

THEORY OF ELASTICITY

by

L. D. LANDAU and E. M. LIFSHITZ

Institute of Physical Problems, U.S.S.R. Academy of Sciences

Volume 7 of Course of Theoretical Physics

Third English Edition, Revised and Enlarged

by **E. M. LIFSHITZ, A. M. KOSEVICH and L. P. PITAEVSKII**

Translated from the Russian by

J. B. SYKES and W. H. REID

CONTENTS

Prefaces to the English editions vii

Notation fiii

1. FUNDAMENTAL EQUATIONS

§1.	The strain tensor	1
§2.	The stress tensor	3
§3.	The thermodynamics of deformation	7
§4.	Hooke's law	9
§5.	Homogeneous deformations	II
§6.	Deformations with change of temperature	14
§7.	The equations of equilibrium for isotropic bodies	16
§8.	Equilibrium of an elastic medium bounded by a plane	22
§9.	Solid bodies in contact	26
§10.	The elastic properties of crystals	32

II. THE EQUILIBRIUM OF RODS AND PLATES

§11.	The energy of a bent plate	38
§12.	The equation of equilibrium for a plate	40
§13.	Longitudinal deformations of plates	46
§14.	Large deflections of plates	50
§15.	Deformations of shells	54
§16.	Torsion of rods	59
§17.	Bending of rods	64
§18.	The energy of a deformed rod	67
§19.	The equations of equilibrium of rods	70
§20.	Small deflections of rods	76
§21.	The stability of elastic systems	83

III. ELASTIC WAVES

§22.	Elastic waves in an isotropic medium	87
§23.	Elastic waves in crystals	92
§24.	Surface waves	94
§25.	Vibration of rods and plates	99
§26.	Anharmonic vibrations	104

IV. DISLOCATIONS

§27.	Elastic deformations in the presence of a dislocation	108
§28.	The action of a stress field on a dislocation	116
§29.	A continuous distribution of dislocations	119
§30.	Distribution of interacting dislocations	
§31.	Equilibrium of a crack in an elastic medium	

	<i>Page</i>
V. THERMAL CONDUCTION AND VISCOSITY IN SOLIDS	
§32. The equation of thermal conduction in solids	133
§33. Thermal conduction in crystals	134
§34. Viscosity of solids	135
§35. The absorption of sound in solids	137
§36. Highly viscous fluids	142
VI. MECHANICS OF LIQUID CRYSTALS	
§37. Static deformations of nematics	144
§38. Straight disclinations in nematics	147
§39. Non-singular axially symmetrical solution of the equilibrium equations for a nematic	152
§40. Topological properties of disclinations	156
§41. Equations of motion of nematics	158
§42. Dissipative coefficients of nematics	163
§43. Propagation of small oscillations in nematics	165
§44. Mechanics of cholesterics	170
§45. Elastic properties of smectics	172
§46. Dislocations in smectics	177
§47- Equations of motion of smectics	179
§48. Sound in smectics	182
Index	185
