Preface	v
Guide to the Usage of the Handbook by Professional Groups	vi
List of Contributors	x
Introduction	1

## **PART I SOLAR RADIATION**

The role of solar radiation climatology in the design of PV systems	<i>J. Page</i>	5
---	----------------	---

## **PART II SOLAR CELLS**

### ***IIa Introduction***

1 Principles of solar cell operation	<i>T. Markvart and L. Castañer</i>	71
2 Semiconductor materials and modelling	<i>T. Markvart and L. Castañer</i>	95
3 Ideal efficiencies	<i>P.T. Landsberg and T. Markvart</i>	123

### ***IIb Crystalline silicon solar cells***

1 Silicon: manufacture and properties	<i>F. Ferrazza</i>	137
2 Low cost industrial manufacture of crystalline silicon solar cells	<i>J. Szlufcik, S. Sivoththaman, J. Nijs, R.P. Mertens and R. Van Overstraeten</i>	155
3 Thin silicon solar cells	<i>M. Mauk, P. Sims, J. Rand, and A. Barnett</i>	185
4 Characterisation and diagnosis of silicon wafers and devices	<i>A. Cuevas and R. Sinton</i>	227
5 High-efficiency silicon solar cell concepts	<i>M.A. Green</i>	253

### ***IIc Thin film technologies***

1 Amorphous silicon solar cells	<i>D.E. Carlson and C.R. Wronski</i>	281
2 Microcrystalline silicon solar cells	<i>K. Yamamoto</i>	317
3 Cadmium telluride thin-film PV modules	<i>D. Bonnet</i>	333
4 Cu(In,Ga)Se <sub>2</sub> thin-film solar cells	<i>U. Rau and H.W. Shock</i>	367

### ***IId Space and concentrator cells***

1 GaAs and high-efficiency space cells	<i>V.M. Andreev</i>	417
2 High-efficiency concentrator silicon solar cells	<i>P.J. Verlinden</i>	435

**IIe Organic and dye sensitised cells**

- |   |                                  |                    |     |
|---|----------------------------------|--------------------|-----|
| 1 | Photoelectrochemical solar cells | <i>A.J. McEvoy</i> | 459 |
| 2 | Organic and plastic solar cells  | <i>J. Nelson</i>   | 483 |

**PART III PHOTOVOLTAIC SYSTEMS****IIIa Introduction**

- |   |  |  |     |
|---|--|--|-----|
| 1 | Energy production by a PV array          | <i>L. Castañer, S. Bermejo, T. Markvart and K. Fragaki</i> | 517 |
| 2 | Energy balance in stand-alone PV systems | <i>L. Castañer, S. Bermejo, T. Markvart and K. Fragaki</i> | 531 |
| 3 | Review of system design and sizing tools | <i>S. Silvestre</i>  | 543 |

**IIIb Balance-of-system components**

- |   |                         |                  |     |
|---|-------------------------|------------------|-----|
| 1 | System electronics      | <i>J.N. Ross</i> | 565 |
| 2 | Batteries in PV systems | <i>D. Spiers</i> | 587 |

**IIIc Grid-connected systems**

- |   |   |                                       |     |
|---|---|---------------------------------------|-----|
| 1 | Grid-connection of PV generators: technical and regulatory issues | <i>J. Thornycroft and T. Markvart</i> | 635 |
| 2 | Installation guidelines: construction                             | <i>B. Cross</i>                       | 655 |
| 3 | Installation guidelines: electrical                               | <i>M. Cotterell</i>                   | 667 |

**IIId Space and concentrator systems**

- |   |   |                                  |     |
|---|---|----------------------------------|-----|
| 1 | Concentrator systems                            | <i>G. Sala</i>                   | 681 |
| 2 | Operation of solar cells in a space environment | <i>S. Bailey and R. Raffaele</i> | 705 |

**IIIe Case studies**

- |   |  |                             |     |
|---|--|-----------------------------|-----|
| 1 | Architectural integration                    | <i>R. Serra and R. Leal</i> | 725 |
| 2 | Performance, reliability and user experience | <i>U. Jahn</i>              | 749 |
| 3 | Solar-powered products                       | <i>P. Wolfe</i>             | 771 |

**PART IV TESTING, MONITORING AND CALIBRATION**

- |   |   |                             |     |
|---|---|-----------------------------|-----|
| 1 | Standards, calibration, and testing of PV modules and solar cells | <i>C. Osterwald</i>         | 793 |
| 2 | PV system monitoring  | <i>B. Cross</i>             | 817 |
| 3 | Calibration, testing and monitoring of space solar cells          | <i>E. Fernandez Lisbona</i> | 825 |

**PART V ECONOMICS, ENVIRONMENT AND BUSINESS STRATEGY**

- |   |  |                       |     |
|---|--|-----------------------|-----|
| 1 | Overview of potential hazards                                    | <i>V.M. Fthenakis</i> | 857 |
| 2 | Energy pay-back time and CO <sub>2</sub> emissions of PV systems | <i>E. Alsema</i>      | 869 |
| 3 | World photovoltaic markets                                       | <i>P. Maycock</i>     | 887 |
| 4 | National and regional support programmes                         | <i>B. Yordi</i>       | 913 |

**APPENDICES**

Appendix A	Constants, physical quantities and conversion factors	925
Appendix B	List of principal symbols	927
Appendix C	Abbreviations and acronyms	935
Appendix D	Bibliography	941
Appendix E	International and US standards with relevance to photovoltaics	947
Appendix F	Useful web sites, journals and newsheets	955

**EDITORIAL INDEX**

961
