Part one

AN OVERVIEW OF ECONOMIC DEVELOPMENT

1 The development imperative

Why study economic development?

Poverty in the less-developed world

Recent trends

Why development, and why now?

Economic growth and development requires structural change

Barriers to development

Questions for review

Resources for student use and suggestions for further reading

Notes

References

CONTENTS

2 Measuring economic growth and development

Introduction

The economic growth criterion of development

International comparisons of income: purchasing power parity

The indicators criterion of development: the human development index

Comparing the income per capita and HDI measures

Economic growth and human development: goals at odds?

Questions for review

Notes

References

Appendix 2A Calculating the Gini coefficient

Appendix 2B Calculating the HDI index

3 Development in historical perspective

Introduction

The origins of economic development

Colonialism

The lasting effects of colonialism and path dependency

Forms of European colonialism

The functional role of colonialism

De-industrialization in the colonies

Measuring the impact of colonialism

The terms of trade and comparative advantage

Credit and underdevelopment

The new imperialism: 1870-1914

Mature colonialism and progressive colonialism

Progressive colonialism

Decolonization

Point Four Aid

Economic dualism

Summary

Questions for review

Part two

THEORIES OF DEVELOPMENT AND UNDERDEVELOPMENT

4 Classical and neoclassical theories

Introduction

Adam Smith: a theory of competitive capitalism and growth

Malthus's theory of population and economic growth

Ricardo's theories of diminishing returns and comparative advantage

Marx's analysis of capitalist development

Neoclassical growth models

Questions for review

Notes

References

5 Developmentalist theories of economic development

Introduction

The theory of the big push

A theory of balanced growth

Unbalanced growth

Growth with unlimited supplies of labour

Utilizing the economic surplus

Stages of growth theory

Questions for review

Notes

References

6 Heterodox theories of economic development

Introduction

The Latin American structuralists

The institutionalists

Dependency analysis

CONTENTS

Classical Marxism
Questions for review

Part three

THE STRUCTURAL TRANSFORMATION

7 The state as a potential agent of transformation: from neoliberalism to embedded autonomy

Introduction
Origins of the neoliberal paradigm
Government in the process of development
The neoliberalism of Deepak Lai
The new political economy
An assessment of the neoliberal theory of the state
Embedded autonomy
Depicting state forms
Conclusion
Questions for review
Notes
References

8 Endogenous growth theories and new strategies for development

Introduction
The income convergence controversy
Endogenous growth models
Key inputs to growth in endogenous growth models
Technical efficiency change
Questions for review
Notes
References

9 The initial structural transformation: the industrialization process

Introduction: an industrialization imperative?

Structural change and economic growth and development

Initiating the structural transformation

The elimination of infant industry protection: when is enough, enough?

The importance of embedded state autonomy to successful ISI

Potential gains from the easy ISI stage

Para-state firms and social capital

Measuring the success of easy ISI

Evaluation

Questions for review

Notes

References

10 Strategy switching and industrial transformation

Continuing structural change

Industrial sequencing: beyond easy ISI

Foreign exchange shortages

Easy export substitution

Difficult or secondary ISI

Endowments and policies: explaining strategy switches

Subsequent strategy switches

Export promotion

Continuing change

What can less-developed nations learn?

Where we are headed

Questions for review

Notes

References

11 Agriculture and development

Introduction

Inadequate infrastructural investment

Agrarian dualism

CONTENTS

Primary product mono-exporters
Peasant agriculture and small-scale cultivators
Are peasants efficient producers?
High-yield varieties and rural productivity
The developmental problems of cash crop farmers
Large landholdings and agrarian backwardness
The structuralist view
Plantation economies
Transnational agribusiness
Government in agricultural development
Land reform
Questions for review
Notes
References

12 Population, education and human capital

Introduction
The population problem
The demographic transition
Human capital accumulation: augmenting initial endowments
Human capital accumulation and market failure
Final observations
Questions for review
Notes
References

13 Technology and development

Introduction
What is technology?
A technological strategy of development
Total factor productivity and national technology
Technology-centred development versus capital-centred development
Industrial innovation
Industrial policies to promote national technology
Macropolicies and technological change
Policy implications

Questions for review

Notes

References

Part four

PROBLEMS AND ISSUES

14 Transnational corporations and economic development

Introduction

Import substitution industrialization and the TNCs

The globally integrated production system

Direct foreign investment

Who in the less-developed countries gains from DFI?

Potential costs of TNCs to a host country

Long-term costs of TNCs: the potential for environmental degradation

Export processing zones and the problems of small nations

Bargaining with the TNCs

The integrated production system

Questions for review

Notes

References

15 Macroeconomic equilibrium: the internal balance

Introduction

Inflation

The costs of inflation

The level of inflation

Alternative theories of inflation

The structuralist theory of inflation

Recent empirical research on inflation and economic growth

Correctly identifying the source of inflationary pressures

Unemployment and the informal sector

Notes	493
References	496

16 Macroeconomic equilibrium: the external balance 498

Introduction	499
Exchange rates	499
Types of exchange rate regimes	500
Real versus nominal exchange rates	508
The balance of payments	511
Exchange rates and the balance of payments	518
'Good' external imbalances	523
Monitoring the balance of payments	525
Questions for review	526
Notes	527
References	531

17 The debt problem and development 532

Introduction	532
Origins of the 1980s external debt dilemma	533
Dimensions of the debt crisis	536
When to borrow externally	536
External borrowing, adjustment policies, and savings	541
The debt burden	544
The debt crisis	546
Efforts to overcome the debt crisis	547
Debt overhang and future economic growth	550
Questions for review	551
Notes	553
References	557

18 International institutional linkages: the IMF, the World Bank, and foreign aid 558

Introduction	558
The International Monetary Fund	559

Objectives of the International Monetary Fund	565
Do IMF programmes work?	571
The World Bank	573
Critiques of World Bank and IMF SALs	582
Sustainable development	582
Foreign aid	584
The future of aid	589
Questions for review	589
Notes	590
