
A Multi-Volume Comprehensive Treatise

Biotechnology

Second, Completely Revised Edition

Edited by
H.-J. Rehm and G. Reed
in cooperation with
A. Pühler and P. Stadler

Volume 11a

Environmental Processes I

Wastewater Treatment

Edited by
J. Winter

 **WILEY-VCH**

Weinheim · New York · Chichester · Brisbane · Singapore · Toronto

Contents

Introduction 1

J. Winter

I General Aspects

- 1 Historical Development of Wastewater Treatment Processes 5
L. Hartmann
- 2 Bacterial Metabolism in Wastewater Treatment Systems 17
C. Gallert, J. Winter
- 3 Nitrification and Denitrification – Microbial Fundamentals and Consequences for Application 55
D. Zart, R. Stüven, E. Bock
- 4 Autoaggregation of Microorganisms: Floes and Biofilms 65
J. Wingender, H.-C. Flemming
- 5 Nucleic Acid-Based Techniques for Analyzing the Diversity, Structure, and Dynamics of Microbial Communities in Wastewater Treatment 85
A. Schramm, R. Amann
- 6 Analytical Parameters for Monitoring of Wastewater Treatment Processes 109
H. Kroiss, K. Svardal
- 7 Monitoring of Environmental Processes with Biosensors 125
M. Reiss, W. Hartmeier
- 8 Laws, Statutory Orders and Directives on Waste and Wastewater Treatment 141
P. Nisipeanu

II Processes of Wastewater Treatment Waste Water Sources and Composition

- 9 Municipal Wastewater and Sewage Sludge 161
P. Koppe, A. Stozek, V. Neitzel
- 10 Industrial Wastewater Sources and Treatment Strategies 191
K.-H. Rosenwinkel, U. Austermann-Haun, H. Meyer
- 11 Agricultural Waste and Wastewater Sources and Management 217
P. Weiland

Aerobic Carbon, Nitrogen, and Phosphate Removal

- 12 Biological Processes in Wetland Systems for Wastewater Treatment 241
P. Kusch, A. Wießner, U. Stottmeister
- 13 Activated Sludge Process 253
R. Kayser
- 14 Biological and Chemical Phosphorus Removal 285
G. Schön, N. Jardin
- 15 Continuous Flow and Sequential Processes in Municipal Wastewater Treatment 321
E. Morgenroth, P. A. Wilderer

XVI Contents

- 16 Trickling Filter Systems 335
P. Baumann, B. Dorias
- 17 Submerged Fixed-Bed Reactors 349
J. Schulz genannt Menningmann
- 18 Experience with Biofilters
in Wastewater Treatment 365
C. Sieker, M. Barjenbruch
- 19 Special Aerobic Wastewater
and Sludge Treatment Processes 373
U. Wiesmann, J. Libra
- 20 Modeling of Aerobic Wastewater
Treatment Processes 417
M. Henze

Metal Ion Removal

- 21 Metal Removal by Biomass:
Physico-Chemical Elimination
Methods 431
G. Bunke, P. Götz, R. Buchholz

Anaerobic Processes

- 22 Anaerobic Metabolism
and its Regulation 455
M. McInerney
- 23 CSTR-Reactors and Contact Processes
in Industrial Wastewater Treatment 479
H. Kroiss, K. Svardal
- 24 Fixed Film Stationary Bed
and Fluidized Bed Reactors 493
H.-J. Jördening, K. Buchholz
- 25 Possibilities and Potential of Anaerobic
Wastewater Treatment Using Anaerobic
Sludge Bed (ASB) Reactors 517
*G. Lettinga, L.W. Hulshoff Pol,
J.B. van Lier, G. Zeemann*
- 26 Modeling of Biogas Reactors 527
H. Märkl
- 27 Future Aspects –
Cleaner Production 561
N. Rabiger

- Index 579**
