

# TECHNOLOGICAL COMPETITIVENESS

Contemporary and Historical Perspectives on the  
Electrical, Electronics, and Computer Industries

Edited by  
**William Aspray**

IEEE Center for the History of Electrical Engineering

The Institute of Electrical and Electronics Engineers, Inc., New York

# Contents

Preface vii

Introduction xiii

Part I. *Japanese Electronics* 1

*Technological Strengths Needs and Feeds a New Research Infrastructure in Japan,*  
LENNART STENBERG 5

*Progress in the Electronic Components Industry in Japan after World War II,*  
YUZO TAKAHASHI 37

Part II. *U.S. Electronics* 53

*Review of the Competitive Status of the United States Electronics Industry,*  
JAMES E. GOVER 57

*How the West Was Won: The Military and the Making of Silicon Valley,*  
STUART W. LESLIE 75

*Big Science, Competitiveness, and the Great Chain of Being,*  
ROBERT W. SMITH 90

Part III. *Computing* 101

*ICL and the American Challenge: British Government Policies for the Computer Industry, 1949–1985,* MARTIN CAMBELL-KELLY 105

*From Megaflops to Total Solutions: The Changing Dynamics of Competitiveness in Supercomputing*, BOELIE ELZEN AND DONALD MACKENZIE 119

Part IV. Telecommunications 153

*The Strategy of System-Building: Telecommunications and the American South, 1885–1920*, KENNETH LIPARTITO 157

*The Centre National d'Etude des Télécommunications and the Competitiveness of the French Telephone Industry, 1945–1980*, PASCAL GRISET 176

*Comments on Technological Competitiveness in Telecommunications, with Emphasis on Switching*, AMOS JOEL 188

Part V. Electrical Technology for the Home Market 191

*Fighting for Lighting and Cooking: Competing Energy Systems in Sweden, 1880–1960*, ARNE KAIJSER 195

*Oppositional Uses of Technology and Corporate Competition: The Case of Radio Broadcasting*, SUSAN DOUGLAS 208

Part VI. Electrical Technology for Industry and Commerce 221

*The Mechanization of Urban Transit in the United States: Electricity and its Competitors*, ERIC SCHATZBERG 225

*Technological Systems Compete at Otis: Hydraulic Versus Electric Elevators*, ANNE MILLBROOKE 243

*How They Won the Market: Electric Motors in Competition with Steam Engines, 1890–1925*, ULRICH WENGENROTH 270

*Competition and Consolidation in the Electrical Manufacturing Industry, 1889–1892*, W. BERNARD CARLSON 287

Part VII. Electric Power in France 313

*Competitiveness and Electricity: Electricité de France Since 1946*, ALAIN BELTRAN 315

*Constructing Competitiveness: The Politics of Engineering Work in the French Nuclear Program, 1955–1969*, GABRIELLE HECHT 326

Lessons from History 352

Appendix: Conference Program 356

Appendix: About the Contributors 359
