 530
 - Efficiency in Product Mix 533

16.4	Efficiency and General Competitive Equilibrium	535
16.5	Sources of Inefficiency	537
	The Inefficiency of Monopoly	537
	Taxation and Efficiency	539
	Summary	539
	Exercises	540
	Appendix: Efficiency	541
	References	544

Chapter 17 Externalities and Public Goods 545

17.1	The Smoker's Externality	546
17.2	A Taxonomy of Externalities	550
	Consumption–Consumption Externalities	550
	Production–Production Externalities	551
	Consumption–Production Externalities	551
	Production–Consumption Externalities	551
17.3	Responses to Externalities: An Overview	551
	Private Negotiations	552
	Internalization	552
	Governmental Responses	552
	Assigning Property Rights	552
	Public Regulation	553
	Nonintervention	553
17.4	Privately Negotiated Solutions	553
17.5	Internalizing the Externality	558
17.6	Regulatory Solutions	559
	Cost-Benefit Analysis	560
	Hitting the Regulatory Target	562
17.7	Public Goods	563
	Nonrivalrous Goods	564
	Nonexcludable Goods	564
	Pure Public Goods	564
	Public Provision of Nonrivalrous Goods	565
	Cost-Benefit Analysis and Revealed Preference	566
	Summary	567
	Exercises	568
	References	569

Answers to Problems 570
